Introduction

The Right Tool	2-3
--------------------------	-----

Cylinders (Hydraulic) 4-83

Introduction	4-5
RC-Series TRIO, Single-Acting Cylinders	6-9
RC-Series TRIO, Cylinder Accessories	10
RA-Series, Aluminum Cylinders Introduction	11
RAC-Series, Single-Acting Aluminum Cylinders	12-13
RACL-Series, Single-Acting Aluminum Lock-nut Cylinders	14-15
RACH-Series, Single-Acting Aluminum Hollow Cylinders	16-17
RARH-Series, D/A Aluminum, Hollow Plunger Cylinders	18-19
RAR-Series, Double-Acting Aluminum Cylinders	20-21
CULP-Series, Ultra-Flat Cylinders	22
CUSP-Series, Ultra-Flat, High Tonnage Cylinders	23
LPL-Series, Single-acting Low Height Lock-Nut Cylinders	24-25
RSM/RCS-Series, Single-Acting Low Height Cylinders	26-27
RLT-Series, Low-Height Telescopic Cylinders	28-29
RT-Series, Telescopic Cylinders	30-31
BRC-/BRP-Series, Single-Acting Pull Cylinders	32-33
RCH-Series, Single-Acting Hollow Plunger Cylinders	34-35
RRH-Series, Double-Acting Hollow Plunger Cylinders	36-37
RD-Series, Double-Acting Precision Cylinders	38-39
RR-Series, Double-Acting Cylinders	40-43
HTC-Series High-Tonnage Cylinders Intro	44-45
High-Tonnage Cylinders Quick Selection Chart, HCG, HCR, HCL, HCRL-Series	46-47
HCG-Series, Single-Acting High-Tonnage Cylinders	48-51
HCR-Series, Double-Acting High-Tonnage Cylinders	52-55
HCL-Series, S/A, High-Tonnage Lock Nut Cylinders	56-59
HCRL-Series, D/A, High-Tonnage Lock Nut Cylinders	60-61
SC-Series, Cylinder-Pump Sets	62-63
RC, P, V-Series, Extreme Environment Products	64
SC, SL, SR, SW-Series, Portable Hydraulic Toolbox	65
JH/JHA-Series, Aluminum & Steel Jacks	66
GBJ-Series, Industrial Bottle Jacks	67
PR-Series, Pow'R Riser®	68-69
PL-Series, Pow'R LOCK™	70-71
BLS-Series, Double-Acting Climbing Jacks	72-73
SCJ-Series, Self-Locking Cube Jack	74-77
LH-Series Skidding Systems	78-81
ETT-Series, Turntables	82
Custom Hydraulic Cylinders	83

Pumps and Directional Control Valves 84-145

Introduction	84-85
P-Series, Lightweight Hand Pumps	86-87
P-Series, ULTIMA Steel Hand Pumps	88-89
P-Series, Low-Pressure Hand Pumps	90-91
P-Series, Lightweight Foot Pump	92
MP-Series, Multifluid Hand Pumps	93
P- and 11-Series, Ultra-High Pressure Hand Pumps	94-95
XC-Series, Cordless Pump	96-97
ZC-Series, Cordless Hydraulic Pumps	98-99
PU-Series Economy Pumps	100-101
E-Series, E-Pulse Electric Pump	102-103
Z-Class Electric Pump Intro	104-105
ZU-Series, Electric Pumps	106-111
ZE-Series, Electric Pumps	112-117
8000-Series (PE), Electric Pumps	118-119
PA & PAM-Series, Air Hydraulic Pumps	120-121
PA-Series, Turbo II Air Pumps	122-123
XA-Series Air Pumps	124-125
ZA-Series, Air Hydraulic Pumps	126-127
ZG-Series Gasoline Powered Pumps	128-130
8000-Series (EGM), Gasoline Powered Pumps	131
SFP-Series Split Flow Pumps	132-135
EVO-Series, Synchronized Lifting Systems	136-137
Custom Hydraulic Pumps	138

Pump Mounted Directional Control Valves 139-145

Introduction	139
VM, VE-Series, Pump-Mounted Valves	140-141
VC-Series, Remote Mounted Valves	142
VC, VM, VE Valve Dimensions	143
VE-Series, Solenoid Operated Modular Valves	144-145

System Components and Control Valves 146-165

Introduction	146-147
High-Pressure Hoses	148-149
Hydraulic Couplers	150-151
Hydraulic Oil, Manifolds and Fittings	152-155
GF and GP-Series, Hydraulic Force and Pressure Gauges	156-157
G & H-Series, Hydraulic Pressure Gauges	158-159
T-Series, Test System Gauges	160
DGR-Series, Digital Hydraulic Gauges	161
GA45GC Gauge Adaptor Assembly	162
GA, NV, V Gauge Accessories	163
V-Series Flow & Pressure Control Valves	164-165

Hydraulic Presses 166-181

Introduction	166-167
IP-Series, H-Frame Presses	168-171
IPR-Series, Roll Frame Presses	172-173
A-Series, C-Clamps and Arbor Presses	174-175
Press Accessories	176
Press Speed Chart	176
Custom Built Presses	177
VLP & XLP-Series Presses	178-179
TM, LH Tension Meter and Load Cells	180
Custom Hydraulic Presses	181

Pullers (Mechanical and Hydraulic) 182-201

Introduction	182-183
BHP-Series, Hydraulic Puller Sets	184-187
Sync Grip Pullers Introduction	188-189
SGM-Series Mechanical Sync Grip Pullers	190
MPS-Series Master Puller Sets	191
GPS-Series Hydraulic Puller Sets	192
BHP-Series Cross Bearing Puller Sets	193
LGM-Series, Mechanical Lock-Grip Pullers	194-195
LGH-Series, Hydraulic Lock-Grip Pullers	196-197
LGH-Series, Hydraulic Master Lock-Grip Pullers	198-199
LGHMS-Series, Hydraulic Master Lock-Grip Pullers	199
IPM-Series Internal Mechanical Pullers	200
EPH-Series, Posi-Lock® 100-Ton Hydraulic Grip Pullers	201

Specialty Tools (Mechanical and Hydraulic) 202-219

Introduction	202-203
MS-Series, Maintenance Sets	204-207
SP, MSP, STP-Series, 35-Ton Hydraulic Punch	208-209
SP-Series, 50-Ton Hydraulic Punch	210-211
LW-Series, Vertical Lifting Wedge	212
SOH-Series, Hydraulic Machine Lifts	213
ER, ES and ELP-Series, Heavy-Duty Load Skates	214-215
CM-Series, Storage Cases	216
A, WR-Series, Wedgies & Spread Cylinders	217
STB-Series, Pipe Benders	218-219

Cutters 220-237

Introduction	220-221
EBH-Series, Hydraulic Bar Cutters	222-223
EBE-Series, Electric Bar Cutters	224
EBC-Series, Cordless Bar Cutters	225
EDCH-Series Decommissioning Cutters	226
EFBE-Series, Flat Bar Cutters	227
ECCE-Series, Chain Cutters	228-229

EWCH-Series, Hydraulic Wire and Cable Cutters	230-231
EWCE-Series, Electric Wire and Cable Cutters	232
ECSE-Series, Cutter/Spread Combination Tools	233
WHC, WHR, STC-Series, Hydraulic Cutter Head	234
WMC-Series, Self-Contained Hydraulic Cutters	235
Pumps/Accessories for EWCH, EBH, EDHC- Series Cutters	236-237

Bolting Tools 238-341

Introduction	238-239
S-Series X-Edition, Square Drive Steel Torque Wrenches	240-243
TSP, RTEK, SRSX Accessories for S-Series X-Edition Torque Wrenches	243
BSH-Series Sockets	244
BUS-Series, Back-Up Spanners	245
STTL-Series, Safe T™ Torque Lock	246-247
W-Series X-Edition, Low Profile Hexagon Torque Wrenches	248-249
W-Series Hexagon Cassettes	250-257
W-SL-Series, Ultra Slim Cassettes	258-259
TSP, WTE, WRP Accessories for W-Series X-Edition Torque Wrenches	260
Bolting Application Ideas	261
RSL-Series, Low-Profile Cassettes	262
RSL Drive Units for Hexagon & Square Drive Cassettes	263
RSL-Series Hexagon Cassettes	264-268
Accessories for RSL wrenches, ERA, ERT	269
RSL-Series, Slimline Hexagon Cassettes (RLP-SL)	270-271
RSL-Series, Square Drive Torque Wrenches, RSQ	272-273
DSX-Series, Square Drive Torque Wrenches	274-275
DSX-Series, Allen® Wrenches (DDA)	276
Bolting Applications & Portable Machining	277
HMT-Series, Modular Torque Wrenches	278
Drive Units for Hexagon & Square Drive Cassettes	279
HLP-Series Hexagon Cassettes for HMT Drive Units	280-281
HMT-Series Square Drive Hydraulic Torque Wrenches/HSQ Cassettes)	282-283
E-Series Manual Torque Multipliers	284-285
PTW-Series Pneumatic Torque Wrenches	286-287
PTW-Series Torque Wrench Accessories	288-289
MCS-Series, Mobile Calibration System	290
Torque Wrench & Pump Selection Chart	291
XC-Series, Cordless Torque Wrench Pump	292-293
E-Series, E-Pulse Electric Torque Wrench Pump	294-295
TQ700 Series Electric Torque Wrench Pump	296-297
ZU4T-Series, Electric Torque Wrench Pumps	298-301
ZE-Series, Torque Wrench Pumps	302-303
LAT-Series, Air Hydraulic Torque Wrench Pumps	304-305
ZA4T-Series, Air Driven Torque Wrench Pumps	306-309
HM-Series, Hydramax Topside Bolt Tensioners	310-313
GT-Series, Hydraulic Bolt Tensioners	314-315
EAJ-Series, Aquajack Subsea Tensioners	316-317
PGT-Series, Power Generation Bolt Tensioners	318-319
FTR-Series, Foundation Bolt Tensioners	320-321
FTE-Series, Foundation Bolt Tensioners	322-323
HPT-Series Pump and Accessories	324
HT, B, Ultra High-Pressure Hoses and Couplers	325
Multi-Stage Tensioners Awareness	326
ATP -Series, Ultra-Pressure Air Hydraulic Pump	327
ZUTP-Series, Electric Tensioning Pump	328-329
ATM-Series, Flange Alignment Tools	330-331
FSM, FSH, FSC-Series Hydraulic and Mechanical Industrial Spreaders	332-333
NC-Series, Hydraulic Nut Splitters	334-335
NSC, NSH-Series Integral & Hydraulic Nut Splitters	336-337
NSH-Series Hydraulic Nut Splitters (S/A & D/A)	338-339
FF-Series, Mechanical Flange Face Tool	340-341

Flange Maintenance Tools 342-357

Introduction	342-343
SWi, Flange Spreading Tools	344-345
SWi, Flange Spreading Tools (ATEX)	346-347
SG-Series, Flange Spreading Tools	348-351
VC-Series, Valve Change-Out Tools	352-353
MG-Series Flange Spreading Tools	354
FC-Series, Flange Pulling Tool	355
TFA-Series, Flange Alignment Tools (Wind Turbine Tower)	356
HP-Series, Hand Pumps and Hoses	357

Heavy Lifting Technology 358-377

Introduction	358-359
LH, HSK-Series, Skidding Systems	360-361
HSL-Series, Strand Jacks	362-363
SL, SBL-Series, Hydraulic Gantries	364-365
JS-Series, Jack-Up System	366-367
SHS/SHAS-Series, SyncHoist System	368-369
ETR-Series, Trolley System	370-371
SPMT-Series, Self-propelled Modular Transporter	372
Lifting Solutions	373-377

On-Site Machining Tools 378-397

Introduction	378-379
FF, MM-I Series, Internal Mount Flange Facing Machines	380
MM-E Series, External Mount Flange Facing Machines	381
DLR-Series, Clamshell Pipe Cutting & Beveling Machines	382-383
OM-Series, General Orbital Milling Machines	384
WP-Series, Wind Power Orbital Milling Machines	385
LMR, MR, MRY, GM-Series, Linear Milling Machines	386-387
HTM, LPH, MHT, CHT, LSA-Series, Hot Tapping Machines & Line Stopping Actuators	388-389
MWDS Decommissioning Diamond Wire & Band Saws	390-391
HT, T, DDU-Series, Drilling & Tapping Machines	392-393
GeniSYS IV Portable 3-Axis CNC Mill	394-395
MITT-Series, Isolation and Test Tools	396-397

Yellow Pages (Information Section) 398-417

Warranty Statement, Introduction and Standards	398-399

ENDLESS INNOVATION RESULTS IN THE RIGHT TOOL

CUSTOMER-DRIVEN INNOVATION

We believe it takes advanced technical expertise and ingenuity to develop the industry's most trusted solutions. Our relentless pursuit to deliver the highest standard of excellence means never compromising on quality. Yet, it all starts with a thorough understanding of our customer needs, the environments they work in and the ideas of tomorrow that help get jobs done faster, easier and safer.

SOLVING CUSTOMER PROBLEMS

INDUSTRY LEADING TECHNOLOGY

One of our core values is to continually innovate and solve customer problems. That all begins with the discovery process. Through the efforts of a dedicated innovation team and several centers of excellence, new ideas are uncovered by listening to our customer's pain points and observing how they perform tasks in their own environments. These inputs lead to the forming of ideas and eventually prototypes that can be tested, refined and transformed into finished products.

CONTINUOUS IMPROVEMENTS

FIND OUR NEWEST PRODUCTS AT ENERPAC.COM/INNOVATION

Continuous improvement means new products are introduced and made available to customers on a regular basis throughout the year. Find the newest Enerpac products at Enerpac.com/Innovation.

THE RIGHT TOOL MAKES ALL THE DIFFERENCE

Backed by a global legacy of ultra-reliable quality and superior precision, Enerpac is pushing the industry forward with a wide range of advanced industrial tools and services that first and foremost ensure our customers operate safely and productively every day. It isn't about being compliant. Or "as good" as the next guy; we outpace the competition by delivering technically superior solutions that are easy to get, safe to use and built to outlast.

NEVER COMPROMISE

Enerpac combines technical excellence with proven performance – every day, every year, year after year. We believe customers shouldn't have to compromise – they can rest easy knowing that even in the most complex situations, their reputations and productivity are protected by the most trusted industrial tools available.

SAFETY AND PRODUCTIVITY

Our customers put their physical well-being and reputations on the line each day they go to work; we take the fact that they put their trust in us very seriously. Enerpac team members are obsessively committed to developing solutions that keep the world's workers safe and productive in highly demanding working conditions.

ON-DEMAND ACCESS

For us, offering the ideal customer experience means working overtime to make sure our customers can be heroes when it matters most by providing on-demand access to a vast catalog of products and services, extensive training and mobilized field teams no matter where they are in the world.

As a global market leader in high-pressure hydraulic tools, controlled force products and solutions for precision positioning of heavy loads, Enerpac products have maintained and moved some of the largest structures on earth. They are the industry standard in aerospace, infrastructure, manufacturing, mining, oil & gas, power generation and much more.

Enerpac hydraulic cylinders are available in hundreds of different configurations. Whatever the industrial application... lifting, pushing, pulling, bending, holding... whatever the force capacity, stroke length, or size restrictions... single- or double-acting, solid or hollow plunger, you can be sure that Enerpac has the cylinder to suit your high force application.

Enerpac jacking cylinders fully comply to ASME B30.1 (except RD-Series).

With the 3rd Generation comes a trio of key features

The next evolution of the legendary Enerpac RC-Series hydraulic cylinder. The driving force of the Enerpac cylinder range, the new **RC-TRIO** is as **versatile** as ever.

Featuring a new TRIO Bearing System for **enhanced durability** and a hybrid spring-return system for **faster retraction** and even **greater productivity**.

NEW RC-SERIES TRIO CYLINDERS

New TRIO Bearing System

- Includes up to 4 high-performance wear bands that offer increased resistance to damage, reducing bearing load and increasing cylinder lifespan
- Hardened composite material wear bands increase bearing surface area for greater side-load resistance - significantly improving cylinder life
- New high-performance Polyethylene seals provide longer life, reducing downtime

New TRIO Stop Ring

- Part of the TRIO Bearing System, the TRIO Stop Ring includes an additional wear band of high-strength bronze to absorb greater side load
- Capable of taking full cylinder extension force
- Features durable wiper to help prevent contamination from entering the cylinder during retract cycles

New TRIO Spring System

- Hybrid pre-tensioned return springs for up to 3x faster retraction and increased productivity
- High-strength steel wire improves spring life
- Spring retention design improves serviceability while allowing higher pre-load during assembly
- Spring is easily removed without special tools

Durable Piston Rod

- High-strength steel plunger for improved life and sideload resistance
- Nickel-plated plunger coating improves corrosion protection
- Internal plunger threads for easy tool fixturing

Enhanced Ergonomics

- Standard carry handles on cylinders from 33 up to 55 lbs. Sizes above include certified lifting eyes or optional handles
- Collar threads, plunger threads and base mounting holes enable easy fixturing (on most models)

Improved Saddle Retention

- Hardened plunger saddle protects plunger end during all lifting operations
- Easily removable for access to plunger mounting threads
- Tilt and smooth saddles available as accessories (compatible with new range of CATS-Series Tilt Saddles)

Enduring Compatibility

- For full compatibility and peace of mind, the new RC-Series model numbers, external dimensions and threads remain unchanged from prior RC-Series cylinders. Ensuring compatibility with historical versions and systems.

Note: The cut-away drawing is representative of typical cylinder construction and may not represent all cylinders in this section.

Cylinder & Lifting Products Section Overview

* All cylinder capacities are nominal values, unless otherwise stated. [Maximum] capacities are theoretical and may vary, depending on cylinder condition and application.

▼ Shown from left to right: RC2510, RC53, RC1002, RC108, RC5010, and RC156

- **TRIO Bearing System with hardened composite wear bands for optimal side-load resistance**
- **Strengthened TRIO Stop Ring improves durability and side-load resistance**
- **TRIO Hybrid pre-tensioned spring system provides faster retraction**
- **High-grade polyethylene seals for low wear and long service life**
- **Plunger wiper reduces contamination, extending cylinder life**
- **Collar and plunger threads and base mounting holes enable easy fixturing (on most models)**
- **Certified lifting eyes on cylinder models weighing over 55 lbs. Interchangeable with optional CHM6 carrying handle**
- **Designed for use in all positions**
- **Baked enamel finish for increased corrosion resistance**
- **CR-400 coupler and dust cap included on all models**

The Industry Standard General Purpose Cylinder

Saddles

All **RC** cylinders (except RC50, 101) are equipped with hardened removable grooved saddles. For tilt and flat saddles, see the RC-Series accessory page.

All CATS-Series Tilt Saddles use a nitrocarburization surface treatment for improved corrosion protection.

Page: 10

Base Plates

To ensure the stability of cylinders for lifting applications, base plates are available for 10, 25 and 50-ton RC cylinders.

Page: 10

Specialty Attachments

For solving all kinds of application problems, specialty attachments are available for 5, 10 and 25-ton RC cylinders.

Page: 206

▼ To re-stabilize the foundation, the 308-ton silo needed to be lifted, levelled and structurally supported. Twenty-five ton RC-Series hydraulic cylinders were attached to a bracket on the top of each steel pier. Powered by a Z-Class pump, the hydraulic cylinders applied 20 tons of force at each placement to lift the silo two inches.

▼ Synchronous lifting set-up for 200-ton petrochemical process module using twelve RC2510 cylinders. To ensure the stability of the cylinders JBI25 base plates are installed.

Single-Acting, General Purpose Cylinders

Optional Carrying Handle CHM6

Certified lifting eyes on cylinder models weighing 55 lbs. and above (RC5010 and heavier models). Interchangeable with optional carrying handle. Order model number **CHM6**.

* Available as a set. See note on this page.

RC-TRIO Series

Capacity:

5 - 100 tons

Stroke:

0.63 - 14.25 inches

Maximum Operating Pressure:

10,000 psi

Think Safety

Manufacturer's rating of load and stroke are maximum safe limits.

Good practice encourages using only 80% of these ratings!

Page: 404

Lightweight Aluminum Cylinders

If you need a higher cylinder capacity-to-weight-ratio the RAC-Series are the perfect choice.

Page: 12

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to

the System Components section for a full range of gauges.

Page: 151

Pump and Cylinder Sets

All cylinders marked with an * are available as sets (cylinder, gauge, couplers, hose and pump) for your ordering convenience.

Page: 63

Speed Chart and Pump Selection Chart

See the Enerpac Cylinder Speed Chart in our "Yellow Pages" to determine your approximate cylinder speed. See Pump Selection Tool on website to choose the most suitable pump for your application.

Page: 409

◀ For full features see page 6.

The Enerpac Lightweight Aluminum Cylinders

▼ Shown: RAC, RACL, RACH, and RAR

- **Lightweight, easy to carry and position to allow a higher cylinder capacity-to-weight-ratio**
- **Non-corrosive by design, aluminum has always been a good material for use in many caustic environments**
- **Composite bearings on all moving surfaces guarantee NO metal-to-metal contact, to resist side loads and increase cylinder life**

RA Series

Capacity:

10 - 150 tons

Stroke:

1.97 - 9.84 inches

Maximum Operating Pressure:

10,000 psi

Think Safety

Manufacturer's rating of load and stroke are maximum safe limits.

Good practice encourages using only 80% of these ratings!

Page: 400

Aluminum vs. Steel

Aluminum cylinders, while offering the most lightweight solution also have some unique limitations due to material properties. It differs from steel in that it has a lower finite fatigue life. Aluminum cylinders should NOT be used in high-cycle applications such as production.

These cylinders are designed to provide 5000 cycles at their recommended pressure. **This limit should not be exceeded.** In normal lifting and many maintenance applications, this should provide a lifetime of use.

Steel Base Plate

The steel base plate protects the cylinder base from damage, it should not be removed.

The base holes in these aluminum cylinders are designed for securing the steel base plate. They will not withstand the capacity of the cylinder.

Do not use the base holes in these aluminum cylinders to attach any device to the cylinder.

▼ Shown from left to right: RAC508, RAC1506, RAC304, and RAC206

Lightweight for Maximum Portability

Saddles

All RAC cylinders are equipped with bolt-on removable saddles of hardened steel.

13

Lightweight Hand Pumps

Enerpac hand pumps **P392** or **P802** make the optimal lightweight set.

Page: 86

- Composite bearings prevent metal-to-metal contact, increasing cylinder life and resistance to side-loads of up to 10%
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models 30 tons and above
- For protection against load-induced damage, a saddle is standard on all models and a steel baseplate is standard on models 20-ton and above. The steel baseplate is optional only on 10- and 15-ton models
- Integral stop-ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High-strength return spring for rapid cylinder retraction
- CR400 coupler and dust cap included on all models
- All cylinders meet ASME B-30.1 standards

To Secure Loads Mechanically

Saddles

All RACL cylinders are equipped with bolt-on removable saddles of hardened steel. For tilt saddles see next page.

Page: 15

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 148

- Aluminum Lock Nut provides mechanical load holding for extended periods
- Hardened steel stop-ring increases cylinder life and resistance to side-loads of up to 5%
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Composite bearings increase cylinder life and side load resistance
- Handles included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop-ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High-strength return spring for rapid cylinder retraction
- CR400 coupler and dust cap included on all models
- All cylinders meet ASME B-30.1 standards

◀ The portable Lock Nut cylinder RACL1506 used for extended load support during epoxy injection for bridge reinforcement.

The Lightweight Solution for Tensioning and Testing

Saddles

All RACH-cylinders are equipped with bolt-on removable hardened steel hollow saddles.

Lightweight Hand Pumps

Enerpac hand pumps **P392** or **P802** make the optimal lightweight set.

Page: 86

- Hollow plunger design allows for both pull and push forces
- Composite bearings increase cylinder life and side load resistance
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models
- Floating center tube increases seal life
- Steel baseplate and saddle for protection against load-induced damage
- Integral stop-ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High-strength return spring for rapid cylinder retraction
- CR400 coupler and dust cap included on all models
- All cylinders meet ASME B-30.1 standards

◀ An RACH306, powered by a P392 hand pump, is used to extract corroded carriage pins from refuse collection vehicles.

The Lightweight Solution for Double-Acting Applications

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 148

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

Page: 147

4-Way Control Valve

P84 and P464 pumps feature a manual 4-way control valve, designed for use with one double-acting

or two single-acting cylinders. For system set-up information:

Page: 164

- Lighter and shorter collapsed height than equivalent RACH single-acting models
- Double-acting for rapid retraction, regardless of hose lengths or system losses
- Built-in safety valve prevents accidental over pressurization
- Hollow plunger design allows for both pull and push forces
- Composite bearings increase cylinder life and side load resistance
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models
- Floating center tube increases seal life
- Steel baseplate and saddle for protection against load-induced damage
- Integral stop-ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- All cylinders meet ASME B-30.1 standards

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 148

- Double-acting for rapid retraction, regardless of hose lengths and system losses
- Composite bearings increase cylinder life and side load resistance
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop-ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- Built-in safety valve prevents accidental over-pressurization

◀ An RAR506 was easy to position under a bulldozer for repair of frame member.

CULP-Series, Ultra-Flat Cylinders with Stop-Ring **ENERPAC**

▼ CULP50 Ultra-Flat Cylinder, with Stop-Ring

- Up to 4% side load of maximum capacity
- Stop-ring for maximum stroke limitation
- Extremely low collapsed height
- Nitrocarburized surface treatment for harsh conditions

▼ The Ultra-Flat cylinders are designed for applications where high lifting forces are required in confined spaces starting at 1.10 inch (CULP200 is shown).

CULP Series

Capacity:

10 - 100 tons

Stroke:

0.24 inches

Maximum Operating Pressure:

10,150 psi

IMPORTANT!

All Ultra-Flat Cylinders require a solid lifting surface for correct support.

The use of these flat cylinders on surfaces such as sand, mud or dirt, may result in cylinder damage.

INCORRECT!

Rough soil

CORRECT!

Flat lifting surface

For more safety instructions see our Yellow Pages.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: **148**

▼ LPL-Series, Low-height Lock Nut Cylinders

The Lowest Power Lifter

Integrated Tilt Saddles

All LPL-Series cylinders include integrated tilt saddles with maximum tilt angles up to 5°.

- Lock nut provides mechanical load holding for a safe work environment
- Integrated tilt saddle allows for up to 5 degrees of misalignment
- Extreme low-height for use in confined areas
- Side-load resistance 5-10% of maximum capacity
- Overflow port as stroke limiter to prevent plunger blow-out
- Single-acting, load-return

▼ Only the extreme low-height LPL-cylinder fits in this confined area to lift the construction. The lock nut provides positive and safe mechanical load holding over a long period of time.

Cylinder Capacity (ton)	Stroke (in)	Model Number	Maximum Cylinder Cap. at 10,150 psi (ton)	Side-load Resistance of Maximum Capacity	Cylinder Effective Area (in²)
60	1.97	LPL602	68	10%	13.42

500	1.77	LPL5002	575	5%	113.25

Single Acting, Low-Height Lock Nut Cylinders

IMPORTANT!

All LPL-Series cylinders require a solid lifting surface for correct support. The use of these cylinders on surfaces such as sand, mud or dirt, may result in cylinder damage.

INCORRECT!

Rough soil

CORRECT!

Flat lifting surface

For more safety instructions see our 'Learning Center' on www.enerpac.com

LPL Series

Capacity:

60 - 500 ton

Stroke:

1.77 - 1.97 inches

Maximum Operating Pressure:

10,150 psi

Longer Stroke Lock Nut Cylinders

For longer stroke applications HCL-Series Lock Nut Cylinders are the perfect choice.

Page: **56**

Split-Flow Pumps

SFP-Series pumps with multiple outlets with equal oil flow. For lifting and lowering applications on multiple points these pumps are a far better alternative than using separately operated pumps.

Page: **132**

Synchronous Lifting Systems

Pumps for multiple lift-point capabilities. When increased stroke accuracy is required, use the multi-functional EVO-Series lifting system.

Page: **136**

Maximum Power to Height Ratio

Saddles

All **RCS-Series** cylinders have plunger mounting holes for installation of tilt saddles. See table for selection and dimensional information.

Page: 27

Low Clearance Lifting

The **LW16** Lifting Wedge and **SOH-Series** Machine Lifts are the perfect choices for lifting loads that have low clearance.

Page: 212

RSM-Series, Flat-Jac® Cylinders

- Compact, flat design for use where other cylinders will not fit
- RSM750, 1000 and 1500 have handles for easy carrying
- Mounting holes permit easy fixturing
- Baked enamel finish for increased corrosion resistance
- CR400 coupler and dust cap included on all models¹⁾
- Hard chrome plated high-quality steel plungers
- Grooved plunger ends require no saddle
- Single-acting spring-return

RCS-Series, Low-Height Cylinders

- Lightweight, low profile design for use in confined spaces
- Baked enamel finish for increased corrosion resistance
- Plunger wiper reduces contamination, extending cylinder life
- CR400 coupler and dust cap included on all models
- Grooved plunger end with threaded holes for mounting tilt saddles
- Integral handle on RCS1002 for easy carrying
- Plated steel plungers
- Single-acting spring-return

▼ Only a couple of inches are needed for an RSM-cylinder to lift this large steel construction.

▼ RLT-Series, Low-Height Telescopic Cylinder

- Single-acting, load-return
- Nitrocarburization surface treatment for improved load and wear-resistance and corrosion protection
- For use in confined spaces: machinery positioning, tool fastening
- Mounting bolt holes for easy fixturing
- Up to 3% side-load of maximum capacity
- Design safety factor complies with ASME B30.1 & EN1494
- CR400 coupler for compatibility with standard product
- High-alloy steel for maximum strength

Extended Stroke for Low-Clearance Applications

Internal Mechanics

RLT-Series, Low-Height Telescopic Cylinders

Enerpac compact, low-height telescopic cylinders are available with two or three pistons, and can lift loads up to 1.57 inches in a single movement.

Nitrocarburization surface treatment for improved wear-resistance and corrosion protection for increased safety and longer service life in harsh conditions. The longer stroke length of telescopic cylinders will save you time and simplify projects by moving a load a greater distance and eliminating the use of temporary cribbing.

Multi-Stage Cylinders

1st Stage: maximum load capacity at lower stroke.

2nd Stage: extended stroke with lower capacity than the 1st stage.

Final Stage: maximum stroke extension with lowest capacity.

Cylinder Capacity at Maximum Stroke (ton)	Maximum Stroke (in)	Model Number	Collapsed Height A (in)	Extended Height B (in)	Oil Capacity (in ³)
4.8	0.67	RLT40	1.77	2.44	1.29

Low-Height Telescopic Cylinders, Single-Acting

Assisted-Return Pumps with Venturi Valve Technology

To improve productivity and

plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds. ZU4 and ZE-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting gravity- and spring-return cylinders. See enerpac.com for details.

Page: 141

4-Way Manifold Assembly Complete with Gauges

Offering ease of portability and

convenience with an ergonomic robust design, ready for use. Enerpac's CR400 female couplers on all ports allow the manifold to be quickly connected to up to 4 cylinders. Glycerin-filled, 10,000 psi gauges allow operators to work safely. All protected by the robust protection frame.

Manifold Type (Used for cylinders)	Model Number
4x Single-acting	AMGC41
4x Double-acting	AMGC42

RLT Series

Capacity:

4.8 - 81.7 tons

Stroke:

0.67 - 1.57 inches

Maximum Operating Pressure:

10,150 psi

WARNING:

If several telescopic cylinders need to be controlled simultaneously, Enerpac recommends the use

of Synchronous Lifting Pumps. Enerpac advises not to use SFP-Series Split-Flow Pumps unless outfitted with stroke sensors for direct feedback to operate several telescopic cylinders at one time due to the volume difference on the different stages.

▼ Shown: **RT3311 Telescopic Cylinder** (shown with plunger extended and retracted)

- Nitrocarburized surface treatment inside and out provides corrosion protection
- 3% side-load of full capacity
- Double or triple wear bearings support lifting stages
- Tilting saddles with 5 degrees of maximum tilt standard on all models
- Design Safety factor complies with ASME B30.1 & EN1494
- Certified lifting eyes for safe handling and positioning
- CR400 coupler for compatibility with standard product
- Steel cylinder base for maximum strength

- ① **Wiper Ring** on each stage to minimize contamination.
- ② **Nitrocarburized Coating** for maximum corrosion protection and surface hardness. Exterior in nitrided and Enerpac yellow epoxy.
- ③ **Stop-Ring** full load capable to prevent plunger overstroke.
- ④ **Wear Bearings.** Double or triple wear bearings for maximum sideload capability and wear-resistance.
- ⑤ **Seals** for maximum compliance and high wear-resistance.

Moving a Load a Greater Distance

RT-Series, Multi-Stage Cylinders

Enerpac compact, multi-stage telescopic cylinders are available with two or three pistons, and can lift loads up to 24 inches in a single movement.

Nitrocarburized surface treatment inside and out provides unparalleled sideload resistance and corrosion protection for safe use in the harshest conditions. The longer stroke length of telescopic cylinders will save you time and simplify projects by moving a load a greater distance and eliminating the use of temporary cribbing.

Integrated Tilt Saddles

All RT-Series cylinders include integrated tilt saddles with maximum tilt angles up to 5 degree.

Lifting Eyes

All models standard with two lifting eyes for easy handling and positioning.

Model No.	Maximum Stroke (in)	Capacity @ Maximum Stroke (ton)	Oil Capacity (in ³)
RT1510	10.63	15.4	57.61

RT3323	23.62	34.8	537.99

Multi-Stage Telescopic Cylinders, Single-Acting, Load-Return

About Telescopic Cylinders

Telescopic cylinders feature a multi-stage rod built of a series of nested steel tubes of progressively smaller diameter. These long stroke, multi-stage telescopic cylinders are particularly suitable for extended lift heights when clearance is limited.

Enerpac's Telescopic Cylinders are available with two or three pistons, and can lift loads up to 24 inches in a single movement.

Each piston rod is nitrocarburized for superior corrosion protection and enhanced durability.

RT Series

Capacity:

15.4 - 34.8 ton

Stroke:

10.63 - 23.62 inches

Maximum Operating Pressure:

10,150 psi

Multi-Stage Cylinders

1st Stage: maximum load capacity at lowest maximum stroke

2nd Stage: extended stroke but at lower maximum capacity than the 1st stage

Final Stage: maximum stroke extension but lowest maximum capacity

▼ The longer stroke length of telescopic cylinders will save you time and simplify projects by moving a load a greater distance and eliminating the use of temporary cribbing.

The Ultimate in Pulling Power

Gauges

Minimize the risk of over-loading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

Page: 147

Attachments and Accessories

The BRC25 and BRC46 units have base, collar and plunger threads to affix a range of optional attachments and accessories, such as chains, saddles and extension tubes.

Page: 206

- High-strength alloy steel construction
- Plunger blow-out protection to prevent over-extension
- Hard chrome-plated plunger for long life
- Baked enamel finish for increased corrosion resistance
- CR400 coupler and dust cap included on all models
- Plunger wiper reduces contamination, extending cylinder life
- Single-acting spring-return
- Replaceable links on BRP-models

▼ Ship building, welding and Enerpac pull cylinders go hand in hand.

▼ To lift a load bearing mast into place, BRP cylinders were used to tension the supporting cables.

Versatility in Testing, Maintenance and Tensioning Applications

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 139

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer

to the System Components section for a full range of gauges.

Page: 147

Saddles

All **RRH-Series** cylinders are equipped with smooth saddles. See table on next page for optional threaded

saddles and all dimensional information.

Page: 36

- Relief valves prevent damage in case of over-pressurization
- Baked enamel finish for increased corrosion resistance
- Collar threads enable easy fixturing (except RRH1001 and RRH1508)
- Double-acting operation for fast retraction
- Nickel-plated, floating center tube increases product life
- Hollow plunger allows for both pull and push forces
- CR400 couplers and dust caps included on all models
- Plunger wiper reduces contamination, extending cylinder life

▼ Double-acting hollow-plunger cylinders are applied for bridge launching systems.

High Precision and High Cycle Performance

Speed Chart

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' to determine your approximate cylinder speed.

Page: 409

- Designed for long life, the best choice for production applications
- Unique mounting configurations simplify fixturing
- Baked enamel finish for increased corrosion resistance
- Double-acting operation develops force in both directions, providing maximum versatility
- Plunger wiper reduces contamination, extending cylinder life

▼ Clamping application using Enerpac RD cylinders (with clevis eye attachments on both ends) for their high-pressure capability and mounting flexibility.

▼ Shown from left to right: RR10013, RR1502, RR20013, RR1010, RR7513

- Collar threads, plunger threads and base mounting holes for easy fixturing (on most models)
- Baked enamel finish for increased corrosion resistance
- Removable hardened saddles protect plunger during lifting and pressing
- Built-in safety valve prevents accidental over-pressurization
- CR400 couplers included on all models
- Plunger wiper reduces contamination, extending cylinder life

Most Versatile Performers

Rugged enough for the toughest job site uses and precision designed for high-cycle industrial uses.

Saddles

RR-Series cylinders up to 75-ton have plunger thread for installation of **CATS-Series** tilt saddles.

Tilt saddles are secured to the plunger, enabling horizontal and upside-down use.

Page: 41

Optimum Performance

Enerpac's range of Z-Class electric pumps, fitted with manual or solenoid operated 4-way valves, offer optimum combinations with RR cylinders.

Page: 104

▼ These long stroke RR-cylinders are attached to a sliding and guiding system pulling the arched roof assembly of Athen's Olympic Stadium step-by-step into the final position.

▼ RR-cylinders provide power and precision in a special hydraulic press.

Double-Acting Long Stroke Cylinders

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 139

RR Series

Capacity:

10 - 500 tons

Stroke:

2.25 - 48.00 inches

Maximum Operating Pressure:

10,000 psi

HCR-Series Cylinders

If you do not have a high-cycle application, Enerpac **HCR-Series** cylinders may be the right alternative.

Page: 52

Speed Chart

See the Enerpac Cylinder Speed Chart in our "Yellow Pages" to determine your approximate cylinder speed.

Page: 409

Optional Snap-in Saddles

Optional snap-in saddles for RR-Series double-acting cylinders:

Saddle Type	Cylinder Model Number	Saddle Model Number
Flat	RR10	A102F
	RR10	CATS12
Tilt	RR30	CATS52
	RR50, RR75	CATS100

Standard Saddles

Grooved	RR10	A102G
	RR30	A252G

For additional information on saddles:

Page: 10

Cylinder retract capacity for certain RR cylinders may be less than theoretical values, as a result of reduced relief valve pressure settings:

RR308/3014:4000 psi
RR506/5013/5020:6950 psi
RR756/7513:7200 psi

RR1010 to RR3014 models

RR506 to RR50048 models

RR1006 to RR30048

No mounting holes:

RR506, 5013
RR756, 7513
RR1502, 15032

◀ For full features see page 41.

*N: For RR1010 and RR1012: N = 1.26 inch; for RR308 and RR3014: N = 2.20 inch.

Double-Acting Long Stroke Cylinders

Couplers Included!

CR400 couplers
included on all models.
Fits all HC-Series hoses.

Capacity:

10 - 500 tons

Stroke:

2.25 - 48.00 inches

Maximum Operating Pressure:

10,000 psi

▼ HCL1006, HCG2006, HCR506

Reaching the Summit Edition:

- Nitrocarburized hardened surfaces offers improved protection against side-load scoring and cyclic wear
- Weather protected, inside and out
- Low-friction locking rings spin easy, save time and effort ¹⁾

Enclosed polymer bearing system

- Upper and lower bearings enclose the cylinder plunger for support and are able to be replaced along with seals and other soft parts
- State-of-the-art bearing materials reduce wear and avoid bore damage even in high side-load conditions

Low-wear, high-pressure seals

- Improved geometry and material selection increases seal performance even in harsh conditions
- Low friction improves retraction times

Versatile

- Over 220 models in five configurations ¹⁾
- Certified lifting eyes, base mounting holes and collar threads are included for secure handling and cylinder mounting ¹⁾

¹⁾ See specific model's technical data for more information.

Highest Level of Durability

The Summit Edition

Innovation is at the heart of the new *Summit Edition* of cylinders, delivering the high quality construction that you expect from Enerpac. The durability ensures your job gets done safely and reliably.

- Plunger support bearing adds support for eccentric loads ²⁾
- Nitrocarburization surface treatment for improved wear resistance and corrosion protection
- Replaceable composite bearings surround the seal providing support for eccentric loads
- Low-wear, high-pressure seals provide longer service life

²⁾ Eccentric load (or "side-load") is inevitable in heavy lifting. Our unique Summit Edition features provide the ultimate protection against side-load. Increased bearing surface maintains stability, and nitrocarburization treatment prevents scoring on the inside of the cylinder. Side-load poses a real problem.... our new cylinder features are the solution!

▼ Bridge lifting and launching system. The load is balanced on groups of lock nut cylinders. The hydraulic movements are synchronized using the Enerpac PLC-controlled synchronous lift systems.

High-Tonnage Cylinders

The Enerpac High-Tonnage Cylinders are particularly suitable for (multipoint) lifting applications.

HCG, HCR, HCL, HCRL-Series Cylinders

- 50 - 1000-ton lifting capacity
- 1.97 - 11.81 inch lifting stroke
- Designed to withstand up to 10% side-load of maximum capacity

HCG-Series - Single-Acting

- Load return
- Stop-ring to prevent plunger blow-out

HCR-Series - Double-Acting

- Hydraulic advance and retract for controlled movement

HCL-Series - Lock Nut, Single-Acting

- Load return
- Lock nut for mechanical load holding
- Overflow port to prevent plunger blow out

HCRL-Series - Lock Nut, Double-Acting

- 50 - 300 ton lifting capacity
- 5.91 - 11.81 inch stroke
- Hydraulic advance and retract
- Integrated tilt saddle
- Lock nut for mechanical load holding

LPL-Series - Lock Nut, Low-Height, Single-Acting

- 60 - 500 ton lifting capacity
- 1.77 - 1.97 inch lifting stroke
- Integrated tilt saddle
- Load return
- Lock nut for mechanical load holding
- 5-10% side-load of maximum capacity

In combination with our state-of-the-art power packs, you will have a world class hydraulic system to perform the most challenging lifting jobs in a safe and professional manner.

Page: 44

HCG HCR HCL HCRL Series

Capacity:

50 - 1000 ton

Stroke:

1.97 - 11.81 inches

Maximum Operating Pressure:

10,150 psi

Assisted-Return Pumps

Enerpac HCG, HCL and LPL-Series cylinders are hydraulic advance and load return. To improve

productivity and plunger retraction Enerpac offers assisted return on ZU4 and ZE-Series pumps featuring Enerpac Venturi valve technology, specifically to facilitate the faster return of single-acting, load return cylinders. See enerpac.com for details.

Split-Flow Pumps

SFP-Series pumps with multiple outlets with equal oil flow. For lifting and lowering applications on

multiple points, these pumps are a far better alternative than using separately operated pumps.

Page: 132

EVO-Series, Synchronous Lifting Systems

The EVO-system is the safest system for multi-point lifting, provided synchronized control over lifting stroke with a wide variety of features and functions.

136

HCG-Series, Single-Acting, Load Return Cylinders

- Hardened surface resists side-loading and cyclic wear
- Designed to withstand up to 10% side-load of maximum capacity ¹⁾
- Stop-ring to prevent plunger blow-out
- Weather protected, inside and out
- Upper and lower replaceable bearings enclose the cylinder plunger for support throughout the stroke
- Certified lifting eyes, base mounting holes and collar threads
- Standard collar thread up to 250 ton models. Collar thread is optional on 300 ton models and higher

SELECTION CHART 50 – 300-TON HCG-MODELS

For 400 – 1000-ton models, see pages 50-51.

For full product features see pages 44-45.

HCG-Series, Single-Acting, Load Return Cylinders

- Hardened surface resists side-loading and cyclic wear
- Designed to withstand up to 10% side-load of maximum capacity
- Stop-ring to prevent plunger blow-out
- Weather protected, inside and out
- Upper and lower replaceable bearings enclose the cylinder plunger for support throughout the stroke
- Certified lifting eyes, base mounting holes and collar threads
- Optional collar threads on 300 ton models and higher capacities

Collar Thread (in)			Collar thread is optional on 300 ton models and higher. For collar thread on cylinder add suffix "E002" to model number. Example: HCG4006E002 . The collar thread length is designed for the full rated cylinder capacity.

* A1 = Collapsed height including CATS-Series tilt saddle..

HCR-Series, Double-Acting Cylinders

- Fast advance and retract
- Designed to withstand up to 10% side-load of maximum capacity ¹⁾
- Hardened surface resists side-loading and cyclic wear
- Weather protected, inside and out
- Upper and lower replaceable bearings enclose the cylinder plunger for support throughout the stroke
- Certified lifting eyes, base mounting holes and collar threads
- Standard collar thread up to 250 ton models. Collar thread is optional on 300 ton models and higher

SELECTION CHART AND DETAILS OF 50 – 300-TON HCR-MODELS

For 400 – 1000-ton models, see pages 54-55.

For full product features see pages 44-45

HCL-Series, Single-Acting, Load-Return Cylinders

- Lock nut provides positive and safe mechanical load holding
- Low-friction locking rings spin easy, save time and effort
- Designed to withstand 10% side-load up to 90% of maximum stroke
- Hardened surface resists side-loading and cyclic wear
- Overflow port as stroke limiter to prevent plunger blow-out
- Weather protected, inside and out
- Replaceable bearings enclose the plunger for support throughout the stroke
- Certified lifting eyes and base mounting holes

SELECTION CHART 50 – 300-TON HCL-MODELS

For 400 – 1000-ton models, see pages 58-59.

For full product features see pages 44-45.

▼ Shown: **HCRL2006, HCRL506**

- Hydraulically controlled fast retraction
- Lock nut provides mechanical load holding for a safe work environment
- Designed to withstand up to 10% side-load of maximum capacity
- Integrated tilt saddle allows up to 5 degrees of misalignment
- Hardened surface resists side-loading and cyclic wear
- Weather protected, inside and out
- Replaceable bearings enclose the plunger externally and internally for support
- Certified lifting eyes, base mounting holes and collar thread as standard
- Stop-ring to prevent plunger blow-out
- Low friction lock nut, spin easy, save time and effort

Collar Thread		
Model / Capacity (ton)	Thread Size W (mm)	Thread Length X (in)
HCRL50	M130 X 2	1.65

* Up to 2000-ton and additional stroke lengths available on request.

Double Acting, High Tonnage, Lock Nut Cylinders

Higher Capacities, Longer Strokes

The HCRL-Series Cylinders are available up to 2000-ton and additional stroke lengths available on request. Contact Enerpac for more information.

HCRL Series

Capacity:

54 - 334 ton

Stroke:

5.91 - 11.81 inches

Maximum Operating Pressure:

10,150 psi

EVO-Series, Synchronous Lifting Systems

The EVO-system is the safest system for multi-point lifting, provided synchronized control over lifting stroke with a wide variety of features and functions.

The Quickest and Easiest Way to Start Working Right Away

Speed Chart

See the Enerpac Cylinder Speed Chart in our "Yellow Pages" section.

Page: **409**

LW16 Lifting Wedge

Hydraulic cylinders, jacks and lifting wedges can also be used to assist in positioning and aligning.

The LW16 only requires an access gap of 0.39 inch. See our "Specialty Tools" section on www.enerpac.com.

Page: **212**

- Optimum match of individual components
- All sets are ready to use and include single-acting cylinder, two-speed pump, 6-foot safety hose, calibrated gauge with gauge adaptor

Single-Acting, Cylinder Pump Sets

SELECTION EXAMPLE

Selected cylinder:

- RC106, Single-acting cylinder with 6.13" stroke

Selected pump:

- P392, Lightweight hand pump

Set model number:

- SCR106H

Included:

- HC7206 hose
- GF10P gauge
- GA2 adaptor

GA45GC Gauge Adaptor ³⁾

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 162

SC Series

Capacity:

5 - 100 tons

Stroke:

1.50 - 14.25 inches

Maximum Operating Pressure:

10,000 psi

Hydraulic Tool Box

Tool box with hand pump, gauge adaptor assembly, hose and RC-, RCS-, RSM-Series cylinder.

RC, P, V Series

Cylinder Capacity:

5 - 25 tons

Stroke:

2 - 6 inches

Maximum Operating Pressure:

10,000 psi

Applications

Use Enerpac **Extreme Environment Products** in wet environments such as food processing, pulp and paper, mining, construction and applications in high temperature or in welding areas.

- Corrosion resistant, nickel-plated valves and cylinders
- Stainless steel pump inserts will not corrode
- Viton® Seals provide heat and chemical resistance
- Anodized aluminum pump reservoirs and plastic encapsulated pump bodies resist wet environments
- Two-speed operation reduces pump handle strokes 78% compared to single-speed pumps
- Pump handles lock for easy carrying

Multifluid Hand Pumps

MP-Series corrosion resistant hand pumps for low pressure filling and high pressure testing applications, suitable for a wide range of fluids.

Portable Hydraulic Toolbox

▼ Shown: SCR106TB

- Includes a single-acting cylinder, two-speed lightweight hand pump (P392), gauge adaptor assembly (GA45GC), and 6 ft. rubber hose with couplers (HC9206C)
- Complete and ready-to-use hydraulic system
- Easy to carry sturdy toolbox
- All components ship inside the toolbox as one package

SCR, SCL, SRS Series

Capacity:

5 - 50 tons

Stroke:

0.44 - 10.13 inches

Maximum Operating Pressure:

10,000 psi

Gauge Adaptor Assembly

Toolbox sets include a 45 degree angled gauge adaptor assembly for improved operating ergonomics and safety.

▼ The Hydraulic Toolbox is a versatile tool and applicable everywhere.

▼ Shown from left to right: JHA356, JHA156

JH, JHA Series

Capacity:
7 - 100 tons

Stroke:
3.00 - 6.13 inches

Maximum Operating Pressure:
10,000 psi

- All-directional operation on 7, 15 and 35-ton JHA-Series
- Internal relief valve to prevent overloading
- Machined flat front and bottom surfaces permit flush alignment in tight corners
- All models include pumping handle
- Chrome-plated plungers
- Automatic by-pass port to prevent over-extension (JH-Series)

Lifting Wedge and Machine Lifts

Ideal to lift the load the first few inches. The **LW16** Lifting Wedge requires a very small access gap of only 0.39 inch.

Page: **212**

Load Skates

For moving heavy loads easily and safely.

Industrial Steel Bottle Jacks

▼ Shown: GBJ010A, GBJ030A, GBJ003A

GBJ Series

Capacity:

2 - 110 tons

Stroke:

2.44 - 18.11 inches

Screw Feature

Heat treated, adjustable extension screw with cleated saddle on selected GBJ models helps adjusting and prevents slipping.

- Lower handle effort reduces operator fatigue
- Fully serviceable
- High-strength beam and pump linkage for long life
- Pumping handle included on all models
- Safety relief valve to prevent overload
- Automatic by-pass port to prevent over-extension
- Wiper seal for extended life
- Thick base material with large area for increased strength and stability during lifting

Pump and Cylinder Sets

As an alternative to Industrial Bottle Jacks where the operator is required to stand remote from the jacking point, see the range of pump and cylinder sets.

Safe, Efficient, Mobile Load Lifting

Pendant Cord

Standard 12 ft. pendant cord for air driven units with pneumatic valves and 20 ft. pendant cord for electric driven units keeps operator away from the load.

POW'R LOCK – Self-Locking Mobile Lift System

A self-locking jack that performs automatic locking during lifting, lowering and holding. See the Enerpac PL-Series.

Page: 70

- 60, 100, 150 and 200-ton capacities with pneumatic or electric pumps for the toughest jobs
- 4-inch ground clearance for transport over rail and rough terrain
- Three-position handle provides easy tilt back and transport
- Complies with ASME/ANSI B30.1:2015 & CE specifications
- Easy-to-change external filter minimizes down time
- Rugged, fully enclosed 24-inch wide frame with no exposed fittings or hoses
- SUP-R-STACK™ Extension System allows lifting at all heights without blocking.

Efficient Lifting with Continuous, Automatic Load Locking

Pow'R-LOCK™ Self-Locking Lift System

Only the **Pow'R-LOCK™** Lift System provides continuous positive locking of the load through all stages of lifting and lowering. No operator intervention is required to activate or deactivate the automatic locking system.

Two different stroke lengths are available. Both models are powered by an external compressed air system (user-supplied). A convenient two-button pendant controls operation of the Lift System's air motor and directional control valve.

- Provides continuous locking protection during lift, lower and hold functions
- Patent-pending control technology synchronizes cylinder and lock nut for smooth and efficient lifting and lowering
- Unique double-acting cylinder offers a low collapsed height to accommodate more lifting applications
- Simple 2-button pendant allows operation of raise and lower functions from up to 20 feet away
- All exposed load-bearing steel cylinder components utilize a nitrocarburizing treatment to reduce wear and resist corrosion
- Ergonomic handle has six positions for comfortable handling and folds when not in use
- Meets ANSI /ASME B30.1-2015, AS/NZS-2538, AS/NZS-2693 certification criteria

Tilt Load Cap

All **Pow'R-LOCK™** Lift System models feature a Tilt Load Cap to reduce side-loading.

Enerpac declares that this product has been tested and conforms to applicable standards and is approved to carry the CE mark. An EU Declaration of Conformity is enclosed separately.

◀ The PL-Series Pow'R-LOCK Portable Lift System.

Pow'R-LOCK™ Portable Lift System

Accessories

Flat Load Cap – Non-tilt load cap has lower profile for tight lifting spaces.

Spacers – Minimize gap between load cap and lifting point to maximize hydraulic stroke of the jack.

Extensions – Stackable, with large alloy steel locating studs to resist effects of side-loading.

Extension Base Adapter – Extension Base Adapter design eliminates risk of improper stacking when using more than one extension.

200 tons

Stroke:

14 or 24.5 inches

Maximum Operating Pressure:

10,000 psi

▼ ACCESSORIES

	Model Number	Description	Height (in)	PL20014-ASA	PL20025-ASA
	PLC1	Flat Load Cap	1.3	x	x
	PLS1	Spacer	1.0	x	x
	PLS2	Spacer	2.0	x	x
	PLE5	Extension	5.0	x	x
	PLE7	Extension	7.0	x	x
	PLE9	Extension	9.0	x	x
	PLE11	Extension	11.0	x	–
	PLE14	Extension	14.0	x	–
	PLB12	Extension base adapter	12.0	x	–

WARNING!

PLE11 and **PLE14** Extensions and **PLB12** Extension Base Adapter are to be used with the "short" model **PL20014-ASA** only.

Use of these extensions on the "tall" model **PL20025-ASA** will result in an excessive maximum lifting height. Load could become unstable and drop, resulting in possible personal injury and/or property damage.

Model No.	Max. Additional Stack Height* (in)
PL20014-ASA	28.0
PL20025-ASA	9.0

* Using optional PLB and PLE-Series extensions and PLS-Series spacers. Load cap height is NOT included in the stack height.

Safety First

When lifting large, heavy vehicles certain precautions must be followed. Follow your published safety directions for lifting and cribbing your loads.

The **Pow'R-LOCK™** Lift System provides load/lock protection, but you must follow the safety directions for load cribbing operations.

Capacity (ton)	Stroke (in)	Model Number	Cylinder Lifting Speed * in/min		Recommended Air Supply**		A *** (in)	B *** (in)	Wt. (lbs)
			Load	No Load	(CFM)	(psi)			
200	14.0	PL20014-ASA	2.0	2.4	130-150	55-100	48.0	34.0	1105
	24.5	PL20025-ASA	2.0	2.4			70.0	45.5	1320

* Depending on available airflow, regulator setting, pump speed and load weight.

** Minimum dynamic air pressure of 55-60 psi, 90-100 psi required to achieve 200-ton capacity.

*** Height of items A and B is with swivel load cap installed. Subtract 2-inches if flat load cap is used.

Pow'R-RISER® Lifting Jack

When automatic load-locking is not required, the Enerpac **Pow'R-RISER®** jack provides a mobile lifting solution.

For more information go to:
www.enerpac.com

Page: 68

▼ Shown: **BLS1006**

- Climbing Jacks include integral tilt saddles with maximum tilt angles up to 5°
- Large base with anti-rotation rod for stability and safety
- Built-in safety valve prevents accidental over-pressurization
- Baked enamel finish for increased corrosion resistance
- CR400 couplers included on all cylinder models

A Simple Solution to Incremental Lifting

Lifting Height

Climbing Jacks overcome the usual limitation of lift height imposed by the jack's plunger stroke length. Large objects, such as oil tanks, can be lifted, held and lowered for maintenance without sending for a crane.

Split-Flow Pumps

SFP-Series Pumps with multiple outlets with equal oil flow. For lifting applications on multiple points Split-Flow

Pumps are a far better alternative than using independently operated pumps.

Page: **132**

EVO-Series, Synchronous Lifting Systems

The EVO-system is the safest system for multi-point lifting, provided synchronized control over lifting stroke with a wide variety of features and functions.

Page: **136**

Jack-Up System

For incremental lifting with higher lifting capacities and up to 66 feet lifting height, see our JS-Series Jack-Up Systems.

Page: **366**

▼ Synchronous Stage Lifting: 48 double-acting jacks (25 and 50 ton) are networked into a 16 point synchronous system to lift this 164-feet, 1100-ton building up to a height of 8-feet to construct a new floor level.

Cylinder Capacity (tons)	Stroke (in)	Model Number	Max. Cylinder Capacity (tons)	
			Push	Pull
55	5.91	BLS506	55	12
105	6.34	BLS1006	105	48
154	5.94	BLS1506	154	74
220	5.94	BLS2006	220	113

Double-Acting Climbing Jacks

◀ Typical stage-lift application using a custom built Enerpac system to lift the 360 ton Akkerwinde wooden bridge in the Netherlands.

BLS Series

Capacity per Lifting Point:

55 - 220 tons

Stroke per Stage:

5.91 - 6.34 inches

Maximum Operating Pressure:

10,000 psi

▲ Stage Lifting Sequence

Step 1: The Climbing Jack is placed on a solid support under the load (retracted plunger).

Step 2: Plunger extends, lifting the load and giving clearance to insert two outer blocks under the spreading plate.

Step 3: Plunger retracts, giving clearance to position the central blocks which will support the plunger plate for the next extension.

Step 4: Plunger extends, lifting the load, giving clearance to insert two new blocks, placed crosswise under the spreading plate.

* Support blocks are not supplied by Enerpac.

▼ SCJ50, Enerpac Self-Locking Cube Jack

- System is automatically mechanically locked after the lifting or lowering stroke
- Self-aligning steel cribbing blocks save time, improve side load resistance, and eliminate the need for wooden cribbing materials
- Jobs are completed more efficiently due to simplified operation sequence with 50% less cycles than climbing jacks
- End block with adjustable swivel saddle allows fine adjustment during set-up: 1.97-inch screw extension
- Can be operated with Enerpac's 10,000 psi hydraulic power units
- Maximum sideload 1.5% at full extension
- Lloyds witness tested to 125% of maximum working load

▼ Typical set-up with 4 Self-Locking Cube Jack and cribbing blocks to lift a transformer (hydraulic power pack and hoses not shown).

Incremental Lifting System With Automatic Mechanical Locking

Why use Self-Locking Cube Jacks?

The Self-Locking Cube Jack is a safer, more efficient alternative to the jack-and-pack method with wooden cribbing.

The Cube Jack is derived from the proven Enerpac Jack-up System. The Cube Jack has a small footprint and is usable in confined spaces, providing heavy lift contractors with a stable lift up to 118.3 inch. The cribbing blocks are lightweight and can be handled manually.

Markets & Applications

Applications with a minimum starting height of 19 or 22 inches and requirement to lift up to 81 or 118 inches.

- Power Generation transformer jacking
- Mining - equipment maintenance
- Heavy Transport - vehicle unloading
- Oil & Gas - module jacking
- Construction - bridge jacking
- Industrial Movers - lifting, lowering and levelling of heavy equipment.

Self-Locking Cube Jacks

Self-Locking Cube Jacks

Easy-to-use, compact and portable jacking system that utilizes base lifting frames and self-aligning, lightweight steel cribbing blocks, instead of wooden cribbing materials.

Operation is simple:

1. Connect the Cube Jacks to the Enerpac Split-Flow Pump and select lifting mode on each base lifting frame.
2. Insert a cribbing block and actuate the Cube Jack until the cribbing block engages the lock mechanism.
3. Retract the jack and repeat the process until the desired lifting height is reached. For the lowering operation select lowering mode on each base lifting frame and reverse the process.

The Cube Jack End Block is equipped with an adjustable saddle for initial alignment with the load. All controls except for the main directional valve, which is on the hydraulic power unit, are included on the Cube Jack.

Manual cribbing block insertion

Cribbing blocks are easily managed by hand and the Cube Jack includes integrated fork pockets and lifting rings for effortless positioning.

Synchronous Lifting & Lowering

If synchronization is required, the Cube Jack can accommodate stroke sensors and be used with any Enerpac Computer Controlled Synchronous Lifting System.

SCJ Series

Capacity Per Cube Jack:

56 - 110 ton

Maximum Lifting Height:

81.4 - 118.3 inches

Maximum Operating Pressure:

10,000 psi

▼ SCJ100, Enerpac Self-Locking Cube Jack

Incremental Lifting System With Automatic Mechanical Locking

Transportation Frame

Provided with purchase of each Cube Jack.
Provides storage and transport for base unit, end block, and all included cribbing blocks.

Lightweight Cribbing Blocks

Provided with purchase of each Cube Jack.
Spare cribbing blocks can be ordered separately.

Description	Model No.
1x Cribbing Block	SCJ5B
1x Cribbing Block	SCJ10B

- Included with Cube Jack are:
 - Cube Jack Base Unit
 - End Block with Swivel Saddle
 - Multiple cribbing blocks: 11x on SCJ50
18x on SCJ100
 - Transportation Frame
- Cribbing blocks can be manually inserted into Cube Jack by one person

Split-Flow Pumps

Enerpac recommend to use the SFP-Series Pumps with multiple outlets with equal oil flow.

For lifting and lowering applications on multiple points, Split-Flow Pumps are a far better alternative than using separately operated pumps.

▼ Forklift tabs on Cube Jacks for easy transportation and positioning with a pallet truck. See dimensions D and I to select the right pallet truck size.

▼ LH-Series, Low-Height Skidding System

- **Low starting height saves time and increases versatility**
- **Portable design allows for easy transport and setup**
- **System can push or pull load without relocating skidding cylinder**
- **Skid track sections bolt together to allow each setup to be customized as needed**
- **Replaceable PTFE skid pads lower the total cost of ownership**

Low Height Skidding System for Heavy Loads

The Ideal Low-Height Jack & Slide Solution

Skidding Systems

The Skidding System is comprised of a series of skid beams moved by hydraulic push-pull cylinders, travelling over a pre-constructed skid track.

A series of special PTFE-coated Teflon® pads are placed on the skid tracks to reduce friction. The push-pull cylinders are then connected by hydraulic hoses to our Split-Flow Pump. The Split-Flow Pump can be mounted on an optional pump cart for easy transport.

An optional storage and transport frame easily holds the equipment in between use.

▼ LH400, Low-Height Skidding System provides the service team with the ability to maneuver and transport a press frame.

Low-Height Skidding System, 400 Tons

Low-Height Skidding Jack Starter Kit - LH400SKJ

A complete starter kit is available to fit the needs of any jack and slide application. This system comes with two skidding units that will support up to 400 tons in total. This kit will get the job done, but there are optional accessories available in addition (see pages 80-81).

Each skidding unit will have 1 push-pull unit, 2 skid beams, 5 skid tracks, and 2 hoses. The Split-Flow Pump has 2 outlets and can be easily towed on the pump cart. After the job is complete, components can be stowed on the included storage and transport frame.

LH400SKJ Starter Kit includes:	Model Number	Qty.
Push-Pull Unit (200 tons)	LHPP25	2x
Skid Beam A (3.3 feet)	LHSB1A	2x
Skid Beam B (3.3 feet)	LHSB1B	2x
Skid Track (3.3 feet)	LHST1	10x
Split-Flow Pump (460V, 3 ph)	SFP213MJ	1x
Pump Cart (for SFP-pump)	LHPC	1x
Hydraulic Hoses (50 ft)	HC7250C	4x
Storage and Transport Frame	LHSF	1x

LH Series

Skidding Capacity (with 2 push-pull units):

LH400 Low-Height Skidding System

SFP-Series, Split-Flow Pump

Split-Flow pumps distribute an equal amount of hydraulic oil to a maximum of 8 outlets. Smart valve technology allows both controlled lifting and lowering of heavy loads.

Page: 132

Hydraulic Power Packs

Energac offers a comprehensive range of hydraulic power packs that are optimized for use with Skidding Systems.

LHPC Pump Cart

The LHPC pump cart easily tows pump around jobsite and can be used with all models of Split-Flow Pumps.

▼ LHPP25 Low-Height Push-Pull Unit

Push-Pull Unit

- Connects to first skid beam to push or pull load along skid track
- Easily reverse direction by switching reaction tabs
- Complies to ASME B30.1 and other safety standards

Maximum Capacity (tons)		Model Number	Stroke (inch)	Weight (lbs)
Push	Pull			
25	11	LHPP25	23.5	224

▼ LHSB1A and LHSB1B Skid Beams

Skid Beams

- Interlocks without any fasteners to slide load over skid track; skid beam A (LHSB1A) attaches to the push-pull unit skid beam B (LHSB1B) attaches to skid beam A
- Polished stainless steel skid surface
- Carrying handles for easy transport

Capacity (tons)	Model Number	Weight (lbs)
100	LHSB1A	145
100	LHSB1B	139

Low-Height Skidding Components

▼ LHST1 Skid Track

- Support the load for skidding operations
- Track sections bolt together
- Includes 9 pieces easily replaceable PTFE skid pads

Max.Cap. (per skid track)	Model Number	Track Length	Weight (including pads)
(tons)		(in)	(lbs)
100	LHST1	37.60	148

LH Series

Skidding Capacity (with 2 push-pull units):

400 tons

Push-Pull Stroke:

23.5 inches

Maximum Operating Pressure:

10,000 psi

Teflon® Pads

A series of special PTFE coated Teflon® pads are placed on the skid tracks. The PTFE surface is matched with the skid beam and designed to achieve minimum friction coefficients. Replacement Teflon® pads come in packs of 12 pieces. Order model number **HSKSPS1**.

LHSF Storage and Transport Frame

- For easy storage and transport.
- Fits following components:

2x LLPP25 Push-Pull Unit

2x LHSB1A Skid Beam A

2x LHSB1B Skid Beam B

10x LHST1 Skid Tracks

▼ An LH400 Skidding System allows the maintenance team to transport transformers with access limitations.

PC25	Fits P202, P391, P392

LX101 Hand Pump Oil

A medium viscosity oil specially formulated for hand pumps. Performs well in low temperatures and requires less pumping effort than standard Enerpac HF blue oil.

Page: 152

- Lightweight and compact design
- Durable glass-filled nylon reservoir and nylon encapsulated aluminum pump base for maximum corrosion resistance
- Two-speed operation on most models reduces handle strokes by as much as 78% over single speed pumps
- Lower handle effort to minimize operator fatigue
- Integral 4-way valve on P842 for operation of double-acting cylinders
- Handle lock and lightweight construction for easy carrying
- Large oil capacities to power a wide range of cylinders or tools
- Non-conductive fiberglass handle for operator safety
- Internal pressure relief valve for overload protection

▼ Shown from left to right: P77, P80, P84, P801, P39

- Reduced handle effort and ergonomic grip for less operator fatigue
- Two-speed operation for fast and easy operation (except P39)
- Vent free reservoir eliminates spills
- Quick grip handle allows for easy transport
- Integral reservoir over-pressurization protection
- All steel construction, chrome plated plunger and wiper system for durable, long lasting performance
- 4-way valving on the P84 and P464 for operation of double-acting cylinders

▼ In the absence of a power supply, the P80 Hand Pump offers a powerful solution.

The Solution for Tough Jobs

Two-Speed Pumps

Recommended for applications where cylinder plunger must advance rapidly to contact load, and applications where greater oil capacities are required, such as multiple cylinder hook-ups.

Foot Pump Conversion Kits

Convert your **P39, P77, P80, or P801** to foot power with the **PC11 Kit**.

Includes instructions for easy conversion.

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 162

4-Way Control Valve

P84 and P464 feature a manual 4-way control valve, designed for use with one double-acting or two single-acting cylinders. For system set-up information:

Page: 404

Pump Type	Usable Oil Capacity (in ³)	Model Number	Pressure Rating*		Oil Displacement per Stroke (in ³)		Max. Handle Effort (lbs)

▼ Shown from left to right: P25, P51, P18

When Less Than 10,000 psi is All You Need

- P25 and P50 pump oil in both forward and reverse handle movement improving overall efficiency, ideal when mounting space is restricted
- External load-release valve
- Internal pressure-relief valve for overload protection
- For use with single-acting cylinders and tools
- P18 vertical operation requires pump head facing down
- P25, P50 vertical operation requires pump vent side facing up
- P51 for horizontal operation only

LX101 Hand Pump Oil

A medium viscosity oil specially formulated for hand pumps. Performs well in low temperatures and requires less pumping effort than standard Enerpac HF blue oil.

Page: 152

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 162

MP-Series, Multifluid Hand Pumps

▼ Shown: **MP110**

MP Series

Reservoir Capacity:

2 gallon (optional)

Flow at Rated Pressure:

0.12 - 1.28 in³/stroke

Maximum Operating Pressure:

1,500 - 14,500 psi

Optional Reservoir Kit

The two-gallon reservoir kit **MP10T*** includes tank with skid frame, top plate with reservoir seal, suction pipe and mounting bolts. Useable oil capacity is 1.5 gal.

*For use with mineral oil applications only.

Also available is model number **11-400**.

Page: **94**

- Superior corrosion resistance
- Impregnated aluminum anodized pump housing with stainless steel internal pumping components
- Standard Nitrile seals – excellent for demineralized water, oil/water emulsions, water glycols, mineral oils, hydraulic fluids
- Custom EPDM seals available for use with Skydrol® or brake fluids
- Two-speed pumps up to 14,500 psi pressure
- Externally adjustable pressure-relief valve
- 1/4" NPTF gauge port

▼ MP-Series pumps are ideal for testing and filling applications.

MP10T

MP110, 350, 700, 1000

- ① Suction / Tank return port 3/8"-18 NPTF
- ② Pressure port 3/8"-18 NPTF
- ③ Gauge port 1/4"-18 NPTF

Pump Type	Usable Oil Capacity (in ³)	Model Number	Pressure Rating (psi)		Oil Displacement per Stroke (in ³)		Max. Handle Effort (lbs)	Piston Stroke (in)	Weight (lbs)
			1st stage	2nd stage	1st stage	2nd stage			
Two Speed	*	MP110	500	1500	3.2	1.28	99	1.04	14.5

	*	MP700	500	10,000	3.2	0.18	99	1.04	14.5
	*	MP1000	500	14,500	3.2	0.12	99	1.04	14.5

Note: MP-Pump includes 0.060 in. thick gasket for reservoir mounting.

* MP-Series pumps require the use of an external reservoir.

▼ Shown from left to right: 11-100, P2282

- Two-speed operation on the P2282 allows for faster fill, reducing cycle times for many testing applications
- 303 Stainless steel construction on the 11-100 and 11-400 models enable use with many different fluids, such as distilled water, alcohol, diesters, silicones, soluble oils and petroleum
- Large release knob for improved control of pressure release
- Outlet ports are 3/4"-16 cone for 40,000 psi rating

Ultra-High Pressure up to 40,000 psi

2-Way Shut-Off Valve 72-750

For 40,000 psi applications requiring a shut-off valve or gauge snubber. Made of 318 Stainless Steel and utilizing 0.38-inch cone fittings, it is the perfect selection for use with your Ultra-High Pressure Hand Pump.

Test System Gauges

Ideal for monitoring pressure in your hydraulic circuit, Test System Gauges, such as the T6010L, are available with cone threads or NPTF threads and in a variety of pressure ranges.

Page: 160

▲ Typical Test System

▲ Test System with Gauge and Snubber

Cone Seal

Stainless Steel High Pressure fittings seal on a "cone" surface and do not require pipe sealer. The Gland Nut holds the sleeve and tubing tight against the cone surface to provide a 40,000 psi seal.

Pump Type	Usable Oil Capacity (in ³)	Model Number	Pressure Rating* (psi)		Oil Displacement per Stroke (in ³)		Max. Handle Effort (lbs)
			1st stage	2nd stage	1st stage	2nd stage	
Two-speed	60	P2282	200	40,000	0.99	0.037	106
Single-speed	45	11-100	N/C	10,000	N/C	0.152	120
	45	11-400	N/C	40,000	N/C	0.038	120

* Contact Enerpac for applications where operating pressure is less than 10% of pressure rating.

Ultra High-Pressure Hand Pumps

▼ Optional Ultra-High Pressure Fittings and Tubing

Description	Connection	Model No.
40,000 psi		
Gland Nut Plug	0.38" cone	43-001
Elbow	0.38" cone	43-200
Tee	0.38" cone	43-300
Gauge Tee	0.38" cone side/ 0.25" cone gauge port	43-301
Gauge Adaptor	0.38" cone side/ 0.25" cone gauge port	83-011
Coupling	0.38" cone	43-400
Cross	0.38" cone	43-600
Gland Nut with Sleeve	0.38" cone	43-701
Gauge Connector	0.25" cone	43-704
Tubing	4" tube, O.D. 0.38" * 8" tube, O.D. 0.38" * 12" tube, O.D. 0.38" *	45-116 45-126 45-136
WARNING: Maximum working pressure: 10,000 psi only		
Adaptor	0.38" F cone to 1/4" M NPTF 0.38" F cone to 3/8" M NPTF	41-146 41-166
Adaptor	0.38" F cone to 1/4" F NPTF 0.38" F cone to 3/8" F NPTF	41-246 41-266
Adaptor	0.38" M cone to 3/8" F NPTF	41-366

Note: 0.25" cone fittings use 9/16"-18 threads, 3/8" cone fittings use 1/4"-16 threads.

* Actual tubing lengths are 0.75" less than nominal size shown. These dimensions make distance between centers of valves and fittings multiples of 4" spaces.

P/11 Series

Reservoir Capacity:

45 - 60 in³

Flow at Rated Pressure:

0.037 - 0.152 in³/stroke

Maximum Operating Pressure:

10,000 - 40,000 psi

Ultra-High Pressure pumps DO NOT have an internal safety pressure relief valve.

Stainless Steel Construction

Ultra-high pressure fittings feature all stainless-steel construction except adaptor 41-366, which features nickel plated carbon steel construction.

11-100*, 11-400

*NOTE: Maximum operating pressure for model 11-100 is 10,000 psi.

▼ Shown: **XC1201M**

- **Lightweight design with integrated handle and carrying strap for portability**
- **Bladder reservoir prevents contamination and allows pump usage in any position**
- **Powerful ½ horsepower motor and 28-volt Lithium-Ion battery deliver exceptional speed and run time**
- **High-strength fiberglass reinforced composite shroud for superior durability in demanding job site environments**
- **Cordless technology eliminates tripping hazards found in other electric or air powered pumps**
- **Available in torque wrench, dump and hold, single-acting and double-acting valve configurations**

Performance of a Powered Pump

Portability of a Hand Pump

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 162

28-Volt Battery

The XC28V with Lithium-Ion technology for maximum battery performance.

Roll Cage

Optional Roll Cage XC-Series pumps. Please order model number **XCRCTK**.

Interactive Pendant

An interactive pendant is available on the **XC1302S** dump and hold models and **XC1502T** torque wrench

models. Operation, programming, and diagnostic status are provided to the user with yellow, green, and red LED as well as vibration pulses.

The **XC1302S** models can easily toggle between "jog operation" to "dump system pressure" and the **XC1502T** models allow "manual" and "auto cycle" mode.

◀ *Power and simplicity for the toughest jobs.*

Cordless Hydraulic Pump

XC-Series Cordless Hydraulic Pump

The XC-Series cordless pump is ideal for jobs that require a combination of portability, speed, and safety. These cordless pumps are perfect for remote locations without access to power, but also indoors where trip hazards, ergonomics or size is a concern. The XC-Series cordless pump is compatible with all Enerpac hydraulic tools and small to medium sized cylinders.

The Lithium-Ion battery provides superior run time.*

- 279 cuts of 3/8 inch reinforcing bar using the WHC750 Cutter
- 112 lifts with the WR5 Spreader
- 44 splits on 1-inch, grade 8 nuts using the NC3241 Nut Splitter
- 28 lifts of an RC104

*Actual number of cycles per charge will vary depending on condition of tool, battery and ambient conditions. Battery life with double-acting tools is approximately 75% of that for comparable, single-acting tools.

XC Series

Reservoir Capacity:
60 - 120 in³

Flow at Rated Pressure:
15 in³/min.

Maximum Operating Pressure:
10,000 psi

- ① Outlet "Advance" Port
- ② Oil Fill (must use funnel)
- ③ User Adjustable Relief Valve Access Port
- ④ Directional Control Valve *
- ⑤ Shoulder Strap Connection Points
- ⑥ Safety Lock Feature *
- ⑦ On/Off Switch *
- ⑧ Inlet "Retract" Port (double-acting models only)

* Single-acting and double-acting models only

High-Performance Battery Power

Productivity, Performance, Safety

- High-flow cordless solution saves users time and money by eliminating the need for using a generator and extension cords
- Brushless 1.4 hp motor and 3-stage pump maximizes pump and tool productivity while minimizing heat buildup and downtime
- The Lithium-Ion battery provides superior run time, even under extreme job site conditions, running approximately 50 cycles on a RC1006 and approximately 90 cycles on a RC504 cylinder on a single charge
- Convenient 10 ft. pendant cord for hassle-free operation
- Reduce noise level, 80 dba maximum
- Zero emission hydraulic power pack

◀ Special Enerpac ZC3-Series pump used for rail stressing applications.

Cordless Hydraulic Pumps

ZC-Series Cordless Hydraulic Pump

The Enerpac ZC-Series pump combines the performance of an electric pump with the convenience and portability of a battery pump. This quiet, cordless solution is ideal for applications where emission and noise are a concern, or when electricity or air is not readily available.

Power for the pump is supplied by a rechargeable 82V Lithium-ion battery. The Lithium-ion battery is capable of providing impressive run times, even under extreme job site conditions.

Valve Options

- 4-way/3-position manual control valve used with double-acting cylinders
- 3-way/3-position manual control valve used with single-acting cylinders
- 4-way/3-position manual control valve with locking and power seat functions used in post tensioning concrete applications

Applications

- High-flow cordless solution for industrial applications
- Foundation repair
- Rail industry
- Post-tensioning concrete

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: **148**

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. For use with the Economy pump, the **G2535L** gauge and **GA3** gauge adaptor are suggested.

For a full range of gauges, please refer to the System Components section.

Page: **147**

Speed Chart

To determine how the 0.5 hp Economy pump will operate your cylinder, see the Pump/Cylinder Speed Chart in the "Yellow Pages".

Page: **409**

- **Lightweight and compact design**
- **Large easy-carry handle for maximum portability**
- **Two-speed operation reduces cycle times for improved productivity**
- **115 VAC 50/60-cycle universal motor will operate on voltages as low as 60 volts**
- **24 VAC remote motor control, 10-ft length for operator safety**
- **Starts under full load**
- **High-strength molded shroud with integral handle, protects motor from contamination and damage**
- **Designed for intermittent duty cycle**

	1.00	PUJ1201B	200	10,000
Double-acting	0.50	PUJ1400B	200	10,000
	1.00	PUJ1401B	200	10,000

About the Economy Pump

The Economy pump is best suited to power small to medium size cylinders or hydraulic tools. Its lightweight and compact design makes it ideal for applications which require easy transport of the pump.

The Universal motor works well on long extension cords or generator-driven electrical power supplies.

For further application assistance refer to the "Yellow Pages".

PUD1100-Series

- Provides advance/auto-retract of single-acting cylinders
- Ideal for punching applications

- For applications not requiring load holding
- 10-ft pendant controls motor and valve operation

PUD1300-Series

- Provides advance/hold/retract of single-acting cylinders
- 10-foot pendant controls motor and valve operation
- Ideal for applications requiring remote valve operation.

PUJ-Series

- Available with 3- and 4-way valves for single- or double-acting cylinders
- 10-ft cord controls the motor operation
- Manual valves provide advance/retract tool control

The Heart of the System

Performance

- Smart controls enable motor to maintain constant power across the pressure range
- Speed control with dial adjustment for precise operation
- 24V DC power regulator minimizes effects of poor power supply
- Six-piston block design provides even flow for smooth operation of tool

Durability

- High-efficiency permanent magnet, direct drive motor enables continuous use and long service life
- System components enclosed for protection
- Built-in thermal protection
- IP Rating: 54 on the Pump, 67 on the Pendant

Convenience

- Pendant and cord management system
- Draining oil not required for pump element maintenance
- Convenient oil fill port, oil level indicator, and automatic breather

Four Valve Options

- 3/2 manual
- 4/3 manual
- 3/2 dump
- 3/2 dump and hold

Typical E-Pulse Pump Applications

- Lifting
- Spreading
- Cutting
- Pulling
- Crimping
- Pressing
- Bending
- Punching

E-Pulse® Electric Hydraulic Pumps

E-Pulse® Pumps

The Enerpac E-Pulse drives high productivity through its innovative design.

Smart controls enable the motor to maintain constant power providing higher flow than "traditional" ½ hp pumps. Adjustable speed control enables precision as required.

E-Pulse is designed for convenience. Features include a cord management system and integrated pendant control with a magnet that fits securely into the handle of the pump. The durable aluminum housing is designed to give easy access for serviceability. E-Pulse is the heart to any hydraulic system, ensuring high performance and providing ultimate convenience.

3/2 Jog, 3/2 Dump, 4/3 Jog
10-ft. cord

3/2 Dump and Hold
10-ft. cord

Interactive Pendant

- Operation, programming and diagnostics status provided to operator with yellow, green, and red LED as well as vibration pulses
- Fault codes warn operators of any issues related to voltage, temperature, button controls, or if professional service is required

Z-Class hydraulic pumps from Enerpac – pumps that run cooler, use less electricity and are easy to service.

Enerpac has used the latest metallurgical, bearing and seal technologies to produce a pump whose features and benefits far surpass the electric pumps that are available today. By reducing the number of moving parts, improving flow dynamics and decreasing friction, Z-Class pumps will stay on the job longer, require less energy to operate and when needed, have lower service costs.

Z-Class electric pumps from Enerpac – simply the best pump you will ever use.

Z Tough.
Dependable.
Innovative.
CLASS

Z-Class Pumping Element — The Heart of Your Hydraulic System

Highly efficient design provides increased flow rates, reduced heat generation and a decrease in power consumption. This means improved tool speed and increased service life — which results in higher productivity and lower operating costs.

Heavy-duty bearings extend pump life by reducing friction, reducing surface-loading and lowering bearing stresses.

Pump cavity oil bath extends pump life by reducing heat, improving lubrication and reducing wear.

Self-priming, high-flow 1st stage pump increases pump performance by super-charging the 2nd stage piston pump — improving oil flow in both hot and cold weather operation.

Balanced rotating components reduce vibration creating a smoother running pump — reducing wear, friction and sound levels.

Replaceable piston check-valves increase service life of major pump components.

Ergonomic low-voltage pendant features sealed switches and operates at 24 VDC for improved operator safety.

Back-lit LCD on Pro Z-Class pumps

- pump usage information, hour and cycle counts
- low-voltage warning and recording
- offers self-test and diagnostic capabilities
- information displayed in six languages
- pressure read-out (when used with pressure transducer)
- adjustable pressure setting (when used with pressure transducer)

Back-lit LCD available on ZU and ZE-Series Electric Pumps ▶

Z-Class accessories

Extensive list of accessories including heat exchanger, roll-bar, skid bar, pressure transducer, return-line filter and level and temperature switches, allow complete pump control over a wide range of industrial applications.

Z-Class electric pumps for your application

Available in one flow range for universal motor and four flow ranges for induction motor.

ZU4 Series Pump Applications

- **Mobile:** when frequent pump transport is required and/or on remote locations
- **Universal motor:** 1-phase, runs well under poor voltage supply, using generator power supply or using long extension cord
- **Duty-cycle:** for intermittent applications
- **Cylinders and tools:** for medium to large size single and double-acting applications and high speed

ZE Series Pump Applications

- **Stationary:** when pump remains in one location
- **Induction motor:** 1 and 3-phase for high-cycle usage
- **Duty-cycle:** for heavy-duty, extended cycle application
- **Cylinders and tools:** for medium to large size single- and double-acting applications and high speed

* ZC3 battery powered cordless pumps. ZU4T, ZE4T, ZE5T and ZA4T-Series are Torque Wrench Pumps.

** ZG5 is available in two 4-cycle engine sizes: 7.1 Ft.lbs Honda and 8.5 Ft.lbs Briggs & Stratton.

▼ Shown from left to right: ZU4304MB, ZU4420SBH

ZU Series

Reservoir Capacity:

1.2 - 10.3 gallon

Flow at Rated Pressure:

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 psi

- Features **Z-Class** high-efficiency two-stage pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1.7 hp universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, molded composite shroud protects motor and electronics, while providing an ergonomic, non-conductive handle for easy transport
- Low-voltage pendant provides additional safety for the operator (remote control units)

Pro-Series pumps only

- LCD readout provides pressure and a number of diagnostic and readout capabilities on a portable electric pump
 - pump usage information, hour and cycle counts
 - self-test, diagnostic and read-out capabilities
 - pressure readout and auto-mode pressure settings

Assisted Return Pumps with Venturi Valve Technology

To improve productivity and plunger retraction, Enerpac offers valve configurations

designed to accelerate your cylinder retraction speeds, ZU4-Series pumps feature Venturi Valve Technology to facilitate the faster return of single-acting gravity return cylinders.

See details in the "Directional Control Valve" section.

Page: 141

Speed Chart

To determine how a "Z" pump will operate your cylinder, see the Pump/Cylinder Speed Chart in the "Yellow Pages".

Page: 409

◀ Designed to be tough, the ZU4-Series with steel reservoirs will take the abuse of today's construction sites.

▼ STEP 1: Select a pump from the Pump Ordering Matrix.

The functionality of the pump can be determined by the model number. Utilize the guide below to select the best pump for the application from the pump matrix.

Z	U	4	4	08	J	B	-	H	R
1	2	3	4	5	6	7		8	
Product Type	Motor Type	Flow Group	Valve Type	Reservoir Size	Valve Operation	Voltage		Factory Installed Accessories	

1 Product Type

Z = Pump Series

2 Motor Type

U = Universal electric motor

3 Flow Group

4 = 60 in³/min @ 10,000 psi

4 Valve Type

- 1** = Dump (VE32D)
- 2** = 3 way/2 position manual or electric (VM32 or VE32)
- 3** = 3 way/3 position manual or electric (VM33 or VE33)
- 4** = 4 way/3 position manual or electric (VM43 or VE43)
- 6** = 3 way/3 position locking manual w/po check (VM33L)
- 7** = 3 way/2 position manual (VM22)
- 8** = 4 way/3 position locking manual w/po check (VM43L)
- 9** = 4 way/3 position manual w/power seating (VM43LPS)
- 10** = 3 way/3 position manual, Venturi-Valve (VM33VAC)
- 11** = 3 way/3 position electric, Venturi-Valve (VE33VAC)

5 Reservoir Capacity

- 04** = 1.2 gallon
- 08** = 1.8 gallon
- 20** = 5.2 gallon (includes side handles)
- 40** = 10.3 gallon (includes side handles)

6 Valve Operation

- D** = Dump solenoid valve with pendant and LCD Electric
- J** = Jog manual valve with pendant (w/o LCD)
- L** = Manual valve w/LCD Electric (w/o pendant)
- M** = Manual valve (without pendant and LCD)
- P** = Manual valve with pendant (w/o LCD)
- S** = Solenoid valve with pendant and LCD Electric

7 Voltage

- B** = 115V, 1 ph, 50/60Hz
- E** = 208-240V, 1 ph, 50/60 Hz (w/European plug and CE EMC compliant)
- I** = 208-240V, 1 ph, 50/60 Hz (w/NEMA 6-15 plug)

▼ STEP 2 Factory Installed Accessories

Select factory installed accessories and add to the pump model number after the hyphen. The example above shows that a Roll Cage (**R**) and Heat Exchanger (**H**) have been added to the pump.

8 Factory installed accessories include the following:

- | | |
|------------------------------------------------|--------------------------------|
| F = Return Line Filter | R = Roll cage |
| G = Gauge | K = Skid Bar |
| H = Heat exchanger | T = Pressure transducer |
| L = Level/Temperature Switch | U = Foot switch |
| N = Lifting Eyes (no reservoir handles) | |

ZU Series

Reservoir Capacity:

1.2 - 10.3 gallon

Flow at Rated Pressure:

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 psi

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides high

by-pass pressures for increased productivity—important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4 Hydraulic Pumps are built to power small to large-sized cylinders or hydraulic tools, or wherever high-speed, intermittent duty, remote hydraulic power is needed.

Pro Electric Pump

Digital (LCD) display features a built-in hour meter and shows self-diagnostic, cycle-count and low voltage warning information.

Pressure can also be displayed when the pump is equipped with a pressure transducer.

¹⁾ S/A or D/A = Single acting or double-acting pumps

²⁾ Additional details can be found in the Directional Control Valve section

³⁾ "I" indicates pump is available in 208-240V, 1-phase, 50/60 Hz with NEMA 6-15 plug. Model number order example: ZU4208MI.

"E" indicates pump is available in 208-240V, 1-phase, 50/60 Hz with European plug and CE CMC compliant. Model number order example: ZU4208ME.

⁴⁾ Classic Electric Pump has traditional electro-mechanical components (transformers, relays, switches) in place of solid-state electronics.

⁵⁾ Manual weights given, Standard Electric w/pendant add 1lb and Classic Electric w/pendant add 3 lbs.

Note: Valve Operation L available on Manual Pumps. Substitute "L" for "M" Valve Operation

Roll Cage (R)

- Protects and stabilizes the pump

Popular Pump Models with Factory Installed Roll Cages	
ZU4108DBR (I, E)	ZU4308MBR (I, E)
ZU4208JBR (I, E)	ZU4320MBR (I, E)
ZU4220JBR (I, E)	ZU4408MBR (I, E)

ZU4320JBR (I, E)	ZU4420JBR (I, E)
ZU4308SBR (I, E)	ZU4408SBR (I, E)
ZU4320SBR (I, E)	ZU4420SBR (I, E)

Accessory Kit No.	Fits on Reservoir
	
ZRC-04	1.2 and 1.8 gallon ¹⁾
ZRC-04H	1.2 and 1.8 gallon ²⁾
ZRB-20	5.2 gallon
ZRB-40	10.3 gallon

¹⁾ Without heat exchanger ²⁾ With heat exchanger

Foot Switch (U)

- 10 ft. cord, hands-free control

Popular Pump Models with Factory Installed Foot Switch
ZU4108DBU (I, E)
ZU4208SBU (I, E)
ZU4220SBU (I, E)
ZU4320SBU (I, E)
ZU4408SBU (I, E)
ZU4420SBU (I, E)

Accessory Kit No.	Can be used on ZU4 Pumps with solenoid dump and 3-position valves, LCD electric
	
ZCF-2	Solenoid VE-Series valves

Heat Exchanger (H)

- Removes heat from bypass oil
- Increases oil life, reduces wear on hydraulic components

Popular Pump Models with Factory Installed Heat Exchanger
ZU4108DBH (I, E)
ZU4208SBH (I, E)
ZU4308SBH (I, E)
ZU4408SBH (I, E)
ZU4420SBH (I, E)

Accessory Kit No.	Can be used on
	
ZHE-U115	115V pumps
ZHE-U230	230V pumps

Pressure Transducer (T)

- More durable than analog gauges
- Displays psi, bar or Mpa
- Motor shutoff or shift to neutral at set pressure

Popular Pump Models with Factory Installed Pressure Transducer, Requires LCD Electric Pump
ZU4108DBT (I, E)
ZU4208SBT (I, E)
ZU4308SBT (I, E)
ZU4408SBT (I, E)
ZU4420SBT (I, E)

Accessory Kit No.	Adjustable Pressure Range (psi)	Switch-Point Repeatability	Dead-band (psi)
			
ZPT-U4	50-10,000	± 0.5%	50

Level/Temperature Switch (L)

- Shuts off pump when high operating temperature or low oil is reached
- Plugs directly into pump electrical enclosure
- Easy installation to pump reservoir
- Requires LCD electric

Model Number	Operating Temperature (° F)	Maximum Pressure (psi)	Wt. (lbs)
ZLS-U4	40-230	150	0.11

Return Line Filter (F)

- 25 micron filter removes contaminants from return oil flow
- Internal by-pass valve prevents damage if filter is dirty
- Features maintenance indicator

Accessory Kit Model Number	Maximum Pressure (psi)	Maximum Oil Flow (GPM)	By-pass Setting (psi)
ZPF	200	12.0	25

Skidbar (K)

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces
- Cannot be used in combination with roll cage

Accessory Kit No.	For ZU-Series Pumps with 1.2 and 1.8 Gallon Reservoir	Wt. (lbs)
SBZ-4	1.2-1.8 gal. w/o heat exchanger	4.9
SBZ-4L	1.2-1.8 gal. with heat exchanger	5.5

Gauge (G)

- Minimize risk of overloading to ensure long life of equipment
- 2.5" face diameter, glycerin filled
- Dual Scale, PSI and Bar

Model No.	Description
G2536L	15,000 psi, Ø 2.5 inches

ZU Series

Reservoir Capacity:

1.2 - 10.3 gallon

Flow at Rated Pressure:

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 psi

Heat Exchanger

- Stabilizes oil temperature at a maximum of 130° F at 70° F ambient temperature.

Not suitable for water-glycol or water based fluid.

Thermal Transfer *	Maximum pressure	Maximum oil flow	Voltage
Btu/h	(psi)	(GPM)	(VDC)
900	300	7.0	12

* At GPM at 70 °F ambient temperature.

▼ Shown from left to right: ZE3304MBK, ZE4110DBFHR

Z Tough.
Dependable.
Innovative.
CLASS

- Features **Z-Class** high-efficiency pump design; higher oil flow and by-pass pressure, cooler running and requires 18% less current draw than comparable pumps
- Totally enclosed, fan-cooled industrial electric motors supply extended life and stand up to harsh industrial environments
- Low-voltage pendant, on certain models, provides additional safety for the operator
- Multiple valve and reservoir configurations provide application specific models to match the most demanding industrial applications
- High-strength, molded electrical enclosure protects electronics, power supplies and LCD readout from harsh industrial environments
- LCD readout on electric valve models provides a number of diagnostic and readout capabilities
- IP54 Rating for superior dust and water protection

ZE Series

Reservoir Capacity:

1.2 - 10.3 gallon

Flow at Rated Pressure:

40 - 200 in³/min

Motor Size:

1.0 - 7.5 hp

Maximum Operating Pressure:

10,000 psi

The Standard for Industrial Applications

Assisted Return Pumps with Venturi Valve Technology

To improve productivity and plunger retraction, Enerpac offers valve configurations

designed to accelerate your cylinder retraction speeds, ZE-Series pumps feature Venturi Valve Technology to facilitate the faster return of single-acting gravity return cylinders. See valve type in ordering matrix and details in the "Directional Control Valve" section.

Page: 141

User Adjustable Relief Valve

All VM and VE-Series have a user adjustable relief valve to allow the operator to easily set the optimum working pressure.

Locking Valves

For applications requiring positive load holding, VM-Series valves (except VM32) are available with a

pilot-operated check valve. This provides hydraulic locking of the load until the valve is shifted into the retract position. To order this feature on your ZE-series pump see the valve type in the order matrix.

ZE-Series, Specifications and Dimensions

ZE3 and ZE4 Oil Flow and Current vs. Pressure

ZE5 and ZE6 Oil Flow and Current vs. Pressure

▼ PERFORMANCE CHART

Pump Series	Operation	Output Flow Rate (in³/min)				Available Reservoir Sizes (gal)	Motor Size		Relief Valve Adjustment Range (psi)	Sound Level (dBA)
		100 psi	700 psi	5,000 psi	10,000 psi		hp	RPM		
ZE3	Single-stage	43	43	42	40	1.2, 1.8, 2.6, 5.2, 10.3	1.0	1750	1000-10,000	75
	Two-stage	450	385	42	40					
ZE4	Single-stage	64	64	62	60	1.2, 1.8, 2.6, 5.2, 10.3	1.5	1750	1000-10,000	75
	Two-stage	650	600	62	60					
ZE5	Single-stage	128	126	123	120	2.6, 5.2, 10.3	3.0	1750	1000-10,000	75
	Two-stage	850	825	123	120					
ZE6	Single-stage	220	215	210	200	2.6, 5.2, 10.3	7.5	3450	1000-10,000	80
	Two-stage	900	890	210	200					

Output flow rate is listed at 60 Hz. Flow rate will be approximately $\frac{5}{6}$ of these values at 50 Hz.

ZE-Series Pumps with 1.2 and 1.8 gallon reservoir

ZE-Series Pumps with 2.6, 5.2, 10.3 gallon reservoir

- ① User-adjustable relief valve on all manual and solenoid valves:
3/8" NPTF on A and B ports
1/4" NPTF on auxiliary ports
- ② Electric Box
- ③ Heat Exchanger
- ④ Roll Bar
- ⑤ Return Line Filter
- ⑥ Skid Bar
- ⑦ Oil Drain
- ⑧ Oil Level/Temperature Switch

Reservoir Capacity (gal)	ZE-Series Pump Dimensions (in)						
	A	B	C	D	D1	E	H
1.2	5.6	11.0	6.0	-	-	-	20.2
1.8	5.6	11.0	8.1	-	-	-	20.2
2.6	6.2	16.5	12.0	15.1	14.6	11.0	23.6
5.2	7.1	16.5	16.6	19.7	19.2	15.6	24.6
10.3	10.6	15.7	19.9	22.7	22.5	18.9	28.1

▼ STEP 1: Select a Pump from the Pump Ordering Matrix.

The functionality of the pump can be determined by the model number. Utilize the guide below to select the best pump for the application from the pump matrix.

Z	E	4	4	20	M	B	-	F	H
1	2	3	4	5	6	7		8	
Product Type	Motor Type	Flow Group	Valve Type	Reservoir Capacity	Valve Operation	Voltage		Factory Installed Accessories	

1 Product Type

Z = Pump Class

2 Motor Type

E = Induction Electric Motor

3 Flow Group

- 3** = 40 in³/min @ 10,000 psi
- 4** = 60 in³/min @ 10,000 psi
- 5** = 120 in³/min @ 10,000 psi
- 6** = 200 in³/min @ 10,000 psi

4 Valve Types

- 0** = No valve w/cover plate
- 1** = Dump (VE32D)
- 2** = 3-way/2-position manual (VM32)
- 3** = 3-way/3-position manual or electric (VM33 or VE33)
- 4** = 4-way/3-position manual or electric (VM43 or VE43)
- 6** = 3-way/3-position locking manual w/po check (VM33L)
- 7** = 3-way/2-position manual (VM22)
- 8** = 4-way/3-position locking manual w/po check (VM43L)
- 10** = 3-way/3-position manual, Venturi-Valve (VM33VAC) ⁶⁾
- 11** = 3-way/3-position electric, Venturi-Valve (VE33VAC) ⁶⁾

5 Reservoir Capacity

- 04** = 1.2 gallon
- 08** = 1.8 gallon
- 10** = 2.6 gallon
- 20** = 5.2 gallon
- 40** = 10.3 gallon

6 Valve Operation

- D** = Dump valve (w/ pendant and LCD)
- L** = Manual valve (w/o pendant, w/ LCD)
- M** = Manual valve ³⁾ (w/o pendant or LCD)
- N** = No valve ³⁾ (no electrical box)
- S** = Solenoid valve (w/ pendant and LCD)

7 Voltage

Single Phase

- B** = 115V 1 ph 50-60Hz ¹⁾
- E** = 208-240V 1 ph 50-60 Hz European Plug
- I** = 208-240V 1 ph 50-60 Hz USA Plug

Three Phase ³⁾

- G** = 208-240V 3ph 50-60Hz
- J** = 460-480V 3ph 50-60Hz
- W** = 380-415V 3ph 50-60Hz

▼ STEP 2: Factory Installed Accessories

Select factory installed accessories and add to the pump model number after the hyphen. The example above shows that a Return Line Filter (**F**) and Heat Exchanger (**H**) have been added to the pump.

8 Factory installed accessories include the following:

- | | |
|--------------------------------------------------------|---------------------------------------------------------|
| F = Filter | N = No reservoir handles (includes lifting eyes) |
| G = 0-15,000 psi gauge (2 1/2") ⁴⁾ | R = Roll cage |
| H = Heat exchanger ²⁾ | S = Single stage ⁵⁾ |
| K = Skid bar (1.2 and 1.8 gal. reservoirs only) | T = Pressure transducer ^{2) 4)} |
| L = Level/temp switch ²⁾ | U = Foot switch ²⁾ |

¹⁾ 115-volt pumps are supplied with 15-amp plug for intermittent use. 20-amp circuit recommended for frequent full pressure use.

²⁾ These accessories require LCD electrical package. Pressure switch option only available on manual valves without locking valve. The LCD electrical package can accept either a pressure switch or pressure transducer, but not both.

³⁾ Standard Electric models with 3-phase motors are shipped without cord, motor starter or overload protection.

⁴⁾ Pressure gauge not available on pump models with pressure transducer. Pressure transducer provides digital pressure readout on LCD display.

⁵⁾ Not available on Valve Types 10, 11

⁶⁾ Not available on ZE3

▼ ZE-SERIES PUMP MODELS

No Valve with coverplate, no electric box

Manual Valve without electric box or LCD

- Ideal choice for most applications
- Manual valve control, for both single-acting or double-acting applications
- Venturi Valve Technology (VM33VAC) for faster retract of single-acting cylinders
- Manual motor control
- On/off switch on 1-phase electric motor

Solenoid Dump Valve with electric box and LCD

- Ideal for punching, crimping and cutting
- For use when load holding is not required
- Push-button control pendant with 10-ft. cord controls the valve and motor

Solenoid 3-position Valve with Electric Box

- Ideal for production and lifting applications
- All valves are 3-position for Advance-Hold-Retract
- Venturi Valve Technology (VM33VAC) for faster retract of single-acting cylinders
- Push-button control pendant with 10-ft. cord controls the valve and motor

1) S/A = Single acting / D/A = Double acting

2) See Valve Section for technical information.

3) "B" suffix model numbers shown are 115 VAC, 1-phase, 50/60 Hz

Other voltages available as shown. Replace "B" voltage suffix with selected voltage character. Model number order example: ZE4108DI is 208-240V, 1 phase, 50/60 Hz.

See Ordering Guide page for voltage descriptions

Note: Voltage options K (440V, 3-phase, 50/60Hz) and R (575V, 3-phase, 60 Hz) are available on select models. Contact your local representative for availability.

Note: Valve Operation L available on Manual Pumps. Substitute "L" for "M" Valve Operation

Electric Box ¹⁾

- Back-lit LCD
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Pressure read-out ²⁾
- Auto-mode pressure setting ²⁾
- Information can be displayed in six languages ³⁾

¹⁾ Included on pumps with solenoid valves

²⁾ When used with pressure transducer

³⁾ English, French, German, Italian, Spanish and Portuguese

Level/Temperature Switch ⁴⁾

- Shuts down pump before oil level reaches an unsafe level, avoiding damage due to cavitation
- Shuts down pump when unsafe oil temperature is reached
- Ideal if pump is used in remote area without visual access to oil level

⁴⁾ 24V, requires Electric Box. Available for 2.6, 5.2 and 10.3 gallon reservoirs

Accessory Kit Model Number	Fixed Temperature Signal (° F)	Operating Temperature (° F)	Max. Pressure (psi)
ZLS-U4	75	40 - 230	150

Return Line Filter

- 25 micron nominal filter removes contaminants from return oil flow before allowing it back into tank
- Internal by-pass valve prevents damage if filter is dirty
- With maintenance indicator
- Replaceable filter element PF25

Accessory Kit Model Number	Maximum Pressure (psi)	Maximum Oil Flow (GPM)	By-pass Setting (psi)
ZPF	200	12.0	25

Roll Cage

- For easy portability
- Protects pump and electric box
- Available for all reservoir sizes

Accessory Kit Number	Fits on Reservoir
ZRC-04	1.2 and 1.8 gallon ¹⁾
ZRC0-4H	1.2 and 1.8 gallon ²⁾
ZRB-10	2.6 gallon
ZRB-20	5.2 gallon
ZRB-40	10.3 gallon

¹⁾ Without heat exchanger

²⁾ With heat exchanger

Skid Bar

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces

Accessory Kit Number	For ZE-Series Pumps with Reservoir	Wt. (lbs)
SBZ-4	1.2 & 1.8 gal. w/o heat exchanger	4.9
SBZ-4L	1.2 & 1.8 gal. with heat exchanger	5.5

Foot Switch ⁵⁾

- Hands-free remote control on solenoid dump and 3-position valves
- With 10-foot cord

⁵⁾ 15V, requires Electric Box

Accessory Kit Number	Can be used on ZE-Series Pumps with
ZCF-2	Solenoid VE-Series valves

Pressure Transducer ¹⁾

- Displays pressure on LCD in bar, MPa or psi
- More accurate than analog gauge
- Calibration can be fine-tuned for certification
- Easy-viewing variable rate display
- “Set pressure” feature turns off motor at user defined pressure (or shifts valve to neutral on models with VE33/ VE43 valves)

¹⁾ 24V, requires Electric Box

Accessory Kit Model number	Adjustable Pressure Range (psi)	Switch-point Repeat-ability	Dead-band (psi)
ZPT-U4	50-10,000	± 0.5%	50

Pressure Switch ^{2) 3) 4)}

- Controls pump, monitors system
- Adjustable pressure 500-10,000 psi
- Includes glycerin filled, 15,000 psi pressure gauge, G2536L
- Accuracy ± 1.5% of full scale

²⁾ 24V, requires Electric Box. Not available in combination with pressure transducer.

³⁾ Not available on LCD electronics

⁴⁾ Only available on locking valves without pressure transducer

Accessory Kit Model number	Switch-point Repeat-ability	Deadband (psi)	Oil Ports (NPT)
ZPS-E3	± 2%	115-550	3/8"

Heat Exchanger ⁵⁾

- Removes heat from bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life, and reduces wear of pump and other hydraulic components

⁵⁾ 24V DC, requires electric box

Accessory Kit Model number	Fits on Reservoir	Weight (lbs)
ZHE-E04	1.2 and 1.8 gallon	9.0
ZHE-E10	2.6, 5.2 and 10.3 gallon	9.0

ZE Series

Reservoir Capacity:

1.2 - 10.3 gallon

Flow at Rated Pressure:

40 - 200 in³/min

Motor Size:

1.0 - 7.5 hp

Maximum Operating Pressure:

10,000 psi

ZPT-U4 Pressure Transducer

More durable against mechanical and hydraulic shock than analog gauges.

- Digital pressure read-out provides accuracy of 5% of full scale.
- Easy-viewing variable rate display automatically varies increments between 44, 203, 508 and 2103 psi as rate of pressure change increases.
- “Set pressure” feature turns off motor at user defined pressure (or shifts valve to neutral on VE33 and VE43 valves).

ZHE-Series Heat Exchangers

Heat exchanger stabilizes oil temperature at 130° F at 70° F ambient temperature. Thermal transfer at 5 GPM and 70° F ambient temperature: 900 Btu/hour.

Do not exceed maximum oil flow of 7.0 GPM and maximum pressure of 300 psi. Not suitable for water-glycol or high water based fluids.

▼ Shown: PEM8418

- Panel-mounted pressure gauge and adjustable relief valve for system pressure control
- Two-speed pump design, with high by-pass pressure, for rapid cylinder advance
- Dual-voltage motor (230/460 VAC, 3-phase, 60 Hz)
- Full length reservoir sight tube with integral thermometer for ease in monitoring oil level and temperature
- Low voltage controls to protect the pump operator

The Largest Pump for the Largest Jobs

Locking Valves

Pumps with VM4 manual valves are available with VM4L manual valves for positive load holding. Add suffix "L" to pump model number.

Page: 140

FS34 Foot Control Switch

This 3-position switch allows hands-free control of the solenoid valve on the pump. Operates 24V and

115V valves that use the square electrical connector.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 148

◀ With similar specifications, a gasoline-powered EGM8000 Series is shown here performing a synchronized lift.

8000-Series Electric Pumps

About the 8000 Series

The 8000 Series is the largest pump in the Enerpac line and the best choice to power most large size cylinders, multiple cylinder circuits, and applications where the need for high speed requires high flow rates.

The 8000 Series, with its large reservoir capacity, is best suited for large jobs and may be the only solution because of the required oil capacity.

For further application assistance see our "Yellow Pages", or consult your local Enerpac office.

PEM PER Series

Reservoir Capacity:

25 gallon

Flow at Rated Pressure:

2.0 gal/min.

Motor Size:

12.5 hp

Maximum Operating Pressure:

10,000 psi

Dimensions shown in inches.

Speed Chart

To determine how an 8000-Series pump will operate your cylinder, see the Pump/Cylinder Speed Chart in the "Yellow Pages".

▼ Shown left to right: PAMG1402N, PATG1102N, PARG1102N, PATG1105N

Compact Air Over Hydraulic

- High efficiency cast aluminum air motor for increased life and reduced air consumption
- Fully serviceable air motor assembly
- Reinforced heavy-duty reservoir for applications in tough environments
- New generation air-saver piston with rugged one-piece design reduces air consumption and operating costs
- Return-to-tank port for use in remote valve applications
- Quiet – only 76 dBA with low air consumption of 12 scfm
- Operating air pressure: 40-125 psi, enables pump to start at extremely low pressure
- Internal pressure-relief valve provides overload protection
- Mounting Bracket Kit (MTB1) available to mount pumps to horizontal or vertical surfaces

RFL102 Regulator-Filter-Lubricator

Recommended for use with all air pumps. Provides clean, lubricated air and allows

for air pressure adjustment. Steel bowl guards are standard.

Order model number ¹⁾

RFL102

Large Reservoir Models

The Turbo II Air Pump is also available with a larger reservoir: **PATG1105N**, **PAMG1405N**, and **PARG1105N**.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Control and Ergonomics

- Higher oil flow for increased productivity
- Variable oil flow and fine metering for precise control
- Ergonomic design for less operator fatigue
- Closed hydraulic system prevents contamination and allows pump usage in any position
- Pedal lock function for retract position
- External adjustable pressure setting valve
- **ATEX Certified.*** Includes ground screw for explosion protection

* See explanation of ATEX Certification in "Yellow Pages".

▼ Easily operated by foot. No need to fully lift up foot - rest body weight on heel, resulting in a hands-free and stable working position.

Optional Pressure Gauge

Integrated gauge with calibrated scale reading in psi, bar and MPa for actual pressure reading.

Optional 4-Way 3-Position Valve

For powering double-acting hydraulic cylinders and tools.

Optional 1/2 Gallon Reservoir

Double oil capacity for powering larger hydraulic cylinders and tools.

"Joy-stick" Lever Kit

Customer installed set of handles for manual operation of both pedals.

Order model number ¹⁾

XLK1

Hydraulic Swivel Connector

Customer installed swivel connector for optimal orientation of the hydraulic hose.

Order model number ¹⁾

XSC1

¹⁾ Accessories must be ordered separately.

Air Driven Hydraulic Pumps

PRODUCTION APPLICATION

XA11 pump is used with a 13-ton hollow cylinder to compress and position diesel engine valve springs.

The operator benefits from the fine metering capabilities to apply the mandatory precise stroke and force.

XA Series

Reservoir Capacity:

61 - 122 in³

Flow at Rated Pressure:

B = Briggs & Stratton gasoline engine

F = Return Line Filter

G = 15,000 psi gauge

N = No reservoir handles (includes lifting eyes; 2.5, 5, 10 gallon only)

R = Roll bars

Ordering Example

Model Number: **ZG5420MXFR**

This is a 10,000 psi hydraulic pump, with a 4/3 manual valve, 2.6 gallon reservoir, with a 7.1 ft-lbs Honda gasoline engine pump, return-line filter and roll bar.

① User-adjustable relief valve on all manual valves. 3/8" NPTF on A and B ports; 1/4" NPTF on auxiliary ports.

② Roll Bar (optional)

③ Return Line Filter (optional)

④ Oil Level Gauge

⑤ Oil Drain

ZG5 Series

Reservoir Capacity:

2.6 - 5.2 - 10.3 gallon

Flow at Rated Pressure:

100 in³/min.

Engine Size:

7.1 and 8.5 Ft.lbs

Maximum Operating Pressure:

10,000 psi

High-Pressure Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: **148**

ZG6-Series 17.0 Ft-lb Pump

The ZG6 pump has a 200 in³/min. oil flow at 10,000 psi, Briggs & Stratton 4-cycle gasoline engine with electric start and 12 volt charge output for accessories.

Page: **130**

OIL FLOW vs. PRESSURE

▼ Shown: ZG6440MXBCFH

ZG6 Series

Reservoir Capacity:

10.3 gallon

Flow at Rated Pressure:

200 in³/min.

Engine Size:

17.0 Ft.lbs

Sound Level:

88 - 93 dBA

Maximum Operating Pressure:

10,000 psi

- **Features Z-Class high-efficiency pump design:**
 - higher oil flow and bypass pressure
 - patented balanced rotating pump components to reduce vibration
 - replaceable piston check valves that increase service life of pump components
- **Two-speed operation reduces cycle time for improved productivity**
- **Full-sight oil level glass on all reservoirs allow quick and easy oil level monitoring**
- **Sturdy wheeled cart allows transport over uneven terrain and features collapsible handles**
- **Dual forced-air heat exchangers stabilizes hydraulic oil temperature**
- **Roll cage for easy portability and hoisting, protects pump**
- **Briggs & Stratton 17 ft.lbs engine with electric start, pressurized oil and 16-amp charge output for accessories**

Other Options Available

The ZG5/ZG6 pumps are available in a wide range of configurations and options.

Contact Enerpac for further information.

User Adjustable Relief Valve

All VM-Series directional valves have a user adjustable relief valve to allow the operator to easily set the optimum working pressure.

Used with Cylinder	Usable Oil Capacity (gal)	Valve Model Number	Valve Function	Model Number	Motor Manufacturer*	Motor Size (Ft.lbs)	Weight (lbs)

Multiple Outlets with Equal Flow for Lifting and Lowering

Typical Split-Flow Pump Applications

For lifting and lowering applications on multiple points, Split-Flow Pumps are a far better alternative than using independently operated pumps. Where synchronization of maximum 4% is acceptable, Split-Flow Pumps are a safe and economical solution.

The SFP-Series pumps feature both single and synchronized multiple outlet control either through joystick or pendant operation.

Application examples:

- Bridge deck lifting for bearing maintenance
- Stage lifting in construction and shipbuilding
- Skidding to move structures and buildings
- Levelling of constructions like wind turbines

- 2, 4, 6 or 8 split-flow outlets
- Individual or simultaneously operation of valves, with advance/hold/retract function
- Joystick (manual) controlled or pendant (solenoid) controlled valves
- Flow per outlet ranging from 20 to 305 in³/min at 10,000 psi
- For double- and single-acting cylinders
- Adjustable pressure relief valve per circuit
- Reservoir: 5, 10 or 40 gallons
- All models include pressure gauges

▼ Step-by-step stage lifting an old windmill using double-acting RR506 cylinders powered by a Split-Flow Pump.

Remote Control Pendant

Split-Flow Pumps with solenoid valves include a remote pendant with selector switches for each individual outlet, allowing single or multiple cylinder operation.

Hoses and Couplers

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac System Components.

* 115V-1 ph, 60 Hz

Motor Voltage

Motor voltage is specified by the last letter in the model number.

Other motor voltages are available from Enerpac. Change "J" in the model as follows for other options:

J = 460-480V, 3 ph, 50-60 Hz
G = 208-240V, 3 ph, 50-60 Hz
W = 380-415V, 3 ph, 50-60 Hz

▼ SFP-Series Split-Flow Pump Kit Components

Connecting Split-Flow Pumps for more lift points and greater accuracy

- **Control multiple Split-Flow Pumps with one control unit**
- **Pumps can be closer to the lifting points, requiring shorter hoses and increasing accuracy**
- **Synchronize all lift points to within 0.04 inch (1.0 mm)**
- **Network control boxes expand the number of lifting points by combining up to four split-flow pumps together, simplifying lifting operations by using a single operator station**
- **Plug and play synchronous lift upgrade kits limit initial investment and provide everyday flexibility to tailor the controls to the applications needs**

Split Flow Pumps Kits

SFP Series kits are customized from standard components to meet the needs of your unique applications. On the next page is the guide to help you choose the right components to upgrade or expand your equipment based on your application needs. Contact your regional Enerpac representative / territory manager for support with your specific project.

Split-Flow Pump Network Kits

Split-Flow Pump Network Kits connect multiple Split-Flow Pumps under one control system.

Split-Flow Pump Synchro Kits

Split-Flow Pump Synchro Kits connect and electronically synchronize each lift point of a single Split-Flow Pump or multiple Split-Flow Pumps under one control system.

Junction Box

SFPKSS4 and SFPKSS8

junction boxes consolidate the signals from pressure and stroke sensors, allowing the master control box to synchronize the lifting operation.

SFPKMN, Master Control Box

All SFP-Series Synchro Kits include a master control box to allow the operator to easily monitor and control a multi-point synchronized lift and adjust individual lift points as needed. All master control boxes feature an industrial grade touch screen and a user-friendly interface.

EVO-SC-25, Stroke Sensor Cable, 82 feet

Can be connected together for additional length. Ordered separately, requires one for each stroke sensor.

EVO-WSS, Wire Stroke Sensors

Provides stroke feedback to controls. Includes magnets for mounting. Ordered separately,

requires one sensor for each lifting point. Available in measuring range from 3.9 to 49.2 in.

Model Number	Range (in)	Model Number	Range (in)
EVO-WSS-100	3.9	EVO-WSS-750	29.5
EVO-WSS-125	4.9	EVO-WSS-1000	39.4
EVO-WSS-375	14.8	EVO-WSS-1250	49.2
EVO-WSS-500	19.7	-	-

Communication Cables

EVO-COMM-Series communication cables transfer information about the synchronized lift operation

from the master control panel to each of the connected split-flow pumps.

Model Number	Length (ft)	Model Number	Length (ft)
EVO-COMM-25	82	EVO-COMM-75	246
EVO-COMM-50	164	EVO-COMM-100	328

Upgrading Split-Flow Pumps

To network multiple SFP-pumps together with standard function see drawing and table ①.

To upgrade a single SFP-pump to synchronous lift capability, see drawing and table ②.

To upgrade and network multiple SFP-pumps together with synchronous lift capabilities, see drawing and table ③.

SFP Series

Multiple Pumps in Network System:

▼ EVO8 (shown with 4 cylinders and stroke sensors, (sold separately))

- **Modular lifting pumps to control 4, 8 or 12 lifting points**
- **Can be connected to single- or double-acting cylinders with the same or different lifting capacities**
- **PLC-controlled system with integrated 10,000 psi hydraulic power unit and 66-gallon reservoir**
- **Network capability to link up to 4 EVO units (HPUs) to a separate EVO master-control box via wireless control**
- **Intuitive user interface providing easy set up, control and navigation**
- **Data storage and recording capabilities**
- **Variable frequency drive motor (VFD) and PLC for precise synchronization and oil flow control**

▼ Shown: 3600-ton tunnel boring machine lowered and tilted into its starting position with the EVO-Series Synchronous Lifting System.

The Multi-Functional Synchronous Lifting System

EVO-System Work Modes

The application possibilities are infinite with the standard EVO-System, powering interlinked hydraulic cylinders – single or double-acting, push or pull, stage lift, hollow plunger or lock nut cylinders. The EVO-System has 9 work modes. The operator can navigate to any of these menus:

1. Manual
2. Pre-Load
3. Automatic
4. Retract Fast
5. Depressurize
6. Tilting
7. Stage Lift
8. Weighing *
9. Center of Gravity determination *

* Available in the **EVO-W-models**.

Typical Synchronous Lifting Applications

- Bridge lifting and repositioning
- Bridge launching
- Bridge maintenance
- Incremental launching and box jacking
- Lifting and lowering of heavy equipment
- Lifting, lowering, levelling and weighing of heavy structures and buildings
- Structural and pile testing
- Lifting and weighing of oil platforms
- Foundation levelling of onshore and offshore wind turbines
- De-propping/load transfer from temporary steel work
- Foundation shoring

Synchronous Lifting Systems

Benefits of the EVO-Series System

Precise control of multiple lift points

- Comprehensive understanding and management of a lifting operation from a central control system improves safety and operational productivity
- Programmable synchronized lifting
- Automatic stop at pre-set cylinder stroke or load limit

Safe and efficient movement of loads

- System secured with warning and stop features to realize optimal safety

High accuracy

- Variable frequency drive (VFD) and PLC for precise synchronization and control of oil flow, stroke and speed
- Depending the cylinder capacities used, an accuracy of 0.040 inches between lifting points is achieved

Ease of operation

- User friendly interface: visual screens, icons, symbols and color coding

- A single operator controls the entire operation

Monitoring and Data Recording

- Displays data of the operation.
- Data recording at user-defined intervals
- Data storage and read-out for reporting

Network capability

- Ethernet IP protocol for communication between hydraulic power units, allow easy “plug and play”

EVOW Weighing System

Weighing applications with 1% accuracy

- Includes calibrated sensors and auto-calibration of external load cells
- Center of gravity determination functionality
- Parameters for “waiting time for stabilization” and “number of cycles”.

Global standardized system

- Enerpac global coverage ensures local support

EVO Series

Number of Lifting Points:

4, 8, 12 (up to 48)

Reservoir Capacity:

66 gallon

Flow at Rated Pressure:

46 - 292 in³/min.

Motor Size:

4 - 10 hp

Maximum Operating Pressure:

10,000 psi

Stroke Sensors and Cables

Optional accessories required for each lifting point and stroke sensor.

¹⁾ Model numbers with suffix **W** are pumps for weighing systems.

²⁾ VFD = Variable Frequency Drive 18-60 Hz.

EVO-Master Control Box

Required to link up to 4 standard EVO-pumps together to achieve a maximum of 48 lifting points. Contact Enerpac for more information.

▼ Precision levelling caisson pier box: 3 EVO-Systems connected with 32 jacks lowered the 1100-ton bascule pier box.

Enerpac offers a wide variety of hydraulic pumps for all your custom needs.

Hydraulic pumps are at the heart of any hydraulic system. Different systems require different flow, pressure and control. Enerpac offers a wide variety of hydraulic pumps from small hand-operated pumps to large gasoline powered pumps. Still many applications require a customized pump to operate

the system. These may include larger reservoir capacity, custom valve configurations or added electrical controls.

Enerpac also specializes in power units and controls used for synchronous lifting/lowering of multiple jacking points.

Directional Control Valves Section Overview

Enerpac hydraulic valves are available in a wide variety of models and configurations.

Whatever your requirements... directional control, flow control, or pressure control... you can be sure that Enerpac has the correct valve to match your application exactly.

Designed and manufactured for safe operation up to 10,000 psi, the range of Enerpac valves allows for direct pump mounting, remote mounting, manual or solenoid actuation, and in-line installation, giving you flexible solutions to control your hydraulic system.

Page: 404

▼ Shown from left to right: VM32, VE33, VM33, VM43L, VE43

- Advance/Retract and Advance/Hold/Retract operation of single-acting and double-acting cylinders
- Manual or solenoid operation
- Pump mounting will retrofit on most Enerpac pumps
- Available “locking” option on VM Series valves for load-holding applications
- Standard “locking” feature on VE Series 3-position valves
- User adjustable relief valves allow the operator to easily set the working pressure

Venturi Valve Technology

- For fast return of single-acting gravity and spring-return cylinders
- Available as manual or solenoid valve on ZU4- and ZE-Series electric pumps
- Retrofit Venturi valve kits for field installation on existing ZU4- and ZE-Series electric pumps

Adjustable Relief Valve

All valves feature several gauge ports for “system”, A port and B port pressure monitoring.

User-adjustable relief valves are included on all models to allow the operator to easily set the optimum working pressure for each application. VM33 and VE43 valves include “System Check” feature, for more precise pressure holding and improved system control. The VM33 has

improved porting which provides faster cylinder retraction while motor is running.

Locking Valves

For applications that require positive load holding, VM-Series valves (except VM22 and VM32) are available with a pilot-operated check valve. This option provides hydraulic locking of the load until the valve is shifted into the retract position.

Remote Manual Directional Control Valves

VE33, VE43

VE33-115
VE43-115

▼ Shown top to bottom: **VEC15600D**, **VEK15000B**, **VEC15000B**

- **Ideal for independent control of multiple cylinders or functions**
- **Relief valve and pilot-operated check accessory valves are stackable between manifold and valve body**
- **Remote and pump mounting**

Valve Flow Path	Used with Cylinder	Valve Code	Hydraulic Symbol
4-Way, 3-Position (4/3) Open Center	Double-acting	A	
4-Way, 3-Position (4/3) Closed Center	Double-acting	B	
4-Way, 3-Position (4/3) Tandem Center	Double-acting	C	
4-Way, 3-Position (4/3) Float Center	Double-acting	D	
4-Way, 2-Position (4/2) Crossover Offset	Double-acting	E	
3-Way, 3-Position (3/3) Tandem Center	Single-acting	F	
3-Way, 3-Position (3/3) Closed Center	Single-acting	G	
2-Way, 2-Position (2/2) Normally Closed	System Un-loading	H*	
2-Way, 2-Position (2/2) Normally Open		K*	
4-Way, 2-Position (4/2) Float Offset	Double-acting	M	
3-Way, 2-Position (3/2) Normally Open	Single-acting	P	

* Requires use of tank port for dump or unloading.

Unmatched Combinations and Possibilities

3-Way Check Valve

Use a **VS51** 3-way pilot operated check valve assembly to convert your 3-way modular valve into a load-holding valve.

4-Way Check Valve

Use a **VS61** 4-way pilot operated check valve assembly to convert your 4-way modular valve into a load-holding valve.

System Pressure Control

To add system pressure control to your modular valve, order **VS11 Relief Valve** assembly.

Bolt Kits for Accessory Valves With No Manifold

Order Bolt Kit **BK2** when adding one of the accessory valves. Order Bolt Kit **BK3**

when adding any combination of two accessory valves.

How to order one of the 1,300 possible model numbers?

With over 1,300 possible model numbers, Enerpac has the perfect valve for you. Use the "chart" to build your own valve for the specific application you require. This is the complete guide to all the Modular valves that are available.

VE-Series Solenoid Operated Valves Ordering Matrix

CUSTOM BUILD YOUR MODULAR VALVES

▼ This is how a Modular Valve Model Number is built up:

1	2	3	4	5	6
Solenoid Operated Valve	Valve Flow Path	Flow Capacity	Voltage	Accessory Valves	Manifold

1 Product Type

VE = Solenoid Operated Valve

2 Valve Code

A = 4/3 Open Center
B = 4/3 Closed Center
C = 4/3 Tandem Center
D = 4/3 Float Center
E = 4/2 Crossover Offset
F = 3/3 Tandem Center
G = 3/3 Closed Center
H = 2/2 Normally Closed
K = 2/2 Normally Open
M = 4/2 Float Offset
P = 3/2 Normally Open

3 Flow Capacity

1 = 4 gallons per minute

4 Voltage

1 = 24 VDC
2 = 220/240 V, 1 ph, 50 Hz
5 = 115 V, 1 ph, 60 Hz

5 Accessory Valves

000 = No accessory valves
100 = Relief Valve only
150 = Relief Valve and 3-way pilot operated check valve
Only for VEF/VEG
160 = Relief Valve and 4-way pilot operated check valve
Only for VEA/VEB/VEC/VED
500 = 3-way pilot operated check valve
Only for VEF/VEG
600 = 4-way pilot operated check valve
Only for VEA/VEB/VEC/VED

6 Manifold

A = No manifold**
B = Remote Mounted
D = Pump Mounted*

* Only for valve code: **VEA/VEC/VEF**

** Must order Bolt Kit separately.

Example: VEA15600-D

VEA15600-D is a Modular Valve with a 4-way, 3-position open center flowpath, 115 VAC, and an integral pilot-operated check valve, for mounting on an Enerpac pump.

VE Series

Flow Capacity:

4 gal/min.

Maximum Operating Pressure:

10,000 psi

Pressure Drop versus Oil Flow

Modular Valve Pump Mounted ¹⁾ add 1.85 inch for each Accessory Valve

Modular Valve Remote Mount Manifold

Maximum Operating Pressure (psi)	Amperage Draw			Seal Material	Valve Plug
	24 VDC	115 VAC 60 Hz	230 V 60 Hz		
0 - 10,000	N/A Inrush	3.6 A Inrush	1.8 A Inrush	Buna-N, Polyurethane	DIN 43650
	2.5 A Holding	1.0 A Holding	0.5 A Holding		

All the additional components you need to complete your high pressure hydraulic system. Engineered to work with your Enerpac cylinders, pumps and tools. All Enerpac components are designed and manufactured to the most exacting standards.

With this complete line of hydraulic hoses, couplers, fittings, manifolds, oil and gauges Enerpac has the accessories to compliment your system and ensure the efficient operation, long life, and safety of your hydraulic equipment.

Yellow Pages

For sample system set-ups and how to correctly specify your system components, please view the Enerpac **Yellow Pages**.

Emphasize Safety and Quality

To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

WARNING !

- Do not exceed 10,000 psi maximum pressure.
- Do not handle hoses while under pressure.

More safety instructions in our "Yellow Pages".

Page: 400

Vinyl strain relief guard on both ends of hose to improve life and durability on all models.

Thermo-plastic Hoses (700-Series)

- For demanding applications, featuring a 4:1 design factor
- Maximum working pressure of 10,000 psi
- Two layers of steel wire braids
- Outside jacket is polyurethane, to provide maximum abrasion resistance
- Exhibits low volumetric expansion under pressure to enhance overall system efficiency

Heavy-duty Rubber Hoses (900-Series)

- The most complete offering: 35 models up to 50 feet in length
- Rubber coated with two layers of steel wire braids
- Designed to comply with Material Handling Institute IJ100 hose specification
- Flexible, with little "memory", is the best choice for long hose runs

◀ To prevent back pressure and to increase cylinder retraction speed, when using long hoses, the Enerpac HC7300 range of hoses with increased internal diameter is the best choice.

High Pressure Hydraulic Hoses

Hose Oil Capacity

When using long hose lengths, it is sometimes necessary to fill the pump reservoir after filling the hoses. To determine the hose oil capacity, use the following:

For 0.25" internal diameter hoses:
Capacity (in³) = .5892 x Length (ft)

For 0.38" internal diameter hoses:
Capacity (in³) = 1.3608 x Length (ft)

H700 H900 Series

Inside Diameter:

0.25 and 0.38 inch

Length:

2 - 50 feet

Maximum Operating Pressure:

10,000 psi

3/8" High Flow Couplers

- Standard equipment on most Enerpac cylinders
- Recommended for use on all Enerpac pumps and cylinders where space and porting permits
- Include "2-in-1" dust cap for use on male and female coupler halves

3/8" High Flow "Flush-face" Couplers

- Featuring "Push-to-connect" operation, to guarantee good connection every time
- Flush-face, zero-leak operation for minimal spillage
- HTMA* recognized for safety and performance

3/8" Regular Spee-D-Coupler®

- For medium-duty applications; for use with hand pumps
- Includes female steel dust cap

1/4" Regular Coupler

- For use with small cylinders and hand pumps
- Includes female steel dust cap

1/4" Spin-on Torque Wrench Couplers

- For use with 10,000 psi S- and W-Series torque wrenches, THQ-Series hoses and 10,000 psi torque wrench pumps

1/4" Lock-Ring Torque Wrench Couplers

- For use with 11,600 psi HXD and SQD-Series torque wrenches, THC-Series hoses and 11,600 psi torque wrench pumps

* Hydraulic Tool Manufacturers Association

Quick Connection of Hydraulic Lines

Thread Sealer

To seal NPTF threads use one of the new anaerobic thread sealers or Teflon® paste.

When using Teflon® tape, apply the tape one thread back from the end of a fitting to prevent it from entering the hydraulic system.

WARNING!

Couplers should be pressurized only when completely connected, and should not be coupled or uncoupled when pressurized.

More safety instructions in our "Yellow Pages".

Page: 400

S- and W-Series Torque Wrench Couplers

S- and W-Series Torque Wrenches require 1/4" spin-on couplers and THQ hoses.

Page: 239

▼ With the use of Enerpac High Flow Couplers, hoses are easily installed for multiple hydraulic line connections in this 34 points PLC-controlled lifting system.

Hydraulic Couplers

CT604 Safety Tool

Use the Enerpac CT604 to relieve hydraulic back pressure by safely bleeding the hydraulic coupler. Minimize injuries from projectile parts and under-skin hydraulic fluid injections by

eliminating unsafe coupler bleeding practices. The CT604 is Enerpac-engineering safe for use at 10,000 psi (700 bar).

NOTE: C-Series only.

▼ Shown from left to right: **SFM41, SFM42 Split-Flow Manifolds**

Improved safety on basic simultaneous lifting applications

Pressure Gauges G2535L

Glycerin filled pressure gauges are installed in each outlet pressure line to monitor the pressure of each cylinder.

Page: 162

Optimum Performance

Minimum pump oil flow must be 50 in³/min to deliver 9.1 in³/min per cylinder.

Enerpac recommends to use Z-Class electric, air driven or gasoline pumps from the ZU4, ZE4, ZE5, ZA4 and ZG-Series.

SFP-Series, Split-Flow Pumps

When a higher accuracy is required across cylinder strokes in a multi-point

lifting or lowering application Enerpac recommends using the SFP-Series Split-Flow Pumps.

Page: 132

Contact Enerpac!

Contact the Enerpac office nearest to you for advice and technical assistance in the layout of your ideal Lifting System or visit us at: www.enerpac.com. Or ask Enerpac for assistance: enerpac.com/contact-us

- **Split-Flow Manifolds improve safety, precision and control in lifting and lowering operations**
- **Pressure gauge, flow control valve in each outlet port; CR400 couplers installed in each inlet and outlet port**
- **Regulates both advance and retract speeds: lifting and lowering**
- **1 inlet, 4 outlets. Maximum of 4 cylinders per manifold: SFM41 for single-acting cylinders, SFM42 for double-acting cylinders**
- **Minimum pump oil flow: 50 in³/min to deliver 9.1 in³/min per cylinder**
- **Maximum difference among outlets: 10% of the stroke**
- **More cylinders can be controlled simultaneously by connecting several SFM-models parallel**

◀ To repair the foundation, silos needed to be lifted, levelled and structurally supported. Powered by a ZE5-Series electric pump the split-flow manifold used to operate multiple hydraulic cylinders.

Split-Flow Manifolds

The SFM-Series offer an economical solution for basic multi-point simultaneous lifting applications and enables a single operator to control a maximum of 4 lifting points from one manifold.

The Split-Flow Manifolds are equipped with pressure compensated flow control valves, to preset and limit advance and retract speed of each cylinder, allowing to move up to 4 cylinders simultaneously.

The SFM-Series provide more lifting and lowering control compared to AM-Series Control Manifolds. See flow control valve adjustments table below.

Minimum pump oil flow must be 50 in³/min (ZE4-Series pumps) to deliver 9.1 in³/min per cylinder. Several SFM-models can be connected parallel to the same pump to allow simultaneous operation of 8, 12 or 16 cylinders.

Higher flow pumps are required to achieve faster advance speeds. A 20% higher oil flow must be considered for a proper speed compensation.

Example : when using 4 cylinders: if oil flow of 28 in³/min is required per cylinder, the pump oil flow must be: $4 \times 28 = 112 + 20\% = 134 \text{ in}^3/\text{min}$.

The maximum stroke deviation between the cylinders can reach up to 10% depending on the cylinder pressure.

Oil flow adjustment is also possible during cylinder operation by fine tuning using the flow control valves.

All cylinders connected to the SFM-manifold must have the same capacity (effective area). Both advance and retract speed are limited by the same valves. Use hoses of the same lengths to improve the accuracy of the hydraulic system. Improved precision when difference of pressures among the cylinders is within 4350 psi.

SFM Series

Inlet Connection:

1x Power Pump

Outlet Connections:

Max. 4 Cylinders

Minimum Pump Flow Required:

50 in³/min.

Maximum Operating Pressure:

10,000 psi

Load Holding

Use **V66 Check Valves** for load holding applications with single-acting cylinders.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses. Enerpac recommends using hoses of the same lengths between the SFM and cylinders to improve system accuracy.

SFM42

▼ SPLIT-FLOW MANIFOLDS

For use with Cylinders	Model Number	Minimum Oil Flow to each Cylinder (in ³ /min)	Female Couplers Included	Dimensions L x W x H (in)	Wt. (lbs)
4x single-acting	SFM41	9.1	CR400	14.6 x 13.2 x 14.8	53
4x double-acting	SFM42	9.1	CR400	14.6 x 13.2 x 14.8	66

Flow Control Valves

The Split-Flow Manifold has pressure compensated flow control valves installed in each outlet line. The oil flow from the SFM-Manifold to each cylinder can be adjusted by turning the knob on the valve.

Flow Control Valve Adjustments			
Number of Knob Turns	Oil Flow (in ³ /min)	Number of Knob Turns	Oil Flow (in ³ /min)
1/2	9.1	3	115.9
1	27.4	3 1/2	219.6
1 1/2	45.8	4	341.6
2	54.9	4 1/2	506.3
2 1/2	79.3	Open	628.3

▼ Shown: GF230P, GF835P, GP10S

- GF-Series gauges are calibrated with dual scale reading for pressure and force
- Excellent readability; 4-inch diameter gauge face
- Fast, easy installation
- GF-Series gauges are glycerin filled
- Stainless steel gauge cases for corrosion resistance
- GP-Series gauges are calibrated with dual scale reading for psi and bar

▼ A GP10S gauge is used on this press to check the hydraulic pressure required to bend a steel plate.

Visual References for System Pressure and Force

Auto-Damper Valve V10

For automatic control of gauge fluctuations, the **V10** Auto-Damper Valve controls the movement of the gauge needle by restricting oil flow in and out of the gauge. No adjustments needed.

Page: 164

Snubber Valve V91

Infinitely adjustable for metering oil out of a gauge. The **V91** Snubber Valve is also suitable as a shut-off valve to protect the gauge during high cycle applications.

Hydraulic Force and Pressure Gauges

Load Gauges

To measure external load supported by a cylinder or jack. For pressing parts together under pre-determined loads, weighing, testing, etc.

Pressure Gauges

To measure the input pressure into cylinders, jacks or high pressure systems. Also for all testing applications.

GP-Series gauges are dry gauges.
GF-Series gauges are glycerin filled.

Force Gauges

To measure external load supported by a cylinder or jack in tons. For pressing parts together under pre-determined loads, weighing, testing, etc.

GF GP Series

Pressure Range:

0 - 15,000 psi

Face Diameter:

4 inches

Accuracy, % of full scale:

± 1%

All Models

Maximum Indicator Pointer

Indicator retains peak readings of pressure or force generated by the system.

Order model number:
H4000G.

Can easily be installed on GP-Series dry gauges.

Glycerin Filled (G-Series)

- Calibrated in dual scale reading in psi and bar
- All pressure sensing parts sealed and dampened by glycerin for long life
- Includes safety blow-out disk and pressure equalizing membrane
- Gauge snubbers or needle valves recommended for high-cycle applications

High-Cycle Dry Gauges (H-Series)

- Calibrated in dual scale reading in psi and bar
- Ideal for use in many applications, specifically for high cycle and harsh environments
- Gauge snubbers or needle valves recommended to shut off gauge when not in use

◀ When lifting or pressing, always use a gauge. A gauge is your "window" to the system—it lets you see what's going on.

Hydraulic Pressure Gauges

CAUTION! When lifting or pressing, always use a gauge.

Do not override factory setting of relief valves. Always use a gauge to check system pressure. A gauge is your "window" to the system. It lets you see what's going on.

See our Safety Instructions.

Your Hydraulic Control Solution

Valve Applications

To see these valves used in typical hydraulic circuits, please see our "Yellow Pages".

Page: 410

▼ The V152 Pressure Relief Valve limits the pressure or force developed in the hydraulic system.

- All valves are rated for 10,000 psi operating pressure
- All valves feature NPTF porting to insure against leakage at rated pressure
- All valves are painted, coated, or plated for corrosion resistance
- Viton® seals (in V66NV and V152NV) for high temperature applications, nickel-plated for maximum corrosion resistance

Valve Dimensions in inches.

Flow and Pressure Control Valves

Premounted Manifold

For two or four port manifold with integral flow control valves, see the manifold page of the System Components section.

Page: 152

Fittings

For additional fittings see the fitting page of the System Components section.

Page: 153

V Series

Maximum Operating Pressure:

10,000 psi

Valve Type and Model Number		Description		Hydraulic Symbol
Needle Valve V82 V182F V8F		V82: To control cylinder speed. Can also be used as shut-off valve for temporary load holding. $\frac{3}{8}$ " NPTF female ports. V182: Same as V82, but with	$\frac{1}{4}$ " NPTF female ports. Also suitable for gauge snubbing. V8F: Similar to V82, but with very fine metering for precise flow control. Not recommended as shut-off valve.	
Snubber Valve V91		V91: Adjustable for metering oil out of a gauge to prevent snapping of gauge pointer when load or pressure is suddenly released. Also suitable as shut-off valve to protect	the gauge during high cycling applications. $\frac{1}{2}$ " NPTF male and female threads for use with GA1, GA2 or GA4 gauge adaptors.	
Auto Damper® Valve V10		V10: To be used when gauge pressure must be monitored during high cycle applications. Creates a flow resistance when load is released suddenly.	No adjustments are necessary. $\frac{1}{2}$ " NPTF male and female threads for use with GA1, GA2 or GA4 gauge adaptors.	
Check Valve V17		V17: Ruggedly built to resist shock and operate with low pressure drop. Closes smoothly without pounding. $\frac{3}{8}$ " NPTF female ports.		
Pilot Operated Check Valve V42		V42: Can be mounted at the cylinder to hold the load in case of system pressure loss. Normally used with double-acting cylinders where pilot port receives pressure	from a Tee-fitting in the cylinder retract line. $\frac{3}{8}$ " NPTF female ports. Pilot pressure ratio 14% (6.5:1).	
Manually Operated Check Valve V66, V66NV* V66F		V66, V66NV: For load holding applications with single- and double-acting cylinders. Valves allow oil to flow back to tank when cylinder retracts. V66NV with Viton seals, nickel-plated.	V66F: Similar to V66, but with very fine metering capability for precise flow control. V66F not designed for load holding applications.	
Pressure Relief Valve V152 V152NV*		V152: Limits pressure developed by the pump in hydraulic circuit, thus limiting the force created by other components. Valve opens whenever preset pressure is reached.	To increase pressure setting, turn handle clockwise. Includes: • 3 ft return line hose kit • $\pm 3\%$ repeatability • 800-10,000 psi adjustment range.	
Sequence/Pressure Differential Valve V161		V161: To control oil flow to a secondary circuit. Flow is blocked until system pressure rises to the V161 setting. When this pressure level is reached, the V161 opens to	allow flow to the secondary circuit. A pressure differential is always maintained between the primary and secondary circuit. Min. operating pressure: 2000 psi.	

* See page 64 for more information about products for use in high temperature and extreme environment applications.

Enerpac Hydraulic Presses are available in a wide variety of standard capacities and configurations, or you can “build your own” with the easy-to-use matrix.

The press frames are a welded construction for maximum strength and durability, and when combined with the power of high-pressure hydraulics, will provide years of safe and dependable service in your workshop.

Enerpac press capacities range from 10 ton to 200 ton and are available in Bench, C-Frame, Arbor, H-Frame and Roll-Frame models.

These press features increase productivity and broaden the range of applications:

Standard on many Enerpac IP Presses, the exclusive Hydra-Lift™ offers effortless adjustment to the press daylight by use of a hydraulic lift.

Easy horizontal cylinder position is achieved with the unique “roller-head” cylinder mounting block, standard on most Enerpac IP Presses.

Optional “V-blocks” for positioning of complex parts are designed with high-strength steel for long life.

Available in capacities from 10 to 200 ton, each Enerpac press consists of three basic high-quality components: a press frame, a power source and a cylinder.

Press Frame

Press frames include features like horizontally adjustable cylinders and vertically adjustable bolsters for ease of use and optimal positioning of the workpiece.

Power Source

Depending on the production requirements, Enerpac presses can be powered by manual, air hydraulic and electric pumps.

Cylinder

Depending on the application, double-acting cylinders offer increased efficiency. Check out the Selection Charts for the press best suited for your needs.

Gauge

All Workshop presses and Roll-Frame Presses feature an easy to monitor pressure/force gauge for increased safety.

▼ Press shown: IPE5060

- Quality welded frame for maximum strength and long life
- Exclusive “Hydra-Lift™” bed for effortless adjustment of the vertical daylight (10-ton models are manual)
- Roller head design is standard to allow movement and locking of the cylinder from side to side (10 ton, 25 ton and 30 ton are manual)
- All models in the Quick Selection Chart have been matched to a pump, cylinder, hoses and gauge, offering the complete package

◀ An Enerpac H-Frame press quickly removes the shaft from this assembly.

Setting the Industry Standard

Cylinder Mounting Block

Allows cylinder mounting into a press frame, while also allowing side to side adjustment of cylinder position.

Page: 176

Hydra-Lift™

Allows easy, effortless daylight adjustment. Standard on most H-Frame presses.

Page: 176

Pump Mounting Bracket

Heavy-duty steel brackets allow mounting of one of the Enerpac Power Sources to power your press.

Page: 176

Gauge Included

All standard press models include a gauge and gauge adaptor, matching the press capacity.

Page: 171

V-Blocks

These optional V-Blocks are designed for easy fixturing of round stock and other non-uniform materials. Featuring precise fit into the press bolster.

Page: 176

Ordering Variations

Any variations to a listed part number must be ordered as two separate items. For example, if you need a different voltage electric pump, please order from the modular matrix on page 177 and the electric pump from the modular matrix on page 115 (electric) or page 127 (air).

Any questions should be directed to our Technical Service Department.

IP Series

Capacity:

10 - 200 tons

Maximum Daylight and Width:

54.50 & 48.00 inches

Maximum Operating Pressure:

10,000 psi

H-Frame Press Gauges

All standard press models include a gauge and gauge adaptor, matching the press capacity:

Press Capacity	Gauge Model Number	Adaptor Model Number
(tons)		
10	GF10P	GA2
25	GF20P	GA2
30	GF835P	GA3
50	GF50P	GA2
100	GF871P	GA3
150	GF200P	GA3
200	GF200P	GA3

For more information on gauges, please refer to the System Components section.

Page: 147

Ordering Variations

Any variations to a listed part number must be ordered as two separate items. For example, if you need a different voltage electric pump, please order from the modular matrix on page 177 and the electric pump from the modular matrix on page 115 (electric) or page 127 (air).

Any questions should be directed to our Technical Service Department.

The One and Only

Cylinder Mounting Block

Allows cylinder mounting into a press frame, while also allowing side to side adjustment of cylinder position.

Page: 176

Pump Mounting Bracket

Heavy-duty steel brackets to allow conversion to one of the Enerpac Power Sources to power your press.

Page: 176

Hydra-Lift™

Allows easy, effortless daylight adjustment.

Page: 176

Optional V-Blocks

These V-Blocks, 200 ton only, are designed for easy fixturing of round stock and other non-uniform materials. Featuring precise fit into the press bolster.

Page: 176

- Quality welded frame for maximum strength and long life
- Frame rolls easily on four steel roller bearings
- Hydraulic clamp cylinders lock frame into position
- Exclusive “Hydra-Lift™” bolster for effortless adjustment of the vertical daylight
- Standard roller head design allows movement of the cylinder from side to side
- All models in the Quick Selection Chart have been matched to a pump, cylinder, hoses and gauge, offering the complete package
- Roll Frame design features a stationary bed with the ability to support heavy loads

▼ Shown from left to right: **A220** and **A330**

The Standard In Workshop Tools

Push Pin A183

For applications requiring precision pressing, such as shaft removal and insertion. This attachment fits 10 ton cylinders and requires the use of a threaded adaptor saddle (A13).

Smooth Saddle A185

For pressing applications of delicate parts, such as aluminum castings, this saddle decreases surface marks during the pressing application. Requires 10-ton cylinder and threaded adaptor saddle (A13).

C-Clamp Press

- 5, 10 and 20 ton capacity
- Operational in all positions

Arbor Press

- Foot mounting holes for horizontal or vertical positioning
- Machined work surfaces for easier fixturing
- Slotted back to simplify loading and unloading of longer parts

▼ **A310 Arbor Press**

Press Type	Press Capacity	Maximum Vertical Daylight	Maximum Bed Width	Cylinder Series Number*	Press Model Number	Weight

	20	11.88	3.75	**	A220**	83

* Requires RC cylinder listed, see page 7 for specifications.

** Requires RC25 ton cylinder, limited to 20 tons.

C-Clamp and Arbor Presses

▲ RC-308 cylinder mounted in A-330 Arbor Press powered by a PATG-Turbo Air pump for controlled pressing of bearings for sprockets of weaving machines. The V-152 Pressure Relief Valve controls the pressing force.

A Series

Capacity:
5 - 30 ton

Maximum Daylight and Width:
11.88 and 7.00 inches

Mounting Capabilities:
Fixed or Portable

Maximum Operating Pressure:
10,000 psi

For high-cycle production applications, C-Clamp and Arbor presses should be limited in their capacity. Consult Enerpac Technical Services for specific application details.

Hydraulic Cylinders

Cylinders for C-Clamps and Arbor Presses must be ordered separately.

Page: 6

Hydraulic Pumps

Pumps for C-Clamps and Arbor Presses must be ordered separately.

Page: 85

Cylinder Speed

This chart will help you calculate the time required for an Enerpac cylinder to extend when powered by a 10,000 psi Enerpac hydraulic pump. The Cylinder Speed Chart can also be used to determine the pump type and model best suited for an application when you know the plunger speed required.

100	No load	137	30	21	3	6.2	8.3	2.8	1.9	1.5	10.30	24.80	1.90	1.50
	Load	137	137	137	71	61.9	61.9	31.0	20.7	10.3	82.50	154.70	137.50	41.30

Note: Values are approximate. Cylinder speed may vary in actual application.

CUSTOM BUILD YOUR OWN PRESS

If the press that would best fit your application cannot be found in the charts, you can easily build your custom press here. All presses must be ordered with cylinders. The pump is ordered separately.

▼ This is how a press model number is built up:

1 Product Type

IP= Industrial Press

2 Frame Type

H = H-Frame
R = Roll Frame ¹⁾

3 Press Capacity

010 = 10 ton
025 = 25 ton
030 = 30 ton
050 = 50 ton
100 = 100 ton
150 = 150 ton
200 = 200 ton

4 Cylinder Type

S = Single-Acting
(RC-Series)
D = Double-Acting
(RR-Series)

5 Cylinder Stroke (in)

- 10 ton S/A: 06, 08, 10, 12, 14
10 ton D/A: 10, 12
- 25 ton S/A: 06, 10, 12, 14
- 30 ton S/A: 08
30 ton D/A: 08, 14
- 50 ton S/A: 06, 13
50 ton D/A: 06, 13, 20
- 100 ton S/A: 06, 10
100 ton D/A: 06, 13, 18
- 150 ton D/A: 06, 13, 32
- 200 ton D/A: 13, 18, 24

6 Pump Mounting Kit ²⁾

0 = No mounting kit
1 = Hand operated and small air pumps:
P80, P84, P141, P142, P202,
P391, P392, PA133
and all Turbo II Air pumps
2 = Electric, large hand operated and
modular air pumps:
PUJ12, PEM12, ZE36 Series
P462, P464
PAM10 and -90 Series

¹⁾ Roll Frame Press: 50-, 100- and 200-ton press capacity only. (Assembly required)

²⁾ Includes hoses for press, except for option 0.

Ordering Example

Model number: IPH050S06-2

IPH050S06-2 is a 50-ton H-Frame press with a single-acting, 6-inch stroke cylinder (RC506). It has a pump mounting kit (for an electric Pump or a Modular Air Pump).

See the cylinder and pump selection chart on previous page for selecting the proper pump.

IP Series

Capacity:

10 - 200 tons

Maximum Daylight and Width:

54.50 & 48.00 inches

Maximum Operating Pressure:

10,000 psi

“No Load” indicates the plunger speed as it extends toward the load (1st stage).

“Load” indicates the plunger speed as the load is applied at a system pressure of 10,000 psi (2nd stage).

Formula $V = A \div Q$

V (sec/in) = A (in²) \div Q (in³/min)

V = Cylinder plunger speed in seconds per inch

A = Cylinder effective area in square inches (in²)

Q = Pump oil flow in cubic inches (in³)

Cylinder Plunger Speed (sec/in)	=	Cylinder Effective Area (in ²) Pump Flow Rate (in ³ /min)	x	$\frac{60 \text{ sec}}{1}$
---------------------------------	---	-------------------------------------------------------------------------------------	---	----------------------------

No workshop can do without one

XA-Series Foot Pump

The XLP-Press with XA-Series Air Powered Foot Pump: no need to fully lift up foot – rest bodyweight on heel, resulting in a handsfree and stable working position – safe and controlled press operation.

Press Kits

The 50 and 75-ton presses come standard as unassembled kits, and include complete press frame, winch, cylinder, pump with gauge, couplers and hose.

Easy Grip Forklift Access

Cut-away in lower frame for pallet truck access allows easy transportation of 50 and 75-ton XLP-Series Presses.

Side-To-Side Cylinder Movement

Cylinder can be positioned horizontally side-to-side on all XLP-Series presses.

VLP-Series Bench Presses

- Compact design mounts conveniently on bench top
- Operational in vertical or horizontal position

XLP-Series Presses

- Easy height adjustment with integrated winch mechanism
- Horizontal cylinder adjustment enables flexible load placement
- Multiple pump options including pneumatic foot-controlled pumps with integrated gauges for optimal control and variable oil flow
- 50 and 75-ton units provided in kit form

Bringing Value to the Workshop

The VLP- and XLP-Series Presses provide a simple and economical solution for standard workshop applications.

The 10-ton VLP comes standard with an RC cylinder and a hand or air pump. Compact and versatile, it's the ideal solution for pressing smaller workpieces from the comfort of a workbench.

The similarly equipped 25-ton XLP features a sturdy welded H-frame, an adjustable bolster and a horizontally adjustable cylinder.

The 50- and 75-ton XLP Presses offer an exceptional value with features including adjustable lower and upper bolsters, horizontally

adjustable cylinders, single- and double acting cylinders*, and multiple pump options. These presses come standard as unassembled kits which include the frame, winch, cylinder, pump, gauge, couplers and hose.

For premium performance in more demanding applications, Enerpac also offers the IP Press Series, which features heavy duty welded frames and a broad range of cylinder and pump options. Contact Enerpac for additional information.

*On select models

VLP, XLP Series

Capacity:

10 - 75 tons

Maximum Daylight and Width:

47.68 & 38.98 inches

Maximum Operating Pressure:

10,000 psi

IMPORTANT!

Workshop press frames are designed exclusively for pressing operations, not for pulling. For pulling applications please contact Enerpac.

Optional V-Blocks for VLP and XLP Presses

Place upright to facilitate the positioning of pipes and bars, or upside down to serve as a convenient work table. Each model number includes two V-blocks.

▼ Shown: **LH102** and **TM5** (in middle)

TM, LH Series

Capacity:

2,000 to 200,000 lbs.

Accuracy, % of full scale:

± 2%

TM and LH models are 100% tested to verify accuracy within a $\pm 2\%$ range.

If your application requires a calibrated tool, it must be submitted for certification testing.

Certification is NOT available from Enerpac.

Tension Meter TM5

- Accuracy, $\pm 2\%$ of full scale
- Zinc and bronze plated to resist rust and corrosion
- Dual-range readout in kilograms and pounds
- Cushioned metal case provides safe storage and transport
- Maximum indicating pointer reading for pre-selected forces or to maintain maximum force readings

TM5

Load Cells LH Series

- Accuracy, $\pm 2\%$ of full scale
- Swivel loading pad reduces eccentric loading for improved accuracy
- Maximum indicating pointer reading for pre-selected forces or to maintain maximum force readings
- Dual-range readout in kilograms and pounds

With decades of experience and in-house capabilities look to Enerpac to help find solutions to your customization needs.

Next to our large range of standard workshop presses, Enerpac offers the possibility of customization. Because many customers have specific requirements, we offer turn-key project management, including design, engineering and manufacturing. As the market leader, we listen to our customers and with our world

wide experience we offer the best solutions, especially when safety is not negotiable. Whether a longer stroke, wider frame or complete new design is required, our custom product group has many years of experience in multiple industries to deliver a solution that meets or exceeds expectations.

◀ *Fully Automated PLC-Controlled 1800-Ton, High-Accuracy Press*

◀ *50-Ton Workshop Press for Maintenance Jobs*

◀ *100-Ton Press for Assembly of Spring-Loaded Cylinders*

OVERVIEW

▲ *Enerpac's hydraulic presses can be configured to fulfill a broad range of applications. Each press is designed and manufactured according to customer specifications and in cooperation with our engineering team.*

CUSTOMIZABLE FEATURES:

- Capacity
- Cylinder Stroke
- Pump Type
- Controls
- Guarding
- Daylight Dimensions

CONFIGURATIONS

- Vertical and horizontal press
- Cylinders mounted in upper and lower bolsters
- Height built to customer specifications
- Daylight (vertical and horizontal) built to customer specifications

Enerpac offers a complete line of pullers with the widest range of sizes, capacities and styles. Whether your application requires mechanical or hydraulic force, Enerpac can satisfy your requirements.

Made of high strength steel alloys, you can depend on Enerpac pullers to provide years of trouble-free operation, even in the harshest environments.

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying. Damage to parts is minimized through the use of controlled hydraulic power.

Lock-Grip Pullers

The puller's self-centering closing system allows all jaws to move simultaneously, making it easy for a single operator to mount the puller and to perform the application.

CAUTION!

Not all puller components and configurations are rated at the set capacity. Please contact Enerpac for specific details.

Always wear Safety Goggles and Gloves while using pullers.

When selecting a puller it is important to consider three basic specifications:

1. Capacity:

The amount of force the puller is capable of producing.

Typically, the capacity required for a job can be determined by using the shaft diameter of the part being pulled.

For manual pullers, the center bolt diameter of the puller should be at least half the diameter of the shaft being pulled from.

For hydraulic pullers, the capacity in tons should be 7 to 10 times the shaft diameter. Use the following chart:

Shaft Diameter	Puller Capacity
0" to 1"	14 ton
1" to 2"	24 ton
2" to 3.5"	36 ton
3.5" to 5.5"	50 ton

2. Reach:

The distance between the bottom of the base and the jaw flats. The puller's reach must equal or exceed the same distance of the part being pulled.

3. Spread:

The distance between the jaws. The puller's spread needs to be greater than the width of the part being pulled.

Puller Function	Capacity (tons)	Puller Type	Series		Page
	14-50	Master Puller Sets Max. Reach: 27.56 in. Spread Range: 43.30 in.	BHP		184 ▶

Multi-Purpose Puller Set

WARNING

Not all puller components and configurations are rated at the set capacity. Please contact Enerpac for specific details.

- Supplied with a full hydraulic set including pump, hose, cylinder, gauge and gauge adaptor in a storage case
- High quality, forged steel components provide superior reliability and service
- Sets include speed crank and adjusting screw for fast contact to work before hydraulics are applied
- All Master Puller Sets include a Grip Puller, a Cross Bearing Puller, a Bearing Cup Puller and a Bearing Separator which can be ordered separately. See items 10, 20, 30 and 40

▼ Maintenance engineers throughout the industry greatly appreciate Enerpac Master Puller sets.

Bearing Cup Pullers and Bearing Separators

▼ Shown: **BHP180**

Bearing Cup Puller

- Made of high strength steel alloy
- Easily adapted to Cross Bearing Pullers for fast and efficient removal of the most difficult parts
- Adjustable to fit a variety of bearings and seals

BHP Series

Capacity:

7, 12, 18 and 25 tons

Maximum Reach:

4.53 - 5.91 inches

Maximum Spread Range:

5.71 - 9.45 inches

Maximum Operating Pressure:

5000 psi

* Bearing separator rated at 50% of puller capacity.

Bearing Separator

Bearing Separator has wedge shaped edges for placing puller behind hard to reach bearings, gears, etc., where clearance prevents direct application of grip puller arms.

The Bearing Separator should be used with the Cross Bearing Puller.

OVERVIEW

The Enerpac Sync Grip multi-purpose puller range is designed to make your jobs easier and safer to accomplish.

Remove bearings, bushings, gears, sleeves, wheels and flywheels, sprockets and other shaft mounted items simply and effectively.

Mechanical and hydraulic configurations are available with a variety of optional accessories that expand application range and increase utility.

Hydraulic models are available in standard sets which include detachable hydraulic cylinders and a choice of pump options, along with a gauge assembly and hose for safe monitoring of applied pulling forces.

Always wear safety goggles and gloves while using pullers.

WARNING!
Do not exceed 50% of the rated puller capacity when using two jaw configurations.

* Puller can be set up as a 2 or 3 jaw configuration.

** Puller capacity at 7,850 psi, maximum cylinder capacity @ 10,000 psi is 64.6 tons.

*** With standard legs and cylinder for hydraulic models

Sync-Grip Pullers: available in both mechanical or hydraulic versions. Some models can be configured as a two jaw puller, however, three jaws are recommended for most even distribution of pulling forces.

Cross Puller: hydraulically powered via detachable cylinder and choice of pump. The Cross Puller can be used individually as a 'push' puller or in conjunction with the Bearing Separator or Bearing Cup Puller.

Bearing Separator: use where access is restricted. The Bearing Separator is used in conjunction with the Cross Puller.

Bearing Cup Puller: specifically designed for cup style bearing and other applications requiring an internal style puller.

Detachable Hollow Cylinder: provided with all hydraulic puller models including both the standard Sync Grip and Cross Puller.

In Sync Grip, Cross Bearing and Master Puller Sets, a hose and gauge are provided as standard along with your choice of pump; including manual hand operated, cordless battery powered, electric or air powered. In each case the pump selection has been optimized for compatibility with the pullers.

Easy To Use

Simple, Safe, Productive

All three jaws close simultaneously making the puller easier and safer to operate.

The synchronous feature of the SGM and SGH-Series Pullers makes positioning the puller simple and helps prevent misalignment.

SGM Series

Puller Capacity:

1 - 20 tons

Maximum Reach:

4.1 - 23.6 inches

Maximum Spread:

4.3 - 26.8 inches

- Sync Grip mechanism synchronizes movement of all jaws for simultaneous engagement, helping to prevent misalignment for safe and easy use
- Threaded spindle and jaw indexes provide adjustable reach
- Three-jaw configuration for even load distribution
- Two-jaw configuration for confined access applications available on all pullers 10 ton and below (not available on SGM20)
- High-strength forged jaws for superior reliability
- Suitable for a variety of applications including bearings, bushings, wheels, gears and pulleys

Dimensions

Dimensional information for all puller models is included in the dimensional overview table:

LGM-Series, Mechanical Lock-Grip Pullers **ENERPAC**

▼ Shown: 2 and 3-Jaw Mechanical Lock-Grip Pullers

- Quickly and easily mount on a wide range of applications
- Lock-on jaws offer a secure grip for safe and easy operation
- Synchronous jaw movement enables entire pulling job to be performed by a single operator
- Available in 2 and 3-jaw configurations

▼ Lock-Grip Pullers – the simple, safe and cost-effective way to remove shaft-mounted parts.

Mechanical Lock-Grip Pullers

LGM-Series Pullers are an ideal solution for pulling small to medium-size wheels, sprockets, bearings and other similar shaft-mounted parts. The puller's self-centering closing system allows all jaws to move simultaneously, making it easy for a single operator to mount the puller and to perform the application.

Turning the puller handle locks the jaws onto the application, allowing the desired object to be pulled free when the spindle is turned.

LGM Series

Puller Capacity:

3 - 40 tons

Maximum Reach:

4.02 - 13.19 inches

Maximum Spread:

5.20 - 25 inches

IMPORTANT!

Always wear safety goggles and gloves while using pullers.

Point Protector

LGM-Series Pullers **MUST** be used with a point protector if the shaft end does not contain a drilled center hole.

One point protector is included with every puller.

▼ SELECTION CHART

LGH-Series, Hydraulic Lock-Grip Pullers **ENERPAC**

▼ Shown: 2 and 3-Jaw Hydraulic Lock-Grip Pullers

- Quickly and easily mount on a wide range of applications
- Hydraulically applied pulling force increases pulling capacity, reducing operator fatigue
- Lock-on jaws offer a secure grip for safe and easy operation
- Synchronous jaw movement enables entire pulling job to be performed by a single operator
- Available in 2 and 3-jaw configurations with or without a detachable hollow cylinder

Point Protector

LGH-Series Pullers **MUST** be used with a point protector if the shaft end does not contain a drilled center hole.

One point protector is included with every puller.

1. Convenient adjustment handle simplifies positioning of jaws on application and increases speed of operation.
2. Locking mechanism helps prevent jaws from slipping off application during pulling process.
3. Detachable hollow cylinder offers increased pulling capacity compared to mechanical alternatives.
4. Greater spreading width on jaws enables use on thicker objects.
5. Synchronous jaw movement increases ease of use, allowing one operator to mount the tool and perform the pulling application.
6. Point protector helps prevent damage to spindle when pulling against a flat surface.

Hydraulic Lock-Grip Pullers

LGH-Series Pullers provide the same safety and ease of use as their mechanical counterparts, with the pulling force applied by a standard 10,150 psi hydraulic cylinder. LGH-Series Pullers can apply up to 64 tons of force and are perfect for removing larger shaft-mounted objects up to 26 inches in diameter.

Turning the puller handle locks the jaws onto the application, allowing the desired object to be pulled free when the spindle is turned.

LGH Series

Puller Capacity:

10 - 64 tons

Maximum Reach:

8.46 - 16.06 inches

Maximum Spread:

11.81 - 25.98 inches

Maximum Operating Pressure:

10,150 psi

IMPORTANT!

Always wear safety goggles and gloves while using pullers.

Model Numbers Without a Cylinder

To order a puller without cylinder, add "NC" after "LGH".

Example: LGHNC210

Sets Include:^{1) 2)}

Hydraulic Lock-Grip Master Puller Sets **ENERPAC**

Master Puller Set includes a hydraulic puller, cylinder, a pump with hose and gauge for standard pulling applications, as well as a selection of accessories designed for work environments where clearance prevents a direct application of the puller jaws.

Lock-Grip Pullers: All sets come with a hydraulic LGH-Series Puller. Both two jaw and three jaw versions are available.

Detachable Hollow Cylinder: Provided with all hydraulic pullers as well as the Cross Puller.

Pump with Hose and Gauge: Puller Sets and Master Puller Sets are supplied with a hose, gauge, and your choice of a hand, air, electric or cordless pump.

Cross Puller: Hydraulically powered via a detachable hydraulic cylinder and pump. The Cross Puller can be used individually as a 'push' puller, or in conjunction with the Bearing Separator or Bearing Cup Puller.

Bearing-Cup Puller: Specifically designed to pull cup style bearings and other applications requiring an internal style puller.

Bearing Separator (used with Cross Bearing Puller): Features narrow edges, which enable puller to be placed behind hard to reach bearings, gears, etc., where limited clearance prevents the direct application of puller arms.

Hydraulic Lock-Grip Master Puller Sets

▼ Shown: LGHMS Master Puller Set with Hand Pump Option

- All LGHMS-Series Master Puller Sets include an LGH-Series Puller, a Cross Puller, a Bearing Separator, a Bearing Cup Puller, a detachable Hollow Cylinder, a hose, a gauge and a pump
- Set options include hand, air, electric and cordless pumps for an optimal solution to every application

LGHMS Series

Puller Capacity:

10 - 64 tons

Maximum Reach:

8.46 - 16.06 inches

Maximum Spread:

11.81 - 25.98 inches

Maximum Operating Pressure:

10,150 psi

WARNING!

Enerpac cylinders and pumps can be operated to 10,150 psi, but should not be operated past 5,000 psi when using the Cross Bearing Puller Set tools.

Dimensions

Dimensional information for all puller models is included in the dimensional overview table:

Page: 188

Sets Include:^{1) 2)}

¹⁾ Choose pump options below.

²⁾ All sets include hose model number HC7206C.

▼ DIMENSIONAL DATA

For 115 V application add "B" suffix
For 230 V application add "E" suffix

IPM-Series, Internal Mechanical Pullers **ENERPAC**

▼ Shown: **IPM3**

IPM Series

Maximum Reach:

1.77 - 3.11 inches

Spread Range:

0.98 - 3.94 inches

IMPORTANT!

Always wear Safety Goggles and Gloves while using pullers.

- Remove bearings or other shaft-mounted parts where no spindle support is available
- Slide hammer allows for application of safe, high-impact force
- Includes two sets of jaws for internal and external pulling applications

Slide Hammer Dimensions (in)

Posi Lock® 100-Ton Hydraulic Grip Pullers

▼ EPH1003

- Roller cart with power lift
- Adjustable jaw tips
- Puller easily detaches from cart
- Self-contained unit
- Puller height range 26.5" to 66.5"

EPH Series

Capacity:

100 tons

Maximum Reach:

48 inches

Spread Range:

7.5 - 70 inches

Maximum Operating Pressure:

10,000 psi

Pushing Adaptors

All Posi Lock 100 Ton Hydraulic Pullers include (3) pushing adaptors.

Diameter (in)	Overall Length (in)	Model Number
3.5	29	EPHT1162
3.5	19	EPHT1163
3.5	9	EPHT1164

▲ The EPH1002 quickly and easily removes this drive coupler from its shaft.

Number of Jaws	Max. Spread (in)	Capacity (tons)	Model Number	Dimensions (in)							Weight (lbs)

Enerpac offers an extensive range of dedicated tools for a variety of specific and flexible applications. Whatever your requirement... punching, spreading or bending... you can be sure that Enerpac has the correct tool to do your job safely and efficiently.

Featuring maintenance sets, machine lifts and load skates, as well as hole punches pipe benders and cable cutters, Enerpac has the tools to ensure that even your most demanding applications can be undertaken with the highest degree of safety and accuracy.

Pump and Tool Sets

Selected hydraulic tools in this section are available in sets, for a perfect tool/pump match.

Hydraulic System Setup

Check out our "Yellow Pages" section for help on system setups and valving configurations.

Page: 399

Hydraulic, Electric and Manual Cutters

Enerpac Cutters can be found in the Cutter section of this catalog.

The Universal Hydraulic Tool Box

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of accessories matched to hydraulic powered tools. Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs.

Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12.5 tons.

- All sets include Enerpac pump, hose, cylinder and gauge
- Lock-on or threaded connectors
- Complete set for almost every maintenance application

More Information

For detailed information on all included attachments, see the following pages.

Page: 206

Clamping a workpiece is just one of the many applications for the Enerpac maintenance sets. ►

▼ QUICK SELECTION CHART

Capacity using attachments* (tons)	Set Model Number						Number of Attachment Components	Weight (lbs)
2.5	MS24	P142	HC7206	RC55	GP10S	GA4	33	59
2.5	MSFP5**	P142	HC7206	RC55	G2535L	GA3	24	44
5	MSFP10	P392	HC7206	RC106	G2535L	GA3	23	105
5	MS210	P392	HC7206	RC106	GP10S	GA2	35	140
12.5	MS220	P392	HC7206	RC256	GP10S	GA2	13	210
5 - 12.5	MS21020	P392	HC7206	RC102, 106, 256	GP10S	GA2	53	350

* If no attachments are being used, capacity is double these values. Maximum operating pressure is then 10,000 psi.

** This set also includes the FZ1055 Adaptor.

MS-Series, Maintenance Sets

CAUTION!

When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (5,000 psi).

WARNING!

Only use attachments provided with set. Non Enerpac attachments and longer extension tubes will reduce column strength, potentially creating unsafe conditions.

MS Series

Capacity (using attachments):

2.5 - 12.5 tons

Max. Operating Pressure (using attachments):

5,000 psi

▼ APPLICATION EXAMPLES

CAUTION! When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (5,000 psi).

Note: All dimensions in inches.

- 0.50" thick mild steel maximum capacity
- Round, oblong and square punches and dies are available to solve your punching applications
- Long life Enerpac single-acting, spring return design
- Durable case keeps tools and dies together and provides for easy carrying and storage
- CR400 female coupler included

Much Faster than Drilling...

Tool Kit SPK10

Included with all 35-ton punches, this tool kit is used to remove and install the punch into the head.

Can be ordered as a replacement under model number **SPK10**.

Ordering Information

The 35-ton hydraulic punch may be ordered by itself or as a set, including an electric, air or hand pump.

Please refer to the Quick Selection Chart information on next page.

A punch and die may also be ordered as a matched set.

▼ Shown: **SP50100**

- Available as a complete set including electric pump and hoses
- Double-acting cylinder design for fast cycle times
- Punch and die changeover tools included
- Lifting handle for easy carrying
- Adjustable power stripper prevents movement of the metal during stripping
- CR400 female couplers included

Cuts the Time Spent Forming Holes

Depth Stop

For simplified repetitive punching applications an adjustable Depth Stop is available.

Order model number: **SP110**.

Foot Mounting Kit

A foot mounting kit for easy mounting of the 50-ton punch to workbench or fixture is available.

Please order: **SP120**.

Ordering Information

The 50-ton Hydraulic Punch may be ordered by itself or as a set with an electric pump. A punch and die may be ordered as a matched set. Please refer to the selection chart information.

◀ Save time using this 50-ton Enerpac Punch.

▼ Shown below is the 50-ton punch with SP120 and SP110 assembled.

LW Series

Minimum Clearance:

0.39 inches

Maximum Lift Height:

2.02* - 2.72* inches

Maximum Force:

16 tons

Maximum Operating Pressure:

10,000 psi

* Using LWB1

Portable Hydraulic Toolbox

Tool Box set includes hand pump, gauge, adaptor assembly, hose and coupler.

Page: 65

Split-Flow Manifolds

Split Flow Valves to control two or four lifting wedges simultaneously (LW16 only).

AM21 with 3 ports 3/8" NPTF.
AM41 with 5 ports 3/8" NPTF.

Page: 152

- Minimized access gap for greater accessibility on applications with limited insertion space
- Secure, stable lifting and lowering motion with no slippage
- Single-acting spring return cylinder allows for automatic, mechanical retraction
- Integrated hand pump offers greater maneuverability (LWC16 only)
- Includes safety block SB2

Portable Hydraulic Toolbox Set SWR5PGH

Tool box includes P392 hand pump, gauge adaptor assembly, hose and WR5.

▼ The LW-Series is the ideal solution for lifting heavy equipment with minimum floor clearance.

Max. Lifting Force (ton)	Model No.	Minimum Clearance Gap (in)	Max. Lift per Stage (in)	Max. Lifting Height (in)	Max. Lifting Height using Stepped Block (in)	Oil Capacity (in ³)	Wt. (lbs)	Pump Power Source
16	LW16*	0.39	0.83	2.02	2.72	4.75	15.4	External
	LWC16**					—	22.0	Integrated

* Includes SB2

** Includes SB2, LWB1, and carrying case

▼ Shown from left to right: SOH10-6, SOH23-6

- For lifting heavy equipment with minimum available access
- Remote operation of hydraulic pump enhances safety
- Low-height lifting toe
- Precision guided to reduce friction and isolate cylinder from side-loads
- Two extendable support feet provide extra stability
- Includes RC-Series cylinder with CR400 coupler

SOH Series

Lifting Capacity:

8.5 - 20 tons

Stroke:

5.39 - 6.18 inches

Toe Clearance:

0.79 - 1.18 inches

Maximum Operating Pressure:

10,000 psi

ER-Series Load Skates

In combination with the Enerpac Lifting Wedge we recommend Load Skates for moving heavy loads.

Page: 214

RSM Flat-Jac®

Low height, single acting spring-return cylinders are ideal for space restricted applications.

Page: 26

▼ Heavy transport using Load Skates. The machine is first lifted, using SOH-Series Enerpac Machine Lifts.

Capacity (ton)	Toe Clearance with Cylinder Retracted (in)			Stroke (in)	Model Number	Oil Capacity (in³)	Dimensions (in)						Weight (lbs)
	Minimum A1	Central A2	Maximum A3				Total Ext. Height C	Total Body Height D	F	H	J	K	
8.5	0.79	3.74	6.69	5.39	SOH10-6	13.7	17.00	11.61	–	7.48	8.46	2.95	59.2
20	1.18	4.33	7.48	6.18	SOH23-6	32.0	18.58	12.40	2.56	10.24	9.84	3.15	99.2

▼ Shown: **Set ERS20**

Move Heavy Loads Easily and Safely

Sets (see table) include all components necessary to handle a variety of applications. Two **ELB1** link-up bars, two **ERH1** handles (34.4" long) and one **EMB1** metal box are included. Optional long handle **ERH2** (46.4") also available.

- Rugged and sturdy construction for long life
- Low profile construction for increased stability
- Low rolling-resistance allows for easy load movement
- Attachable load leveling plates and swivel turntables for turning corners

Lifting Wedge and Machine Lifts

To place the Load Skates, the load must first be lifted. This can be done easily and safely using Enerpac Lifting Wedge or Machine Lifts.

Page: 212

▼ Heavy transport using Load Skates. The machine is first lifted, using SOH-Series Enerpac Machine Lifts.

▼ Chemical tank transportation: The first inch(s) the load was lifted with an RCS-Series Low Height Cylinder and then moved onto load skates for transportation.

Protect your Equipment

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of accessories matched to hydraulic powered tools. Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs.

Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12.5 tons.

- Protect your equipment from dust, water, grease and dirt
- Reduce losses on the jobsite, maintenance area or shop
- Durable steel, painted with rust-resistant primer and finished in durable enamel
- Heavy-duty hinges and lifting handles
- Lockable

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying.

Damage to parts is minimized through the use of controlled hydraulic power.

▼ When not storing the lifting system, this heavy-duty storage case doubles as a work station.

Quick, Safe and Wrinkle-free Bending

'One Shot' and 'Sweep'

One shot shoes give up to a 90° bend without resetting.

Sweep shoes are used where increased radii are required for multiple parallel pipe installations.

- Makes smooth, wrinkle-free bends
- Sets include cylinder, hose and manual, air or electric pump
- Sets are also available without hydraulics
- Bending shoes and bending frame are lightweight, heat-treated aluminum
- All sets include sturdy steel storage case
- All sets include BZ12091 angle indicator for accurate bending
- BZ12377 Shoe Lock Pin included in every set
- Eject-O-Matic™ benders (STB202 models) use a double-acting cylinder to eject pipe from the bending shoe

▲ Typical one shot bending operation.

When you need to make cuts through heavy-duty bar, chain, cable and similar materials, look no further than Enerpac's broad range of cutters.

An extensive lineup of hydraulic, electric and manual cutters provides a quick, safe and cost-effective solution for technicians from construction, mining, manufacturing and many other industries.

Enerpac's cutters are built to handle industrial-grade materials on a daily basis.

Like all Enerpac tools, each cutter is designed and built to last in tough working conditions for a safer, simpler and more productive workflow.

Cutter Type		Maximum Tool Capability*	Series		Power Source	Page

Your Fast, Safe and Simple Solution for Cutting Metal Bar

Internal Mechanics

EBH-Series: Cylinder is driven by an external Enerpac pump

EBE, EBC-Series: Cylinder is driven by a radial pump powered by an electric motor.

Typical Bar Cutting Applications

- Commercial and residential construction
- Concrete and masonry
- Metal fabrication
- Industrial manufacturing

Productivity

- A broad range of hydraulic and electric tools quickly and easily cut through heavy-duty bar
- Highly durable, long-lasting blades outlast angle grinder or saw blades

Safety

- Controlled cutting process enhances user safety compared with use of cut-off blades
- Minimal spark risk compared to torching, grinding and sawing methods
- Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome)

▼ Enerpac's bar cutters are built to handle tough cutting applications.

EBH-Series Hydraulic Bar Cutters

EBH-Series Hydraulic Bar Cutters

EBH-Series Hydraulic Bar Cutters are driven by a specialized external hydraulic pump for optimal power

and a higher duty cycle compared with other cutter types.

These cutters are ideal for use in production or manufacturing facilities with demanding, high-volume cutting applications.

- ① Highly durable blades maintain effectiveness throughout rigorous use
- ② Safety guard helps protect hands from injury
- ③ Heavy-duty cutting head provides a longer operational life
- ④ Lifting handle enables easier positioning and transport
- ⑤ Double-acting cylinder with advance and retract buttons improves control and reduces jamming
- ⑥ External hydraulic pump helps keep the tool cool, improving operational time (pump, hose, and pump coupler sold separately)

Drawings are for guidance purposes only, exact tool configurations vary by model.

EBH Series

Maximum Material Hardness:

43 HRC

Maximum Material Diameter:

1.18 - 2.04 inches

Maximum Operating Pressure:

10,000 psi

Pumps and Accessories

The EBH-Series Cutters are designed to work with specialized ZE4 and ZE6-Series pumps.

Pump models vary by voltage type. The pump and hose are sold separately. Both are required for the system to function. See page 236 for complete details on required pumps and accessories.

Page: 236

Optional gauges and accessories may be used to monitor pressure in the hydraulic circuit. Enerpac recommends **Gauge Kit GKHC** for use with Enerpac hydraulic cutters.

EBE-Series Electric Bar Cutters

The versatile EBE-Series Electric Bar Cutters

quickly cut through heavy-duty bar up to one inch (26 mm) in diameter without the need for an external hydraulic

pump. Their compact size and low weight enable them to be easily transported and used wherever an external power source is available.

EBE Series

Maximum Material Hardness:

43 HRC

Maximum Material Diameter:

0.87 - 1.02 inches

Voltage*:

120 and 230 Volts

* ETL certification applies to 120V tools only

- ① Highly durable blades maintain effectiveness throughout rigorous use
- ② Safety guard helps protect hands from injury
- ③ Heavy-duty cutting head provides a longer operational life
- ④ Lifting handle enables easy positioning and transport
- ⑤ Piston-release mechanism allows blade to be reset, reducing jamming and providing a controlled cutting process

EBE22

EBE26

Voltage: (Model No. ending with suffix)

B = 120V, 60 Hz (with American-style NEMA 1-15 plug)

E = 230V, 50 Hz (with European-style SCHUKO plug)

EBC-Series Cordless Bar Cutters

EBC-Series Cordless Bar Cutters

The highly portable EBC-Series Cordless Bar Cutters quickly and easily slice through up to number 6 rebar, or similar metal bar up to 0.79" (20mm) in diameter.

A powerful 20V Lithium-ion battery provides mobility and long lasting performance, making these tools the perfect go-to solution for the jobsite, including remote locations, or anywhere an external power source is not available.

- ① Highly durable blades maintain effectiveness throughout rigorous use
- ② Safety guard helps protect hands from injury
- ③ Highly durable cutting head can be rotated 360 degrees to aid in the positioning of the blades on the application.
- ④ Lifting handle enables easy positioning and transport
- ⑤ Piston-release mechanism allows blade to be reset, providing a controlled cutting process and reducing jamming
- ⑥ Powerful 20V battery provides high performance and complete mobility

Dimensions shown in inches.

EBC Series

Maximum Material Hardness:

43 HRC

Maximum Material Diameter:

0.79 inches

* ETL certification applies to 120V tools only

Batteries and Chargers

EBC-Series Cutters come standard with two DeWALT® TM 20V-5Ah Lithium-ion batteries and one DeWALT® TM 12V and 20V charger. Additional batteries and chargers sold separately.

EBC-Series Cutters work with DeWALT® 20V MAX® batteries. DeWALT® is a registered trademark of DEWALT Industrial Tool Co., which has not manufactured, licensed, approved, or endorsed this cutter product.

EBC-Series Replacement Parts

To order replacement parts, use one of the model numbers shown below.

For Cutter Model No.	DeWALT® Lithium-ion Battery	Li-ion Battery Charger 12V and 20V
EBC20B	B205	BC1220B
EBC20E	B185	BC1220E

Charger Voltage: (Model No. ending with suffix)

- B** = 120V, 60 Hz (with American-style NEMA 1-15 plug)
- E** = 230V, 50 Hz (with European-style SCHUKO plug)

Maximum Material Diameter*	Power Specifications			Model Number**	Maximum Material Tensile Strength*	Maximum Material Hardness*	Maximum Cutting Force	Weight (without battery)	Replacement Blade Kit Number

* Maximum material properties indicated refer to the material to be cut.

** To order an EBC-Series Cutter without batteries or a charger, remove the "B" or "E" from the Model Number, e.g. "EBC20"

▼ Shown: **EDCH130**

EDCH Series

Maximum Material Hardness:

41 HRc

Maximum Blade Aperture:

5.12 – 6.69 inches

Maximum Operating Pressure:

10,000 psi

Pumps and Accessories

The EDCH-Series Cutters are designed to work with specialized ZC3, ZE4 and ZE6-Series pumps.

The pump and hose are sold separately. Both are required for the system to function. See page 237 for complete details on required pumps and accessories.

Page: **237**

Optional gauges and accessories may be used to monitor pressure in the hydraulic circuit. Enerpac recommends **Gauge Kit GKHC** for use with Enerpac hydraulic cutters.

Productivity

- **Powerful jaws and an exceptionally large blade aperture enable use on a large variety of applications including metal tubes, communication cables, profiles and similar materials***
- **Multiple pump options provide power, speed and mobility for all your applications**

Safety

- **Minimal spark risk compared with torching, grinding and sawing methods**
- **Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome)**

* NOTE: Do not use to cut wire rope. Use instead the wire and rope cutter, page 232.

- ① Durable blades maintain efficiency throughout rigorous use
- ② Double-acting steel piston and cylinder improve robustness and control
- ③ Control knob immediately stops the tool when released, improving operator safety
- ④ External hydraulic pump helps keep tool cooler and working longer (pump, hose, and pump coupler sold separately)

Maximum Blade Aperture (in)	Model Number	Maximum Material Tensile Strength* (psi)	Maximum Material Hardness* (HRc)	Maximum Hydraulic Operating Pressure (psi)	Dimensions (in)				Weight (lbs)	Replacement Blade Kit Number

* Maximum material properties indicated refer to the material to be cut.

EFB-Series Flat Bar Cutters

▼ Shown: **EFBE5017B**

Productivity

- Cut through high-tensile flat bar in seconds
- Highly durable, long-lasting blades offer increased longevity and less down time

Safety

- Controlled cutting process enhances operator safety
- Minimal spark risk compared with torching, grinding and sawing methods

EFBE
Series

Maximum Material Hardness:

33 HRC

Maximum Material Dimensions:

1.96 x 0.67 – 2.75 x 0.59 in.

Voltage*:

120 and 230 volts

* ETL certification applies to 120V tools only

Replacement Blade Kits

To order replacement parts use one of the model numbers shown below.

For Cutter Model Number	Order Blade Kit Number
EFBE5017B	EFBE501701K
EFBE5017E	EFBE501701K

▼ Shown: ECCE32B-Series Chain Cutter

Your Simple Solution for Cutting High-Strength Industrial Chain

Internal Mechanics

ECCE-Series: Cylinder is driven by a radial pump powered by an electric motor.

Typical Chain Cutting Applications

- Chain manufacturing
- Mining
- Rigging / material handling for transport
- Oil and gas
- Marine

Productivity

- Quickly cut through heavy-duty chain links with minimal effort
- Highly durable blades outlast angle grinder or saw blades

Safety

- Controlled cutting process behind a protective shield enhances safety
- Precisely cut only selected link, helping prevent damage to adjacent links and weakening of chain
- Minimal spark risk compared to torching, grinding and sawing methods
- Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome)

▼ Cut through chain links with ease using Enerpac's chain cutters.

ECCE-Series Electric Chain Cutters

ECCE-Series Electric Chain Cutters

ECCE-Series Electric Chain Cutters are ideal for applications where safety is paramount. Unlike other cutting methods, Enerpac's chain cutters precisely cut selected chain links behind an enclosed, transparent safety guard.

This not only protects the operator's hands, it also helps prevent damage to adjacent links, which often results from using alternative cutting methods like torches or cut-off tools.

- ① Highly durable blades cut through heavy-duty chain, maintaining effectiveness throughout rigorous use
- ② Transparent safety guard protects hands and allows continuous monitoring for better management of cutting process
- ③ Heavy-duty cutting head provides a longer operational life
- ④ Lifting handle and eyebolt enable easy positioning and transport

Voltage: (Model No. ending with suffix)

- B** = 120V, 60 Hz (with American-style NEMA 1-15 plug)
E = 230V, 50 Hz (with European-style SCHUKO plug)

ECCE Series

Maximum Material Hardness:

46 HRc

Maximum Material Diameter:

1.25 inches

Maximum Grade Chain:

100

Voltage*:

120 and 230 volts

* ETL certification applies to 120V tools only

Maximum Material Diameter ^{1) 2)} (in)			Power Specifications				Model Number	Maximum Material Hardness ¹⁾ (HRc)	Maximum Cutting Force (tons)	Dimensions (in)			Cord Length (ft)	Wt. (lbs)	Replacement Blade Kit Number
Grade 70	Grade 80	Grade 100	Volts	Hz	Amps	Watts				A	B	C			
1.00	1.00	0.5	120	60	10.0	1200	ECCE26B	46	35.1	23.6	6.0	9.3	6	55	ECCE2601K
1.00	1.00	0.5	230	50	5.3	1100	ECCE26E	46	35.1	23.6	6.0	9.3	10	55	ECCE2601K
1.25	1.00	0.75	120	60	11.0	1300	ECCE32B	46	52.9	27.5	7.5	12.6	6	106	ECCE3201K
1.25	1.00	0.75	230	50	6.8	1400	ECCE32E	46	52.9	27.5	7.5	12.6	10	106	ECCE3201K

¹⁾ Cutting larger chains or those of a grade higher than those recommended will result in increased wear, and may damage the tool.

²⁾ All links over 1/2" must be cut in two passes, with each pass cutting one side of the link.

▼ Shown left to right: EWCH90 and EWCE55B

The Quick and Clean Way to Cut Cable and Wire Rope

Internal Mechanics

EWCH-Series: Cylinder is driven by an external Enerpac pump.

EWCE-Series: Cylinder is driven by a radial pump powered by an electric motor

Typical Wire and Cable Cutting Applications

- Telecommunications
- Electrical installation and maintenance
- Power generation and transmission
- Shipbuilding

Productivity

- A broad range of hydraulic and electric tools quickly and easily cut through cable and wire rope

Safety

- Controlled cutting process enhances operator safety
- Minimal spark risk compared with torching, grinding and sawing methods
- Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome)

▼ Guillotine-style blades make quick work of electrical cables and wire rope.

EWCH-Series Hydraulic Wire and Cable Cutters

EWCH-Series Hydraulic Wire and Cable Cutters

EWCH-Series Hydraulic Wire and Cable Cutters are ideal for use in production facilities where demanding, high-volume cutting applications are often encountered.

Each tool is driven by a specialized external hydraulic pump, which provides greater cutting force and allows for higher duty cycles compared with other cutter types.

- ① Guillotine-style blades maintain effectiveness throughout rigorous use
- ② Cutting head can be opened and closed to help position material to be cut
- ③ Eyebolt facilitates easy lifting
- ④ Double-acting cylinder with advance and retract buttons improves control and reduces jamming
- ⑤ External hydraulic pump helps keep tool cooler and working longer (pump, hose, and pump coupler sold separately)

EWCE-Series Electric Wire and Cable Cutters

EWCE-Series Electric Wire and Cable Cutters combine the efficiency and safety of their hydraulic counterparts with the greater portability of electric tools.

Their lighter weight allows for easier carrying and positioning. Available in 120V and 230V versions.

- ① Durable, guillotine-style blades maintain effectiveness throughout rigorous use
- ② Cutting head opens wide for easy positioning of wire or cable
- ③ Robust handles enable easy positioning and transport
- ④ Double-acting cylinder with directional control improves handling and reduces jamming

EWCE Series

Maximum Material Hardness:

48 HRc

Maximum Material Diameter:

1.65 - 2.17 inches

Voltage*:

120 and 230 Volts

* ETL certification applies to 120V tools only

▼ Cut through wire and cables with ease.

ECS-Series Cutter / Spreader Combination Tools

▼ Shown: **ECSE300B**

ECSE Series

Maximum Material Hardness:

41 HRc

Maximum Blade Aperture:

11.81 inches

Voltage*:

120 and 230 Volts

* ETL certification applies to 120V tools only

Internal Mechanics

ECSE-Series: Cylinder is driven by a radial pump powered by an electric motor.

Productivity

- Blades easily cut through metal profiles, pipes, rods and other obstructions
- Wedges on tips of blades provide powerful spreading force

Safety

- Controlled cutting process creates minimal spark risk compared with torching, grinding and sawing methods

Dimensions shown in inches.

Voltage: (Model No. ending with suffix)

B = 120V, 60 Hz (with American-style NEMA 1-15 plug)

E = 230V, 50 Hz (with European-style SCHUKO plug)

Typical Cutter / Spreader Applications

- Industrial manufacturing
- Recycling
- Demolition

- ① Highly durable blades grip and cut through metal obstructions with ease
- ② Cutting head can be rotated 180 degrees in each direction for easier access to the application
- ③ Robust handle enables easy positioning and transport
- ④ Double-acting cylinder improves control and reduces jamming
- ⑤ Wedges provide powerful spreading force

* Cuts .50" alloy chain grade 70 (type G7 transport or tie-down) or grade 80 (for overhead lifting applications)

☆ Will not cut designated material

*** Low Alloy

EBH-Series Bar Cutters and EWCH-Series Wire and Cable Cutters are powered by an external pump with an electric valve. A twin hydraulic hose and electric cable connect the tools to the pump, allowing the user to operate them directly from a control panel located on the cutters.

▼ Pumps used with EBH Bar Cutters and EWCH Wire & Cable Cutters

ZE4-Series Pump

Specialized **ZE4-Series** pumps provide a balance of speed and versatility, and are available in 115 and 230 volts. Recommended for use with **EBH30** and **EBH35** cutters when portability, or the convenience of using standard voltage is required.

ZE6-Series Pump

Specialized **ZE6-Series** three-phase pumps offer a high-flow rate that provides fast performance for demanding applications. Recommended for all **EWCH** and **EBH** bar cutting applications where speed is critical, or where higher flow rates are required by the application.

ZE Series

Reservoir Capacity:

1.2 - 2.6 gallon

Motor Size:

1.5 - 7.5 hp

Maximum Operating Pressure:

10,000 psi

Gauges

Optional gauges and accessories may be used to monitor pressure in the hydraulic circuit. Enerpac recommends **Gauge Kit GKHC** for use with Enerpac hydraulic cutters.

Hoses

EBH- and EWCH-Series Cutters require a twin hose with an electric cable. The hose comes equipped with the appropriate couplers.

Required hoses sold separately.

Description	Model No.
20 ft. long, twin hose with sheath and electric cable	CH720EC

Voltage: (Model No. ending with suffix)

B = 115V, 50-60 Hz (with NEMA 5-15 plug)

E = 208-240V, 50-60 Hz (with commonly used European (SCHUKO) plug)

I = 208-240V, 50-60 Hz (with NEMA 6-15 plug)

Pump Series	Pump Model Number ^{1) 2)}	Motor Electrical Specification	Motor Size (hp)	Reservoir Capacity (gal)	Height (in)	Length (in)	Width (in)	Wt. (lbs)	Recommended Cutter Model Number (sold separately)
ZE4	ZE4404XB	115 V-1 ph 50-60 Hz	1.5	1.2	20.2	20.5	11.0	100	EBH30 EBH35
	ZE4404XE	208-240V-1 ph 50-60 Hz							
	ZE4404XI	208-240V-1 ph 50-60 Hz							
ZE6	ZE6410XG-S	208-240 V-3 ph	7.5	2.6	15.1	22	15.1	170	All EWCH- and EBH-Series Cutters
	ZE6410XJ-S	460-480 V-3 ph							
	ZE6410XK-S	440 V-3 ph							
	ZE6410XW-S	380-415 V-3 ph							

¹⁾ Indicated pumps come equipped with appropriate configurations to work with indicated cutters.

²⁾ ZE6 pumps are available with roll cages. To add a roll cage, add an "R" prior to the "S" in the nomenclature, e.g. ZE6410XG-RS.

Pumps and Accessories for EDCH Cutters

EDCH-Series Decommissioning Cutters are designed to work in a wide variety of environments, from factories to demolition projects. Enerpac offers multiple pump options to provide power, speed and mobility for all your applications.

▼ Pumps used with EDCH Decommissioning Cutters

ZC3-Series Pumps

Specialized ZC3-Series Cordless Pumps offer the portability of a cordless tool without the added weight of an integrated motor, combining freedom of movement with ease of use. Recommended for use with **EDCH130** cutters.

ZE4-Series Pumps

Specialized ZE4-Series Pumps provide a balance of speed and versatility. Recommended for use with all **EDCH** Cutters when the convenience of using standard voltage is required.

ZE6-Series Pump

Specialized ZE6-Series pumps offer a high-flow rate that provides fast performance. Recommended for use with all **EDCH** Cutters when 3-phase power is available, and speed is critical.

Voltage: (Model No. ending with suffix)

B = 115V, 50-60 Hz (with NEMA 5-15 plug)

E = 208-240V, 50-60 Hz (with commonly used European (SCHUKO) plug)

Maximum Operating Pressure:

10,000 psi

Gauges

Optional gauges and accessories may be used to monitor pressure in the hydraulic circuit. Enerpac recommends **Gauge Kit GKHC** for use with Enerpac hydraulic cutters.

Hoses

EDCH-Series Cutters require a twin hose for operation. The hose comes equipped with the appropriate couplers.

Required hoses sold separately.

Description	Model No.
20 ft. long, twin hose only	CH720MC

Enerpac's Bolting Solutions caters to the complete bolting work-flow, ensuring joint integrity in a variety of applications throughout industry:

Joint Assembly

From simple pipe alignment to complex joint positioning of large structural assemblies, our comprehensive line of joint assembly products range from hydraulic and mechanical flange alignment and flange closing tools to PLC-controlled multi-point synchronous positioning systems.

Controlled Tightening

Enerpac offers a variety of controlled tightening options to best meet the requirements of your application. From manual torque multipliers to hydraulic and pneumatic driven square drive wrenches, and from low-profile hexagon torque wrenches to inter-connectable bolt tensioning tools; we offer the products you need for accurate and simultaneous tightening of multiple bolts.

Joint Separation

Enerpac also provides hydraulic nut splitters and a variety of mechanical and hydraulic spreading tools for joint separation during inspection, maintenance and decommissioning operations. High-quality bolting solutions from the brand you can trust. See how Enerpac can make your bolting work-flow more accurate, safer and efficient.

Enerpac Bolting Integrity Software Solutions

Enerpac Bolting Integrity Software Solutions play a key role in implementing and managing an Integrity Program for bolted connections.

The software is used by a wide range of clients worldwide often interfacing with maintenance, construction and commissioning management systems.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet and Joint Completion Report.

Custom Joint information can also be entered.

Setting New Standards in Safety, Simplicity and Performance

Two Handle Styles

Robust angled positioning handles come standard with every S-Series (X-Edition) tool. Straight positioning handles are available as accessories.

Compatible S-Series (X-Edition) wrenches	Angled positioning handles (standard)	Straight positioning handles (optional)
S1500X, S3000X	SWH6A	SWH6S
S6000X, S11000X	SWH10A	SWH10S
S25000X	Supplied with an eyebolt handle (SWH10EA)	

Safety and Performance

- Compact, high-strength uni-body construction provides a small operating radius without sacrificing endurance
- 35° rotation angle and rapid return stroke for fast operation
- Tough manifold design with added safety feature for enhanced operator safety

Simplicity

- 360° click-on reaction arm with quick release lever provides easier handling, even when wearing gloves
- Includes robust handle which mounts on both sides of tool for extra maneuverability
- Push button square drive release for quickly reversing the square drive for tightening or loosening

Versatility

- Available with optional enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability*

Accuracy

- Constant torque output provides accuracy of +/-3% across full stroke
- Optional Angle-of-Turn Indicator provides measurement of rotation

* TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

TSP - Pro Series Swivel

The optional TSP300 tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

Page: 243

Calibration Certificate

All X-Edition tools are CE-ATEX certified and are shipped complete with a calibration certificate.

Bolting Integrity Software

Enerpac Bolting Integrity Software Solutions play a key role in implementing and managing an Integrity Program for bolted connections. The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet and Joint Completion Report. Custom Joint information can also be entered.

Page: 416

Square Drive Hydraulic Torque Wrenches

Standard are ① ② ⑥ ⑧. Other items are optional.

- ① Drive Unit
- ② Angled Positioning Handle
- ③ Straight Positioning Handle
- ④ Pro Series Swivel
- ⑤ Reaction Tube Extension

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

- ⑥ Standard Reaction Arm
- ⑦ Allen® Drive
- ⑧ Square Drive
- ⑨ Short Reaction Arm
- ⑩ Extended Reaction Arm

*TORQUE WRENCH SELECTION (based on hexagon socket size range)

Use only Heavy-Duty Impact Sockets

For power-driven torquing equipment, according to ISO2725 and ISO1174; DIN 3129 and DIN 3121 or ASME-B107.2/1995.

Page: 244

S Series (X-Edition)

Nominal Torque at 10,000 psi:

26,150 Ft.lbs

Square Drive Range:

3/4 - 2 1/2 inches

Nose Radius:

0.98 - 2.52 inches

Maximum Operating Pressure:

10,000 psi

Back-Up Spanners

Hands free tool to be used to stop back nut from turning during make up or break out.

Page: 245

Safe T™ Torque Lock

The Safe T Torque Lock is suitable for all bolted applications from 140 to 11,070 ft-lbs. using a heavy-duty impact socket.

The patented mechanical locking system creates a hands-free torque wrench solution suitable for Enerpac only square drive tools.

Suitable for S3000X, S6000X, and S11000X.

Hexagon Sizes:

3/4 - 6 1/8 inches | 19 - 155 mm

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

Pin and Ring

All sockets are supplied with a "Pin and Ring" to hold the socket in place on the square drive of the tool.

Back-Up Spanners for Torque Wrenches

▼ BUS03 Back-Up Spanner (safety cable not shown)

- Hands free solution – improves operator safety
- Eliminates the need for flogging spanners
- Speeds up the bolting process
- Includes safety cable with quick-connect carabiners, stainless steel tethers and secure Allen-key fixings
- Won't lock on during operations
- Lightweight, spark-free and non-impact for improved safety and ease of use
- Two hexagon sizes in one tool

Back-Up Spanners

Hands free operation of a hydraulic torque wrench improves the safety of the operator significantly.

Enerpac Back-Up Spanners are a hands-free tool that eliminates the need to use a flogging spanner as a backing tool.

The Back-Up Spanners have been specifically designed to prevent them from locking onto the nut during bolt torquing operations. They fit easily onto the back nut and prevent it from turning during make up or break out of bolted joints.

▼ *Enerpac Back-Up Spanners to be used to stop back nut from turning during make up or break out.*

▼ Shown: STTLS Safe T™ Torque Lock

Hands-free Torque Wrench System

Safe T™ Torque Lock

The Safe T Torque Lock is suitable for all bolted applications from 140 ft-lbs to 11,070 ft-lbs. using a heavy-duty impact socket.

The patented mechanical locking system creates a hands-free torque wrench solution suitable for Enerpac only square drive tools.

Suitable for:

S-Series	RSQ-Series
S3000X	RSQ3000
S6000X	RSQ5000
S11000X	RSQ11000

IMPORTANT:

Safe T Torque Lock not suitable for use on PTFE coated nuts.

Safety – Safe T™ Torque Lock

- Transforming Enerpac S-Series and RSQ-Series wrenches into a dedicated hands-free tool
- Improves operator safety during bolting operations by minimizing exposure to pinch points and high-pressure hydraulic connections
- Grips securely to the application in any orientation, including inverted positions
- Minimizes drop hazards of falling tools
- Reduces operator fatigue on overreaching or awkward positioning of the tool

Simplicity

- With one twist of the locking collar the Safe T Torque Lock grips onto the application, firmly holding the full tool weight in place
- Assembles onto the torque wrench with one push of the square drive quick-release button for tightening or loosening
- Locking feature dramatically reduces the number of tool lifts

Versatility

- Suitable for both S-Series & RSL-Series square drive wrenches
- Simple twist & lock mechanism is user friendly, easy to operate
- No additional loose components like reaction washers are needed

▲ Hands-free torque wrench system:
STTLS-model with S-Series torque wrench.
The square drive of the wrench can easily be exchanged by the Safe T Torque Lock model.

Common Torque Lock Applications:

- Oil & Gas flanges
- Tower Crane installation
- Machine installation/assembly (Mining),
- Wind Tower installation etc.

Industries

- Oil & Gas, Petrochemical
- Wind Power Generation
- Mining
- Marine
- Manufacturing
- Rail and more

STTL Series

Hexagon Range (A/F):

1¹³/₁₆ - 2¹⁵/₁₆ inch

Hexagon Range (A/F)

46 - 75 mm

▼ W4206X cassette with W4000PX drive unit

Setting New Standards in Safety, Simplicity and Performance

Two Handle Styles

Robust angled positioning handles come standard with every W-Series (X-Edition) tool. Straight positioning handles, designed for extreme limited access applications, are available as accessories.

Compatible W-Series (X-Edition) Wrenches	Angled Positioning Handles (standard)	Straight Positioning Handles (optional)
W2000X, W4000X	SWH6A	SWH6S
W8000X, W15000X	SWH10A	SWH10S
W22000X, W35000X	Supplied with an eyebolt handle (SWH10EA)	

TSP - Pro Series Swivel

The optional TSP300 tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

Page: 260

Calibration Certificate

All X-Edition cassettes are CE-ATEX certified, factory calibrated and are shipped complete with a calibration certificate.

CE  II 2 GD ck T4
CSA/SIRA 15XT072

Bolting Integrity Software

Enerpac Bolting Integrity Software Solutions play a key role in implementing and managing an Integrity Program for bolted connections. The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet and Joint Completion Report. Custom Joint information can also be entered.

Page: 416

Safety and Performance

- Superior strength to size ratio provides easy access to difficult to reach applications without sacrificing endurance
- 30° rotation angle and rapid return stroke provide fast operation
- Tough manifold design with added safety feature for enhanced operator safety

Simplicity

- Fast release drive unit enables rapid exchange of cassettes, no tools required and no pins to lose
- Drive unit includes robust handle which mounts on both sides to allow for extra maneuverability
- Quick and easy disassembly for maintenance without special tools

Versatility

- Available with optional enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability*
- X-Edition drive units, cassettes and most accessories are compatible with standard edition tools*
- Drive unit compatible with UltraSlim cassettes

Accuracy

- Constant torque output provides accuracy of +/-3% across full stroke

* TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

X-Edition Hexagon Wrenches

- ① Hexagon Cassette
- ② Drive Unit
- ③ Angled Positioning Handle
- ④ Straight Positioning Handle (optional)
- ⑤ Pro Series Swivel (optional)
- ⑥ Extended Reaction Arm (optional)
- ⑦ Reducer Insert (optional)
- ⑧ Reaction Paddle (optional)

Hexagon Cassettes and Reducer Inserts

Full range of interchangeable hexagon cassettes and reducing inserts provides maximum versatility.

Refer to pages 250 - 257.

W Series (X-Edition)

Nominal Torque at 10,000 psi:

35,000 ft.lbs

Hexagon Range:

1 1/16 - 6 1/8 in | 30-155 mm

Nose Radius:

1.22 - 4.52 inches

Maximum Operating Pressure:

10,000 psi

DRIVE UNIT AND INTERCHANGEABLE CASSETTE SELECTION

W22000X Series Imperial Cassettes & Reducer Inserts **ENERPAC**

Nominal Torque at 10,000 psi:

22,500 ft.lbs

Hexagon Range:

2¹⁵/₁₆ - 5³/₈ inches

Maximum Operating Pressure:

10,000 psi

W
Series
(X-Edition)

W35000X

W Series (X-Edition)

Nominal Torque at 10,000 psi:

35,000 ft.lbs

Hexagon Range:

3¹/₈ – 6¹/₈ inches

Maximum Operating Pressure:

10,000 psi

Back-Up Spanners

Hands free tool to be used to stop back nut from turning during make up or break out.

Page: 245

Hexagon Bolt and Nut Sizes

See the table of hexagon sizes of bolts, nuts and related thread diameters.

Page: 411

W Series (X-Edition)

Hexagon Range:

24 - 105 mm

Maximum Operating Pressure:

10,000 psi (690 bar)

W-Series, UltraSlim Stepped-Width Cassettes **ENERPAC**

▼ Shown: W4206SL stepped-width cassette with W4000X drive unit

Your Easy and Long-Lasting Solution to Difficult Access Bolting Applications

Designed for Tight Spots

Stepped width design provides easy access in confined areas. UltraSlim cassettes fit where standard solutions won't.

Built to Outperform

High endurance components keep working when others fail.

Top Mounted Handles

Standard top mounted handles provide safety and versatility; optional angled handles are also available.

Replacement handle (straight)	SWH6S
Angled handle (optional)	SWH6A

Calibration Certificate

All UltraSlim Series cassettes are CE - ATEX certified, factory calibrated and are shipped complete with a calibration certificate.

CE  II 2 GD T4
CSA/SIRA 15XT072

Versatility

- Lean, stepped width design allows tool to be mounted over bolts where other tools won't fit
- Bi-Hexagonal cassette allows twice as many positioning points on nut or bolt
- Uses same drive unit as standard W-series hexagon cassettes
- Robust top mounted handle stays out of the way, providing safe fastening in hard to reach areas

Performance

- Premium components provide best-in-class endurance

Ease of Use

- Few moving parts are easily accessible for quick field maintenance
- Fast release drive unit enables rapid exchange of cassettes, no tools required and no pins to lose
- Uses same drive unit as standard and X-Edition cassettes

Accuracy

- Constant torque output provides accuracy of +/- 3% across the full stroke

Slim enough to fit and tough enough to last. This UltraSlim wrench is the perfect controlled bolting solution for this oil and gas flange. ►

UltraSlim Stepped-Width Cassettes

UltraSlim Stepped-Width Cassettes

Accessing narrow spaces normally requires

significantly reducing the width of the torque wrench. For the tool operator, this has always meant vastly reduced tool durability, and/or reduced torque output.

By using the highest-grade materials, perfecting the geometry, and placing the positioning handle on top of the tool, Enerpac UltraSlim cassettes are able to provide greater torque, get into tighter spaces, and vastly outperform the competition in product durability.*

Durability of Key Components*

*Average test results, whereby three Enerpac 1³/₁₆" UltraSlim cassettes and three competitor 1³/₁₆" cassettes were tested at 4000 ft-lbs for 50,000 cycles. The Enerpac side plates never broke for the full duration of the test.

W-SL Series Ultra-Slim

Nominal Torque at 10,000 psi:

4360 Ft.lbs.

Hexagon Range:

1¹³/₁₆ - 2¹⁵/₁₆ inches

Maximum Operating Pressure:

10,000 psi

Torque Wrench Pumps

Visit enerpac.com for system matched air and electric torque wrench pumps that are ideal for use with hydraulic torque wrenches.

* Bi-Hexagonal Cassette includes top mounted straight handle.

** May also be used with W2000PX and W4000PX drive units, featuring double-swivel manifolds.

Accessories for W-Series, X-Edition Torque Wrenches **ENERPAC**

- ① Hexagon Cassette
- ② Drive Unit
- ③ Angled Positioning Handle
- ④ Straight Positioning Handle (optional)
- ⑤ Pro Series Swivel (optional)
- ⑥ Extended Reaction Arm (optional)
- ⑦ Reducer Insert (optional)
- ⑧ Reaction Paddle (optional)

TSP WTE WRP Series

TSP-Series, Pro Series Swivels

- Robust interlocking design
- 360° X-axis and 160° Y-axis rotation
- Increases tool fit in restricted access areas
- Simplifies hose placement
- Includes male and female couplers

Torque Wrench Model Number	Model Number	Maximum Pressure (psi)	Wt. (lbs)
W2000X, W4000X, W8000X, W15000X, W22000X, W35000X	TSP300*	10,000	0.44

Note: To order a W-series (X-Edition) wrench fitted with the TSP swivel, insert a "P" prior to the "X" in the tool designation, e.g., W2000PX.

* TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

WTE-Series, Extended Reaction Arm

- Full torque rated
- Increases tool fit in restricted access areas

Torque Wrench Model Number	Model Number	Dimensions (in)			Wt.* (lbs)
		A	B	C	
W2000X	WTE20	2.20	15.67	2.66	5.73

ENERPAC professional series steel torque wrenches provide reliable controlled tightening solutions across many industries.

S3000X Square Drive Torque Wrench on Wind Turbine Assembly and Maintenance

S3000X used to connect wind turbine segments during assembly and maintenance. A robust but compact solution is required for bolt tightening on wind tower sections. Large numbers of fasteners require precise application of torque to ensure joint integrity is achieved and maintained.

The Enerpac S-Series wrench offers simple and reliable operation while providing accurate and repeatable results.

W4000X Low-Profile Torque Wrench on an API Pipe Flange

Throughout the Oil and Gas, Petrochemical and Processing Industries, pipeline joints, valves, pumps and machinery present challenges for controlled bolting.

The restricted access on this flange was easily overcome with an Enerpac W-Series Torque Wrench. The W Wrenches offer reliability and control, ensuring even and consistent torque is applied to all bolts.

S3000X on an Oil and Gas Flange

During maintenance, quick turnaround times are essential; S-Series wrenches provide a large angle of nut rotation per stroke, offering speed and accuracy in a compact ergonomic tool.

RSL-Series Low-Profile Hexagon Torque Wrenches **ENERPAC**

▼ RSL Drive Units with interchangeable RLP Hexagon Cassette and RSQ Square Drive Head

Safety and Performance

- Innovative design that completely encloses all moving parts and minimizes pinch points
- 30-35° rotation angle provides added productivity while avoiding "tool lock-on" which is common with some torque wrench designs

Simplicity

- Simple robust alloy steel design with just three moving parts for reduced maintenance
- Robust handles are available for both sides and the tops of cassettes to allow for extra maneuverability
- Designed to give optimum strength-to-weight and torque-to-weight ratios
- Minimum nose radius for trouble-free tool fit

Versatility

- Interchangeable cassette design
- Wide range of hexagon sizes available for all applications
- Reaction arm has a simple dial lock for rapid change
- For use in multiple industrial, energy, and oil and gas applications

Accuracy

- Accuracy of +/-3%

Setting New Standards in Safety, Simplicity and Performance

Options and Accessories

Optional extended reaction arms and tubes are common accessories available for maximum versatility. Please contact your Enerpac representative to help you select the optimum solution for your application.

Hexagon Cassettes for RSL-Series

Enerpac's Bolting Integrity Software Solutions

play a key role in implementing and managing an Integrity Program for bolted connections. Our Bolting Software Suite includes **BoltUp** (free, online calculator providing reliable, repeatable bolt loads), **Informate** (bolt load calculation software for huge range of flanged joints and clamped connections), and **Integrity Data Management System/iDMS** (flexible data management and activity-planning system for use on assets featuring bolted connections).

Contact Enerpac for more information.

Slimline Hexagon Cassettes

For accessing narrow spaces RLP...SL Stepped-Width

Hexagon Cassettes are available. Slimline cassettes use same drive unit as standard RLP-cassettes.

270

RSL Series

Hexagon Range:

7/8 - 6 1/8 inches

Hexagon Range:

26 - 155 mm

Maximum Operating Pressure:

10,000 psi

▼ TWMP503

TWMP503, Torque Wrench Moly Paste

- Enerpac 503 Moly Paste reduces friction on threaded fasteners – bolts, nuts and studs
- The low and uniform friction coefficient of 0.06 (torque coefficient, K, of 0.11) creates reliable assembly conditions
- This lubricant stays in place through heat, load and vibration to ensure trouble-free disassembly from -20° F to 750° F (-29° C to 400° C)
- 4 lbs. (1,8 kg) container

NOTE: Extended Reaction Arms for RSL8000 and RSL19000 are available on request.

- Only to be used on RSL-drive units with RSQ-square drive wrenches
- Used in place of standard reaction arm
- Lightweight interchangeable design
- Full torque rated

NOTE: Extended Reaction Tubes for RSL8000 are available on request.

- Only to be used on RSL-drive units with RLP-hexagon cassettes
- Used in place of standard reaction arm
- One-piece steel design, durable and simple
- Increases tool fit in restricted access areas
- Full torque rated

▼ Shown: RSL drive unit with interchangeable RLP—SL slimline cassette

Simplicity

- Minimum nose radius for trouble-free tool fit which makes it uniquely equipped to access tight spaces, such as Blowout Preventers (BOPs)
- Simple robust alloy steel design with three moving parts for reduced maintenance
- Proven to perform even in the harshest environments
- Reaction arm has a simple dial lock for rapid change
- Designed to give optimum strength-to-weight and torque-to-weight ratios

Versatility

- Interchangeable cassette design
- Drive unit / hexagon cassette combination for limited height in line solutions
- Wide range of hexagon sizes available for all applications

Accuracy

- Accuracy of +/-3%

Ease of Use

- Few moving parts are easily accessible for quick field maintenance
- Innovative design that completely encloses all moving parts and minimizes pinch points

Setting New Standards in Simplicity, Versatility and Accuracy

Torque Wrench Pumps

Visit enerpac.com for system matched air and electric torque wrench pumps that are ideal for use with hydraulic torque wrenches.

Page: 291

Options and Accessories

Optional extended reaction arms and tubes are common accessories available for maximum versatility. Please contact your Enerpac representative to help you select the optimum solution for your application.

Slimline Stepped-Width Hexagon Cassettes

Slimline Stepped-Width Hexagon Cassettes

Accessing narrow spaces, typically found on BOP stacks, normally requires significantly reducing the width of the torque wrench. For the tool operator, this has always meant vastly reduced tool durability, and/or reduced torque output.

By using the highest-grade materials and perfecting the geometry, the RSL Slimline cassettes are able to provide greater torque, get into tighter spaces, and vastly outperform the competition in product durability.

RSL Series

Hexagon Range:

1 1/4 - 3 3/16 inches

Hexagon Range:

32 - 80 mm

Maximum Operating Pressure:

10,000 psi

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

▼ RSL drive unit with interchangeable RSQ square drive cassette

Safety and Performance

- Innovative design that completely encloses all moving parts and minimizes pinch points
- 30–35° of operating stroke provides added productivity while avoiding “tool lock on” which is common with some torque wrench designs

Simplicity

- Simple robust design with just three moving parts for reduced maintenance
- Robust handles are available which mount on both sides and the tops of cassettes to allow for extra maneuverability
- Pull-type square drive release for quickly reversing the square drive for tightening or loosening

Versatility

- Square Drive Sets available with interchangeable Hexagon Cassettes
- Power head / square drive combination for flexible use with standard impact quality sockets
- Reaction arm has a simple dial lock for rapid change

Accuracy

- Accuracy of +/-3%

¹⁾ When ordering an RSQ Square Drive Head the RSL Drive Unit must be ordered separately.

²⁾ An RSQ....ST Torque Wrench Set includes a RSQ Square Drive Head, RSL Drive Unit with short Whip Hoses, and Reaction Arm

RSL Series

Maximum Torque Output:

1408 - 28,002 ft.lbs

Maximum Torque Output:

1909 - 37,965 Nm

Square Drive Range:

3/4 - 2 1/2 inches

Maximum Operating Pressure:

10,000 psi

Safe T™ Torque Lock

The Safe T Torque Lock is suitable for all bolted applications from 140 ft.-lbs to 11,070 ft.-lbs. using a heavy-duty impact socket.

The patented mechanical locking system creates a hands-free torque wrench solution suitable for Enerpac only square drive tools.

Suitable for:

RSQ3000
RSQ5000
RSQ11000

Setting Industry-First Safety Standards

Work-at-Height Connection

Built-in, work-at-height safety tether.

Fully Retained Reaction Arm

Patented, fully retained reaction arm with easy-to-use quick release, helps prevent injuries when working-at-height.

Secured Square Drive

Retained quick release push-button.

Ergonomic Tool Handle

Robust ergonomic positioning handle comes standard with every DSX tool.

SWH10EA is an eyebolt handle.

Safety and Performance

- High-strength, lightweight aluminum, slimline design suited for complete operator safety
- Fully enclosed drive for maximum safety
- Built-in, work-at-height safety tether connection
- Retained quick release push-button
- Patented, easy-to-use, quick release, retained reaction arm
- Fine-tooth ratchet prevents the tool 'locking on'
- High-cycle design with fewer moving parts making it a more efficient tool to operate, maintain, or repair
- 35° rotation angle and rapid return stroke for fast operation

Simplicity

- Robust handle which mounts on either side of the tool for extra maneuverability and safer operation
- Push-button square drive and reaction arm for fast changes and adjustments
- Easily accessible work-at-height connection point

Accuracy

- Constant torque outputs with an accuracy of +/- 3%

ATEX certified

- All DSX tools are CE - ATEX certified

Compatible DSX-Series wrenches	Ergonomic Handle (Standard)
DSX1500, 3000, 5000	SWH6A
DSX11000	SWH10A
DSX25000	SWH10EA

Bolting Integrity Software

Enerpac Bolting Integrity Software Solutions play a key role in implementing and managing an Integrity Program for bolted connections. The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet and Joint Completion Report. Custom Joint information can also be entered.

Square Drive Hydraulic Torque Wrenches

Standard are ① ② ③ ④ ⑤.
⑥ is optional.

- ① Drive Unit
- ② Reaction Arm
- ③ Aluminum Swivel
- ④ Ergonomic Tool Handle
- ⑤ Square Drive
- ⑥ Allen® Drive (optional)

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

DSX Series

Nominal Torque Output:

24,057 ft.lbs

Square Drive Range:

3/4 - 2 1/2 inches

Nose Radius:

0.94 - 2.50 inches

Maximum Operating Pressure:

10,000 psi

*TORQUE WRENCH SELECTION (based on hexagon socket sizes)

Use only Heavy-Duty Impact Sockets

For power driven torquing equipment, according to ISO2725 and ISO1174; DIN 3129 and DIN 3121 or ASME-B107.2/1995.

Bolting Applications & Portable Machining

Enerpac professional bolting tools provide reliable controlled torque and tension solutions across the industry.

Portable machining products tackle the most demanding in-situ machining applications.

W-Series torque wrench providing accurate and repeatable results

Large numbers of fasteners require precise application of torque to ensure joint integrity is achieved and maintained. The Enerpac W-Series wrench was selected as it offers simple and reliable operation. The portable Enerpac E-Pulse torque pump was used and is ideal for high volume fastening applications where weight is a critical factor.

Safe, reliable, and repeatable tensioning with compact HydraMax® Tensioners to complete joint integrity

With their compact fit and high load generation, and the flexibility to work with all standard flanges, the Enerpac HM-Series HydraMax® tensioners can be used in almost every industry and in many different applications.

Portable Machining

Mirage® portable machining products tackle the most demanding in-situ machining applications. By replicating machine shop tolerances in-situ, customers can reliably get the job done faster, safer and smarter.

See pages 378-397 for more information.

Oil & Gas: Pipeline repair under pressure; Wellhead high-pressure drilling; Raised, RTJ, compact flanges and hubs; Flange stud removal; Re-thread damaged holes

Power Generation: Pipe cutting and weld preparation; Wind turbine blade and tower milling; Turbine casing split line repairs; Subsea cutting and decommissioning.

▼ HMT-Drive Units with interchangeable HLP-Low-Profile Cassette and HSQ-Square Drive Cassette

Modular, Durable, Fast and Efficient Torque for Low- Profile and Square Drive Applications

The HMT-Series is a range of fast, durable and efficient modular hydraulic torque wrenches, enabling you to tackle almost any bolting application. Interchange cassettes with ease, switching the HLP low-profile hexagon cassette with the HSQ square drive whenever your application demands.

As an added benefit, tools and cassettes are interchangeable with many other well-known brands, allowing you the freedom to use the tools at your disposal while reducing the cost of upgrading your legacy torque wrench inventory to high quality Enerpac equipment.

The tool itself has been carefully designed and manufactured, utilizing superior alloys and surface treatments to make it lightweight, up to 25% faster and more than twice as durable as other tools in the same class.

Safety and Performance

- Supplied with an ergonomic tool safety handle as standard
- The HMT Modular Torque/Tool is also supplied with a link pin retainer as standard

Versatility

- Interchangeable with other manufacturers
- HMT is able to solve all of your bolting challenges quickly and safely, with one or more attachment options, making it suitable for any application

Simplicity

- The HMT is part of a modular system which is made up of a single power head and one attachment; the HMT Drive Unit and HLP Hexagon cassette or HSQ Square Drive Cassette

Accuracy

- Accuracy of $\pm 3\%$

Torque Wrench Options and Accessories

Optional accessories are available for maximum versatility.

Torque Wrench Hoses

Use Enerpac THQ-700 Series hoses with HMT-Series torque wrenches to ensure the integrity of your hydraulic system.

6 feet long, 2 hoses	THQ702T
19.5 feet long, 2 hoses	THQ706T
39 feet long, 2 hoses	THQ712T

Drive Units for Hexagon & Square Drive Cassettes

One Drive, Two Tools

One HMT-Hydraulic
Torque Wrench fits HLP
Low-Profile or HSQ
Square Drive cassette.

HMT...HLP

HLP

HSQ

HMT Series

Max. Torque at 10,000 psi:

1541 - 7562 ft.lbs

Max. Torque at 690 bar:

2089 - 10.252 Nm

Hexagon Range:

1¹/₁₆ - 3¹⁵/₁₆" / 26 - 100 mm

Maximum Operating Pressure:

10,000 psi / 690 bar

HMT-Series, Torque Wrench Options and Accessories

- ① HMT: Drive Unit (HMT)
- ② HLP: Hexagon Cassette (page 4-5)
- ③ HSQ: Square Drive Cassette (page 6-7)
- ④ SWH: Ergonomic Tool Handle (page 7)
- ⑤ Reaction Arm for HSQ
- ⑥ HRP: Reaction Paddle (page 4)
- ⑦ HTE: Extended Reaction Arm (page 4)

Optional Parts (for HMT with HLP only)

Select the Right Torque

Choose your Enerpac
Torque Wrench using the
untightening rule of thumb:
Loosening torque equals about 250% of
tightening torque.

HLP Low -Profile Cassettes

For the metric and imperial
Low-Profile cassettes see:

Page: 280

HSQ Square Drive Cassettes

For the metric and imperial
Square Drive Cassettes see:

Page: 282

▼ SELECTION CHART

Max. Torque Output at 10,000 psi		Min. Torque Output at 1000 psi		Drive Unit Model Number	Dimensions (in)			Wt. (lbs)	Dimensions (mm)			Wt. (kg)
(ft-lbs)	(Nm)	(ft-lbs)	(Nm)		A	B	C		A	B	C	
1541	2089	154	209	HMT1500	4.3	4.1	2.0	2.20	108	104	49	1,0
3543	4804	354	480	HMT3500	5.7	5.2	2.6	3.97	146	132	66	1,8
7562	10252	756	1025	HMT7500	7.1	6.4	3.2	7.05	180	163	82	3,2
13489	18289	1349	1829	HMT13000*	8.5	7.4	3.9	4.40	216	187	98	9,7

* Note: HMT13000 only available for HLP-low profile hexagon cassettes.

Hexagon Range:

1¹/₁₆ - 3¹⁵/₁₆ inches

Hexagon Range:

26 - 100 mm

Maximum Operating Pressure:

10,000 psi

**HLP
Series**

HLP-Series Hexagon Cassettes for HMT Drive Units

Hexagon Range:

1¹/₁₆ - 3¹⁵/₁₆ inches

Hexagon Range:

26 - 100 mm

Maximum Operating Pressure:

10,000 psi

**HLP
Series**

HMT-Series, Square Drive Torque Wrenches **ENERPAC**

▼ HMT drive unit with HSQ square drive cassette

**Modular, Durable,
Fast and Efficient
Torque for Low
Profile and Square
Drive Applications**

Ergonomic Tool Handle

Robust ergonomic positioning handle comes standard with every HMT Drive Unit.

Compatible HMT-Series wrenches

HMT1500, 3500, 7500

HMT13000

Ergonomic Handle (Standard)

SWH6A

SWH10A

Back-Up Spanners

Hands free tool to be used to stop back nut from turning during make up or break out. Two hexagon sizes in one tool.

Page: 245

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb:

Loosening torque equals about 250% of tightening torque.

Torque Wrench Hoses

Use Enerpac THQ-700 Series hoses with HMT-Series torque wrenches to ensure the integrity of your hydraulic system.

6 feet long, 2 hoses

19.5 feet long, 2 hoses

39 feet long, 2 hoses

THQ702T

THQ706T

THQ712T

Safety and Performance

- Innovative design that completely encloses all moving parts and minimizes pinch points
- Supplied reaction arm as standard
- Fully adjustable 360 degree in-line reaction arm
- Fine tooth ratchet prevents locking-on

Simplicity

- Simple robust design with just three moving parts for reduced maintenance
- Push button, quick release, reversible square drive

Versatility

- The reaction arm, positioned around the square drive instead of the back of the drive unit, provides you with the possibility to turn the drive unit away from an obstacle

Accuracy

- Accuracy of $\pm 3\%$

ATEX certified

- All HMT tools are CE - ATEX certified

HMT, Square Drive Hydraulic Torque Wrenches

Bolting Integrity Software

Visit enerpac.com to access our free on-line

bolting software application.

A comprehensive on-line software solution for Bolted Joint integrity.

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants

- Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

7562	10252	1 1/2	HSQ7500	9.60	10.08	9.25	1.99	4.33	3.23	6.32	25.13	244	256	235	51	110	82	161	11,4

* IMPORTANT: HMT-drive units must be ordered separately to operate the HSQ-Square Drive Cassettes.

HMT Series

Maximum Torque at 10.000 psi:

1541 - 7562 Ft.lbs

Maximum Torque at 690 bar:

2089 - 10.252 Nm

Square Drive Range:

3/4 - 1 1/2 inch

Maximum Operating Pressure:

10.000 psi / 690 bar

BSH-Series Sockets

Heavy-Duty Impact Sockets for power driven torquing equipment.

Page: 244

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

Torque Wrench Pumps

Visit enerpac.com for system matched air and electric torque wrench pumps that are ideal for use with hydraulic torque wrenches.

Page: 291

▼ Shown from left to right: E291, E393, E494

Accurate, Efficient Torque Multiplication

When accurate make-up or break-out of stubborn fasteners requires high torque

- High-efficiency planetary gear sets achieve high output torque from low input torque
- Most models operator protected by anti-backlash device
- Multiplier output accuracy $\pm 5\%$ of input torque
- Reversible, tighten or loosen bolts
- Reaction bar or reaction plate type
- Angle-of-turn protractor standard on E300 series models
- Reaction plate models offer increased versatility with reaction point locations
- E300 and E400 series replaceable shear drives provide overload protection of internal power train
- One replacement shear drive is included with each E300 and E400-Series models

Typical Torque Multiplier Applications

- Locomotives
- Power plants
- Pulp and paper mills
- Refineries
- Chemical plants
- Mining and construction
- Off-road equipment
- Shipyards
- Cranes

▼ SELECTION CHART

Torque Multiplier Type	Nominal Torque Output		Model Number
	(Ft.lbs)	(Nm)	
Reaction Bar Multiplier	750	1020	E290PLUS
	1000	1358	E291
	1200	1627	E391
	2200	2983	E392
	3200	4340	E393
Reaction Plate Multiplier	2200	2983	E492
	3200	4339	E493
	5000	67879	E494
	8000	10,846	E495

Manual Torque Multipliers

Enerpac manual torque multipliers provide efficient torque multiplication in wide clearance applications and when external power sources are not available.

Manual torque multipliers are used in most industrial, construction, and equipment maintenance applications. Hydraulic torque wrenches are better suited for tight tolerance, flange and repetitious bolting applications.

Use Reaction Bar Models:

- where space is limited
- where multiple reaction points are available
- when portability is desirable

Use Reaction Plate Models:

- above 3200 Ft.-lbs. output torque
- on flanges and applications where neighboring bolt or nut is available to react against
- when extreme reaction forces are generated

Selector Pawl

Models with anti-backlash protection have directional selector pawls. Set the pawl for clockwise or counter-clockwise rotation.

Shearable Square Drive

Designed to provide overload protection on E300- and E400-series multiplier power train by shearing when excess input torque is applied. Internal shear pin prevents tool from falling off bolt.

Angle-of-Turn Protractor

E391, E392 and E393 models include an angle-of-turn protractor (scale) to tighten fasteners using a "torque turn" method. Allows accurate measuring a specific number of degrees of rotation.

Reaction Bar Type ¹⁾

Reaction Plate Type ¹⁾

E Series

Nominal Output Torque:

750 - 8000 Ft.lbs

Torque Ratio:

3.3:1 - 52:1

Multiplier Output Ratio Accuracy:

± 5 %

CAUTION!

Never use impact type air tools for power driving torque multipliers. Torque multiplier drive train damage will occur.

BSH-Series Sockets

Heavy-Duty Impact Sockets for power driven torquing equipment.

Page: 244

Back-Up Spanners

Hands free tool to be used to stop back nut from turning during make up or break out. Two hex sizes in one tool.

¹⁾ E200 and E400-series do not have an Angle-of-Turn Protractor (scale).

User must verify manual torque wrench accuracy prior to use to ensure accurate final output torque.

▼ PTW1000

Continuous Rotation Controlled Torque

Calibration Certificate

All PTW tools are CE declared and are shipped complete with a calibration certificate.

FRL120C, Filter-Regulator-Lubricator with Air Hose

All PTW-Series tools are shipped complete with standard reaction arm, and Filter-Regulator-Lubricator (FRL120C).

MCS-Series, Mobile Calibration System

To check torque accuracy, run calibration tests and create calibration certificates prior to the use of continuous rotation torque tools in various applications while on a job site.

Page: 290

Productivity

- High speed continuous rotation for constant torque output
- Low friction planetary gearbox design minimizes wear and extends uptime

Safety

- Ergonomic, low vibration design reduces fatigue and the risk of vibration related injuries for the operator
- Low noise air motor provides quiet, consistent performance for indoor and outdoor applications

Convenience

- Provided with standard reaction arm; wide assortment of custom arms and accessories are available
- Available with or without Filter-Regulator-Lubricator (FRL)
- Unique calibration certificate provided with each tool

◀ The PTW1000 makes quick work of this flange maintenance job.

▼ PTW-Series Pneumatic Torque Wrenches are ideal for applications where speed and precision are critical, such as track maintenance.

Pneumatic Torque Wrenches

PTW-Series Pneumatic Torque Wrenches

Enerpac PTW-Series Pneumatic Torque

Wrenches are designed for applications that require speed and control.

The standard package includes a Torque Wrench with a calibration certificate, an FRL (Filter/Regulator/Lubricator), and a 10 ft. (3 m) long, ½" (13 mm) diameter air hose, which connects the FRL to the wrench.

Once the air hoses are connected, the operator simply adjusts the air pressure on the FRL to achieve the

desired torque using the calibration certificate. After this, the tool is ready to go to work!*

The air source used with the PTW system must be regulated and/or limited to 120 psi (8.3 bar), and must be capable of providing a volume of at least 50 CFM (85 CMH) at 100 psi (6.9 bar). A separate ½" (13 mm) hose (not included) must be used to connect the FRL to the air supply.

*See instruction manual for comprehensive instructions

- ① PTW Torque Wrench
- ② Standard Reaction Arm
- ③ FRL120C Filter-Regulator-Lubricator with 10-foot air hose

PTW Series

Nominal Output Torque:

6000 Ft.lbs

Square Drive Range:

¾ - 1 - 1½ inches

Accessories

Enerpac offers a full line of accessories including a range of reaction arms and drives.

900	1220	3000	4067	1	PTW3000C	3.1	13.50	3.27	3.74	5.24	23
1300	1763	6000	8135	1½	PTW6000C	2.5	14.40	4.49	5.00	7.00	39

* To order without FRL and hose, remove "C" suffix from model number (e.g. PTW3000).

** Weight does not include reaction arm. Reaction arm weight for PTW1000, PTW2000, PTW3000 is 2.9 lbs. and for the PTW6000 is 7.75 lbs.

▼ Shown: Accessories for PTW-Series Torque Wrenches

- Accessories for further extending the application range of pneumatic torque wrenches
- Extended drives increase tool fit in restricted access areas

PTW-Series Torque Wrenches

Enerpac offers the following accessories to support a wide variety of applications in industries such as mining, power generation and oil and gas. For additional custom accessories not pictured here, please contact Enerpac.

Applications

PTW-Series Pneumatic Wrenches are designed for applications that require speed and control.

Mining

- Track maintenance
- Undercarriage maintenance
- Wheel maintenance
- Shovel maintenance

Power Generation

- Turbine bolts
- Tower segments
- Turbine casings

Oil & Gas

- Pipe flanges
- Valves
- Manway covers
- Pressure vessels

* Time to reposition arm when repeatedly moving from tightening to loosening.

** ⚠ WARNING: Blank reaction arms must be heat-treated to HRC 38-42 prior to use.

▼ MCS7500C, Mobile Calibration System

MCS Series

Nominal Output Torque:

148 - 7375 Ft.lbs

Square Drive Range:

1½ inches

Accuracy

The calibration system is a calibrated instrument qualified in a UKAS certified laboratory. The accuracy of the MCS7500C is calibrated to meet or exceed: 1% of FSD from 2% to 8% of torque range and 1% of reading from 8% to 100% of torque range.

Versatility

- Accurately measures torque output for continuous rotation tools and hydraulic (*) square drive torque wrenches from 148-7375 Ft.lbs (200-10,000 Nm)
- Adaptable design enables use with a large variety of Enerpac and competitive wrenches
- Internal Li-ion battery pack, external power via 5V DC USB power supply

Performance

- Certificate Manager feature enables quick and easy creation of calibration certificates
- Tool database feature allows specific wrench data and calibration results to be recorded and saved for future use
- Each MCS comes with a standard ISO17025 calibration certificate

Ease of Use

- Compact design facilitates easy transport, allowing calibration to be carried out in the shop, on jobsites, or even in a vehicle
- Integrated digital interface enables torque values to be displayed, saved, printed or transferred to a computer

* Additional Reaction Block and appropriate Adaptor is required with the use of S- and RSL-Series square drive hydraulic wrenches

Female Reducer Set

The Female Reducer Set consists of two reducers: 1½ x 1 inch and 1½ x ¾ inch. To be ordered separately as **MCS7500RS**.

Additional Reaction Block and Adaptor

A heavy-duty adjustable reaction block in combination with one of the three adaptors is required to facilitate the use with S- and RSL-Series Square Drive Wrenches as well as most competitive hydraulic wrenches to maximum 7375 Ft.lbs (10,000 Nm).

▼ SELECTION CHART

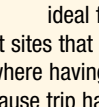

Minimum Measurable Torque Output		Nominal Measurable Torque Output		Female Square Drive	Model Number**	Description	Weight

XC-Series, Portable Cordless Pumps

The XC battery torque wrench pump is ideal for maintenance bolting applications at sites that do not have access to power or where having extension cords or air hoses could cause trip hazards.

E-Series, E-Pulse Electric Torque Wrench Pumps

Ideal for high volume fastening applications where weight is critical. Features an interactive pendant for operation, programming and diagnostics.

TQ700 Series Electric Torque Wrench Pumps

Designed for both portability and production to deliver superior bolting speed.

ZU4T Electric Torque Wrench Pumps

Works well with long extension cords or generator driven electrical power supplies. Available in **Pro** and **Classic** formats.

ZU4T Pro Pumps have an LCD feature to display torque or pressure, selectable torque wrench, and self-diagnostics.

ZU4T Classic Pumps feature an analog gauge and a basic electrical package to deliver durable, safe and efficient hydraulic power.

ZE4-T-Series Electric Torque Wrench Pumps

Features LCD to display torque or pressure values, and self-diagnostics. With induction motor, making the ZE-Series the coolest and quietest pumps in their class.

LAT-Series Lightweight Torque Air Pumps

Combines compact design and high productivity for bolting applications in areas hard to access with larger air powered pumps.

ZA4T-Series, Air Driven Torque Wrench Pumps

This air driven pump is best suited to power medium to large size torque wrenches.

THQ-Series, Torque Wrench Hoses

Use Enerpac THQ700-Series twin hoses with all torque wrenches to ensure the integrity of your hydraulic system.

▼ XC1502TB

Portable Battery Pump for Torque Applications

- Ideal for maintenance bolting applications requiring portability and convenience
- Interactive pendant provides visual and vibratory feedback of pump operation
- User can set pressure and operate in manual or auto-cycle mode
- Superior run-time with 5Ah, 28V battery
- Brushless DC motor extends motor life and reduces maintenance
- 20-foot detachable pendant control, with option to use trigger control as well
- 4-inch glycerin-filled gauge for easy viewing
- User-adjustable relief valve can be locked when desired pressure is set

28-Volt Battery

The **XC28V5** with Lithium-Ion technology for maximum battery performance.

Battery Charger

1-hour quick charger.

XC115VC	115 VAC
XC230VC	230 VAC

Roll Cage

A roll cage accessory is available for all XC models. Please order model number **XCRCTK**.

Torque Wrenches

The following wrenches are ideal for use with the XC Cordless Torque Wrench Pump:

Torque Wrench Series

S	W	RSL	DSX	HMT
S1500X	W2000X	RSL1500	DSX1500	HMT1500
S3000X	W4000X	RSL3000	DSX3000	HMT3500
		RSL5000	DSX5000	HMT7500

Larger wrenches will work with the pump, battery run time and application speed will be impacted.

Cordless Torque Wrench Pump

The XC-Series Cordless Torque Wrench pump is ideal for maintenance applications in the PowerGen, Oil & Gas and MRO markets. This portable pump is perfect for remote locations, sites that do not have access to power or where trip hazards are a concern.

The interactive pendant allows the user to set and clear pressure and operate in manual or auto-cycle mode.

The pump has an easily accessible user adjustable valve for precise pressure control.

Fasteners Torqued On One Charge

Productivity through innovation

Bolting Integrity Software

Enerpac Bolting Integrity Software Solutions play a key role in implementing and managing an Integrity Program for bolted connections. The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet and Joint Completion Report. Custom Joint information can also be entered.

Page: 416

Performance

- Two-stage pump with high by-pass pressure: 220 in³/min at 2900 psi, 32 in³/min at 10,000 psi
- Smart controls enable motor to maintain constant power across the pressure range
- 24V DC power regulator minimizes effects of poor power supply
- Six-piston block design provides even flow for smooth operation of tool

Durability

- High-efficiency permanent magnet, direct drive motor enables continuous use and long service life
- Built-in thermal protection
- System components enclosed for protection
- IP Rating: IP54 on the Pump, IP67 on the Pendant
- Integrated heat exchanger minimizes heat buildup

Convenience

- Integrated calibrated pressure gauge
- Pendant and cord management system
- Draining oil not required for pump element maintenance
- Convenient oil fill port, oil level indicator and automatic breather

Torque Wrenches

The following wrenches are ideal for use with the XC Cordless Torque Wrench Pump:

Torque Wrench Series

S	W	RSL	DSX	HMT
S1500X	W2000X	RSL1500	DSX1500	HMT1500
S3000X	W4000X	RSL3000	DSX3000	HMT3500
		RSL5000	DSX5000	HMT7500

Larger wrenches will work with the pump, battery run time and application speed will be impacted.

10,000 psi	
6 feet long, 2 hoses	THQ702T
19.5 feet long, 2 hoses	THQ706T
39 feet long, 2 hoses	THQ712T

E-Series E-Pulse®, Electric Torque Wrench Pumps

E-Pulse Torque Wrench Pump

The Enerpac E-Pulse Torque Wrench Pump, through its innovative design, is ideal for high volume fastening applications where weight is a critical factor. Smart controls enable the motor to maintain constant power providing higher flow than "traditional" ½ hp pumps.

The durable aluminum housing, integrated heat exchanger and highly efficient permanent magnet motor minimize heat buildup in the toughest environments. The interactive pendant provides the operator a number of usage options for optimal efficiency. The E-Pulse Torque Wrench Pump is the pinnacle of bolting equipment.

E Series

Useable Reservoir Capacity:

0.8 gallon

Flow at Rated Pressure:

32 in³/minute

Motor Size:

0.85 hp

Maximum Operating Pressure:

10,000 psi

Interactive Torque Wrench Pendant

- User can set pressure and operate in manual or auto-cycle mode
- Intelligent Auto-Cycle enables press and release actuation to cycle wrench until final torque is achieved

* Pump model with multi-port manifold.

▼ TQ700E

- Optimized flow technology delivers up to 50% faster bolting than competing pumps
- Compact and lightweight design fits through tight openings and provides easy handling
- Built-in protection for controls, gauge, and pendant for job-site durability
- IP55 rating for superior dust and water protection
- Advanced brushless motor provides for quiet, continuous operation, high voltage tolerance, and low maintenance
- Heat exchanger prevents breakdown of oil during heavy usage in hot environments
- Simple pressure setting and convenient pendant control for hassle-free operation

▼ The TQ700E and the W-Series wrenches are a productive combination in wind applications.

Lightweight Electric Torque Wrench Pump

Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Page: 239

Pendant Control

The **TQ700** comes equipped with a 20-foot pendant cord which allows the user to pressurize the pump from a distance increasing productivity and speed of setup.

Four-Port Manifold

The **TQ700** offers an optional four wrench manifold as an accessory (TQM) factory installed. (Add suffix "M" at the end of the model number. For example: **TQ700EM**)

Twin Torque Wrench Hoses

Use Enerpac THQ700 series twin hoses with 10,000 psi torque wrenches and torque pumps.

10,000 psi	
6.5 feet long, 2 hoses	THQ702T
19.5 feet long, 2 hoses	THQ706T
39 feet long, 2 hoses	THQ712T

Gauge Overlay Kit

Gauge overlay kits are also available separately.

GT4015-Q includes overlays for all S-, W-, RSL-, DSX and HMT-Series Torque Wrenches.

Electric Torque Wrench Pump

TQ700 Series Pump Applications

The TQ700 Series pump is ideal for powering hydraulic wrenches for the Power Generation and Wind Markets.

Bolting speed is more complex than how much flow per minute the pump produces. The key is optimizing the flow rate across the entire bolting cycle. With more oil flowing at the right time and at the right volume, you achieve the optimized flow for a hydraulic bolting system.

The result of this optimized flow is more bolts tightened faster and a more productive work team.

Internal laboratory testing based on standard torquing procedure on a pipe flange with 14, 1 1/8" bolts.

TQ Series

Reservoir Capacity:

1 gallon

Flow at Rated Pressure:

30 in³/minute

Maximum Operating Pressure:

10,000 psi

IP55 Rating for Superior Dust and Water Protection

The IP Code (or Ingress Protection Rating) classifies and rates the degrees of protection provided against the intrusion of solid objects and water in mechanical casings and electrical enclosures.

An IP55 rating means the TQ700 offers complete protection against contact with mechanical and electrical components, and that dust will not enter in a sufficient quantity to interfere with the operation of the equipment.

The IP55 rating also means water jets sprayed against the TQ700 from any direction will not have any harmful effects.

Dimensions shown in inches.

SELECTION CHART

For Use with Torque Wrenches	Pressure Rating (psi)	Model Number ¹⁾	Useable Oil Capacity (gal)	Motor Size (hp)	Motor Electrical Specifications (Volt - Ph - Hz)	Sound Level (dBA)	Wt. (lbs)
All S, W, RSL, DSX & HMT-Series wrenches	10,000	TQ700B	1	1.0	115 - 1 - 50/60	82 - 85	68
	10,000	TQ700E ²⁾	1	1.0	230 - 1 - 50	82 - 85	66
	10,000	TQ700I ³⁾	1	1.0	230 - 1 - 60	82 - 85	66

¹⁾ All models meet CE safety requirements and all TÜV requirements

²⁾ European plug and CE EMC directive compliant

³⁾ With NEMA 6-15 plug

▼ The TQ700E and the W-Series wrenches are a productive combination.

▼ ZU4204TB-Q (Pro-Series) and ZU4204BB-Q (Classic)

Z Tough.
Dependable.
Innovative.
CLASSIC

- Features **Z-Class** high-efficiency pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1.7 hp universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, molded composite shroud protects motor and electrical components, while providing an ergonomic, non-conductive handle for easy transport
- Low-voltage pendant provides additional safety for the operator
- Relief valve adjustment range 1800 - 10,000 psi

Pro-Series

- LCD readout provides pressure and torque display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- Auto cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed. (Pump can be used with or without auto cycle feature.)

Back-lit LCD Display for Pro Series

Back-lit LCD and Pressure Transducer featuring Auto-Cycle Technology.

- Digital read-out and "Autocycle" setting
- "Auto-Cycle" setting easily programmable
- Torque wrench model is selectable
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges
- Easy-viewing variable rate display
- Display pressure in bar, MPa or psi

ZU4T Electric Torque Wrench Pumps

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides high by-pass pressures for increased productivity—important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4 Hydraulic Pumps are built to power small to large torque wrenches.

Classic Electric Torque Wrench Pump

- The Classic has an analog gauge and traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics.

The Classic delivers durable, safe and efficient hydraulic power.

Pro Series Electric Torque Wrench Pump

- Digital (LCD) display features a built-in hour meter, pressure and torque display, and shows self-diagnostic, cycle-count and low voltage warning information.
- AutoCycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed. (Pump can be used with or without AutoCycle feature).

ZU4T Series

Reservoir Capacity:

1.2 and 1.8 gallons

Flow at 10,000 psi:

60 in³/minute

Motor Size:

ZU4T Torque Wrench Pump Accessories

4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches

Skidbar

- Provides greater pump stability on soft or uneven surfaces
- Provides easy two-handed lift

Heat Exchanger

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components

Accessory Kit No.	Can be used on ZU4-Series torque wrench pumps
ZTM-Q ¹⁾	for 10,000-psi torque wrenches

¹⁾ For 4-Wrench Manifold add 6 lbs to pump weight

Accessory Kit No.	Can be used on ZU4-Series torque wrench pumps
SBZ-4	1.2 and 1.8 gallon ¹⁾
SBZ-4L	1.2 and 1.8 gallon ²⁾

¹⁾ Without heat exchanger 5 lbs.

²⁾ With heat exchanger 5.5 lbs.

Accessory Kit No.	Can be used with:
ZHE-U115	115V pumps
ZHE-U230	230V pumps

Heat Exchanger adds 9 lbs. to pump weight.

Roll Cage

- Protects pump
- Provides greater pump stability

Accessory Kit No. ³⁾	Can be used on ZU4-Series torque wrench pumps
ZRC-04	1.2 and 1.8 gallon reservoir ¹⁾
ZRC-04H	1.2 and 1.8 gallon reservoir ²⁾

¹⁾ For use with pumps without a heat exchanger fitted

²⁾ For use with pumps with a heat exchanger fitted

³⁾ For Roll Cage add 9.5 lbs to pump weight

Thermal Transfer *	Maximum pressure	Maximum oil flow	Voltage
Btu/h	(psi)	(GPM)	(VDC)
900	300	7.0	12

* At 116 in³/min at 70° F ambient temperature.

Do not exceed maximum oil flow and pressure ratings.

Heat exchanger is not suitable for water-glycol or high water-based fluids.

▼ These rigid steel wrenches with low-profile interchangeable hexagon cassettes guarantee durability and maximum versatility in bolting applications.

CLASS

Back-lit LCD Display

- Digital pressure or torque read-out
- Programmable "Auto-Cycle" setting
- "Auto-Cycle" setting easily programmable
- Torque wrench model is selectable
- Display torque in Nm or Ft.lbs
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges

- **Auto-Cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (Pump can be used with or without Auto-Cycle feature)**
- **LCD readout provides pressure and torque display and a number of diagnostic and readout capabilities never before offered on a portable electric pump**
- **Totally enclosed, fan-cooled industrial electric motors supply extended life and stand up to harsh industrial environments**
- **High-strength, molded electrical enclosure protects electronics, power supplies and LCD readout from harsh environments**

Bolting Integrity Software

Enerpac Bolting Integrity Software Solutions play a key role in implementing and managing an Integrity Program for bolted connections. The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet and Joint Completion Report. Custom Joint information can also be entered.

Lightweight and Compact

Torque Wrenches

Optimized for use with Enerpac Hydraulic Torque Wrenches.

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Page: 239

Improved Operator Efficiency and Ergonomics

- Easy to lift, transport and maneuver
- Hand carry where no crane, hoist or elevator is available
- One person transport up ladders and stairs
- Ideal for use on narrow or constrained scaffolding, catwalks, pipe racks and lifts

High Productivity

- Proven 3-piston design provides leading fastening and breakout speed to stay on time and under budget
- ATEX certified to meet worksite compliance requirements

Reduce Equipment Downtime

- Roll cage with reinforcement to support and protect FRL
- Rugged 1/2" air supply connection with integrated roll cage support
- Key components are easy to access and service

Standard Features

- 15 foot pendant cord for mobility around work site
- 4 inch calibrated gauge with certificate, scale in psi and bar
- Roll cage and FRL

Twin Torque Wrench Hoses

Use Enerpac **THQ700** series twin hoses with 10,000 psi pumps.

10,000 psi	
6.5 feet long, 2 hoses	THQ702T
19.5 feet long, 2 hoses	THQ706T
39 feet long, 2 hoses	THQ712T

ATEX Certified

The LAT-Series air-driven pumps are tested and certified according to the ATEX Directive 2014/34/EU.

The explosion protection is for Equipment Group II, Equipment Category 2 (Hazardous Area Zone 1), in Gas and/or Dust atmospheres.

Each LAT-Series air-driven pump contains the following markings: Ex IIC T4 Gc, Ex IIIC T135°C Dc

LAT-Series, Air Hydraulic Torque Wrench Pump

LAT-Series Hydraulic Torque Wrench Pump

The Enerpac LAT Torque Wrench Pump combines compact design and high productivity for bolting applications in areas hard to access with larger air powered pumps. Whether on an offshore platform, refinery or mine—anywhere in the world, the pump is built for the toughest

worksite environments. Featuring a proven Enerpac piston design, reinforced FRL support and air supply connection, the LAT will provide years of reliable service with fastening and breakout speeds to keep you on schedule and under budget.

LAT Series

Reservoir Capacity:
0.8 gallon

Useable Reservoir Capacity:
0.5 gallon

Flow at Rated Pressure:
25 in³/minute

Maximum Operating Pressure:
10,000 psi

▼ Rugged 1/2" air supply connection with integrated roll cage support

▼ Roll cage design supports and protects FRL

▼ Proven 3 piston design provides leading speed

▼ Skid Rail accessory bolts to bottom of reservoir to prevent wear from rough surfaces

ZA4T-Series, Torque Wrench Pump Options

Skidbar

- Provides greater pump stability on soft or uneven surfaces
- Provides two-handed lift

Accessory Kit No. *	Can be used on ZA4-Series torque wrench pumps
SBZ-4	1.2 and 1.8-gallon reservoir

* Add suffix **K** for factory installation. Skidbar weight 4.9 lbs.

Ordering Example:

Model No. ZA4208TX-QK

4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches
- Can be factory installed or ordered separately

Accessory Kit No. *	Can be used on ZA4-Series torque wrench pumps
ZTM-Q	for 10,000 psi torque wrenches

* Add suffix **M** for factory installation. Manifold weight 7.9 lbs.

Ordering Example:

Model No. ZA4208TX-QM

ZA4T Series

Reservoir Capacity:

1.2 and 1.8 gallons

Flow at 10,000 psi:

60 in³/minute

Air Consumption:

20 - 100 scfm

Maximum Operating Pressure:

10,000 psi

ZA4208TX-QR0P PowaPak™ Air Torque Pump

ZA4T Pump with stainless steel roll cage and certified lifting eye.

10,000 psi Spin-on Couplers

- Mounted on:
 - Torque wrench pumps with suffix "Q"
 - RSL, S and W-Series wrenches
 - THQ-Series hoses
 - 4-Wrench manifold ZTM-Q

Roll Cage

- Protects pump
- Provides greater pump stability

Accessory Kit No. *	Can be used on ZA4-Series torque wrench pumps
ZRC-04	1.2 and 1.8-gallon reservoir

* Add suffix **R** for factory installation. Roll bar cage weight 7.5 lbs.

Ordering Example:

Model No. ZA4208TX-QR

Twin Torque Wrench Hoses

Use Enerpac **THQ700** series twin hoses with 10,000 psi pumps.

10,000 psi	
6.5 feet long, 2 hoses	THQ702T
19.5 feet long, 2 hoses	THQ706T
39 feet long, 2 hoses	THQ712T

▼ HM10 Hydramax® Topside Tensioner

- Fifteen load cells from ¾" to 4" / M20 to M100
- Twin ports for quick connection of multiple tools
- High bolt-load capacity at maximum 21,750 psi (1500 bar)
- Long-stroke capability of 9/16 inch (15 mm) with over stroke elimination
- HM01 to HM05: mechanical over-stroke prevention, no spring return; HM06 to HM15: relief valve for over-stroke prevention, spring return
- Quick release bridge
- Stroke indicator
- Captive socket – eliminates falling object risk
- Interchangeable adapter kits available
- Anti-slip grip for more secure handling
- HM-Series HydraMax® Tensioners comply to following: Machine Directive 2006/42/EC, ASME B30.1, EN-ISO 4413:2010, EN-ISO 12100:2010

◀ Enerpac HM-Series HydraMax® tensioners have been designed to generate high-bolt loads associated with compact flanges, while providing versatility for maximum bolt coverage.

High Bolt Load Capacities, Superior Performance

HydraMax® Topside Tensioners

The HM-Series tensioners have been designed to fit all standard flanges, including ANSI, API and compact flanges based on Norsok L005 and generates 30% more load capacity than traditional tensioners.

Tensioning Pumps, Hoses and Couplers

High-pressure pumps, hoses and fittings matched for use with the Enerpac Bolt Tensioners. See enerpac.com

Page: 325

Ultra-High Pressure

This tool operates at ultra high-pressure, use only the specified fittings and hoses designed for these pressures.

How to Order HydraMax® Tensioners

To provide maximum flexibility, Load Cells are ordered separately from Adaptor and Bridge Kits. Example, to order a complete tensioner for a M24 x 3 threaded bolt order:

1 x Load Cell: **HM03-LC**

1 x Adaptor and Bridge Kit:
HM03BPM-NRS02430

Bolting Integrity Software

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet, and Joint Combination report. Custom Joint information can also be entered.

Page: 416

HydraMax® Topside Tensioners

Thread and Pitch Sizes

Contact Enerpac for different thread or pitch sizes. Alternative size adaptor kits can be supplied upon request.

Minimum Stud Protrusion

X = Minimum socket rotation 60°

HM Series

Bolt Range:

3/4" - 1 1/2" | M20 - M39

Maximum Load Capacity:

15.1 - 70.2 tons

Stroke:

0.39 - 0.59 inch *

Maximum Operating Pressure:

21,750 psi

* Stroke HM01 models 0.39 inch

Strokes all other HM-models 0.59 inch

▼ GT-Series Topside Bolt Tensioners

Accurate & Reliable Extreme Performance Bolt Tensioner

Tensioning Pumps, Hoses and Couplers

High-pressure pumps, hoses and fittings matched for use with the Enerpac Bolt Tensioners.

See enerpac.com

Page: **325**

- Seven load cells from 5/8" to 4 inches or from M16 to M105
- Twin ports for quick connection of multiple tools
- Only one size of bridge per size of load cell
- Detachable and rotational bridge simplifies tool positioning
- Full bridge window – increased access to socket
- Captive socket – eliminates falling object risk
- Piston stroke indicator
- Black surface treatment protects against corrosion
- Anti-slip grip for more secure handling
- Universal and multi-use tool
- GT-Series tensioners comply to Machine Directive 2006/42/CE, ASME B30.1, EN-ISO 4413:2010 and EN-ISO 12100:2010

How to Order

To provide maximum flexibility Load Cell and Bridges are ordered separately from Adaptor Kits.

Example, to order a complete tensioner for a M36 x 4 threaded bolt order:

1 x Load Cell and Bridge: **GT2-LCB**

1 x Adaptor Kit: **GT2PM-NRS03640**

Load Cell and Bridge Model Number*	Thread Size	Adaptor Kit Model Number	Cylinder Effective Area (in ²)	Maximum Load Capacity (ton)	Dimensions (in)							Load Cell and Bridge Weight (lbs)	Adaptor Kit Weight (lbs)

▼ Aquajack® Tensioner EAJ2LC with Quick Fastening Nut

- Compact design
- Long piston stroke
- Misalignment compensation
- Quick, simple hose connection
- Visible piston stroke indication
- 'No spill' overstroke elimination
- Quick fastening or solid reaction nut

▼ Guaranteed to save time and increase efficiency, Aquajack® tensioners improve diver safety, productivity and reduce diver fatigue.

The Most Cost-Effective Solution to Subsea Bolt or Stud Tightening

Quick Fastening Nut Design

Easily positioned in poor visibility conditions, Aquajack® subsea tensioners feature a

compact design and long piston stroke. The unique Split Nut® design of these tools allows rapid application to long bolts and damaged threads, and rapid tool removal.

No Oil Spillage or Over-Strokeing

Innovative tool design ensures maximum tool strokes can be used without over-stroking the piston or oil spillage. Guaranteed to save time and increase efficiency, Aquajack® subsea tensioners improve diver safety, productivity and reduce diver fatigue.

Hose Reel and Stand

Stainless steel stand with 21,750 psi hoses from 100 ft. up to 800 ft. lengths. All hose reels are built up with multiple 98 ft. length hoses.

PGT Series, Power Generation Bolt Tensioners **ENERPAC**

▼ PGT-Series Single-Stage and Double-Deck Tensioners

High Precision, Low Maintenance

Tensioner Pumps

Electric, pneumatic and manual high-pressure tensiing pumps are available for use with Enerpac hydraulic tensioners.

Page: 239

Hoses and Fittings

High-pressure hoses and fittings for use with Enerpac tensiing systems are available.

Page: 325

- PGT-Series Bolt Tensioners are designed for critical fastening applications in wind, steam and gas turbines
- A broad range of single stage and double deck tensioners provide high performance in tight spaces associated with Power Generation applications
- PGT-Series Bolt Tensioners are loaded with performance enhancing features such as Auto-Retract Pistons, Cycle Counters and a premium coating to offer the ultimate in efficiency, durability and ease of use

Description	PGTS Single Stage	PGTD Double Deck
Auto-Retract Piston	✓	✓
Zinc Coating	✓	✓
Geared Nut-Rundown	✓	✓
Over-stroke Indicator	✓	✓
Over-stroke Preventer	✓	✓
Single Male Fitting	✓	✓
Swivel Manifold	+	+
Cycle Counter	-	+

✓ = Standard on tensioner

⊕ = Possible option

- = Option not available

- 1. Auto-retract piston:** Simplifies use and improves speed of operation.
- 2. Long-life puller:** For maximum durability.
- 3. Long-life seals:** For maximum durability and extended service life intervals.
- 4. Corrosion protection:** Zinc coating provides best-in-class corrosion resistance.
- 5. Interchangeable bridge:** For optimal application fit.
- 6. Over-stroke preventer:** Mechanically prevents over-stroke, extending cylinder life.
- 7. Over-stroke indicator:** Extends cylinder life by helping to prevent over-stroking of cylinder.

- 8. Optional counter:** Helps indicate when maintenance is due to maximize uptime.
- 9. Quick-disconnect coupler:** For safe, simple hydraulic connection.
- 10. Optional 360° swivel:** available for additional hose positioning flexibility.
- 11. Spring-loaded nut engagement:** Keeps socket positioned on nut for faster and easier seating process.
- 12. Auto-engage nut rundown:** For rapid and accurate seating of nuts.

▲ The model above illustrates a typical tool configuration. Actual model configurations vary.

PGT-Series, Power Generation Bolt Tensioners

Options

Fitting Type

SW = Swivel manifold with single male fitting
Example: **PGTS2436SW**

Cycle-Counter

C = Cycle Counter (not available on PGTS-models)
Example: **PGTD3655SWC**

- ① Puller bar square drive
- ② Swivel manifold with single male fitting
- ③ Single male fitting
- ④ Nut run down gear box

PGT Series

Bolt Range:

M20 - M72

Load Range:

23 - 334 tons

Maximum Operating Pressure ¹⁾:

19,575 - 21,750 psi

¹⁾ Max. Pressure varies, see specification table for details.

▼ FTR-Series Foundation Bolt Tensioner

High Precision, Low Maintenance

FTR-Series Foundation Bolt Tensioners

FTR-Series Foundation Bolt Tensioners are designed specifically for tensioning wind tower foundation bolts. These tensioners provide the speed and precision required by this critical application.

Potential thread fit problems are eliminated through the use of existing rebar hex nuts as a reaction point.

The FTR-Series includes long-stroke models, which provide greater speed and ease of use by enabling applications to be completed in a single pull.

- **FTR-Series Foundation Bolt Tensioners provide fast, accurate and easy tightening of external or internal ring wind tower foundations**
- **Standard models are available for 75, 150 ksi and metric style Williams, Dyson and Macalloy® bar types**
- **Long-stroke options accelerate process with single-pull tensioning**

- 1. Corrosion protection:**
Zinc coating provides best-in-class corrosion resistance.
- 2. Over-stroke indicator:**
Extends life by helping to prevent over-stroking of cylinder.
- 3. Long-life seals:**
For maximum durability and extended service life intervals.
- 4. Auto-retract piston:** Simplifies use and improves speed of operation.
- 5. Quick-disconnect coupler:** For safe, simple hydraulic connection. *OPTIONAL 360° swivel available for additional hose positioning flexibility.*
- 6. Interchangeable bridge:**
For optimal application fit.

▼ FTE-Series Elliptical Foundation Tensioner

High Precision, Low Maintenance

FTE-Series, Foundation Bolt Tensioners

Similar to Standard Foundation Tensioners, Elliptical Tensioners were designed specifically for foundation fastening applications on wind towers, and utilize the existing hex nut as a reaction point in order to eliminate thread fit misalignment.

Unlike Standard FTR-Series Tensioners, FTE-Series Tensioners feature an elliptical geometry, which enables fit in narrow access foundation applications, without reducing load capabilities.

Operators may access the nut with a Tommy bar rather than employing the use of an offset rundown gear.

Elliptical tensioners are ideal for close clearance applications, or as a universal tool that will work in nearly any foundation application, whether standard or narrow access.

- **FTE-Series Foundation Bolt Tensioners provide fast and accurate performance in difficult, narrow access foundation tensioning applications**
- **Standard models are available for 75, 150 ksi and metric style Williams, Dyson and Macalloy® bar types**
- **Ideal universal solution that fits both standard and narrow access applications**

1. **Max. stroke Indicator:** Extends life by helping to prevent over-stroking of cylinder.
2. **Long-life seals:** For maximum durability and extended service life intervals.
3. **Auto-retract piston:** Simplifies use and improves speed of operation.
4. **Elliptical form:** Provides access to close clearance applications.
5. **Corrosion protection:** Zinc coating provides best-in-class corrosion resistance.
6. **Quick-disconnect coupler (not shown):** For safe, simple hydraulic connection. *OPTIONAL 360° swivel available for additional hose positioning flexibility.*

Tensioning Every Single Stud in a Joint Simultaneously

▲ *Multi Stud Tensioning Set-Up.*

MULTI STUD TENSIONERS

Enerpac Multi-Stud Tensioning (MST) systems are capable of tensioning every single stud in a joint simultaneously. By applying a predictable and accurate pre-load to all studs, problems associated with conventional bolt tightening techniques are avoided. Typical Enerpac Multi-Stud Tensioning applications include:

Manway, Hand Hole & Inspection Covers

MST systems are the fastest and most accurate means of loosening and tightening studs on Primary and Secondary Manway Covers, Hand-Hole and Inspection Ports in nuclear facilities. Using special ram areas and strong lightweight materials, the MST's reduce bolting time by as much as 75%.

Coolant Pump

A custom slimline tensioning system for a Nuclear Reactor Coolant Pump, using six equally spaced tensioners and tightening studs in four passes, has reduced bolting times by 25% and significantly increased tensioning accuracy.

Wind Turbine Blade Assembly

Using an Enerpac MST has allowed wind turbine blade assembly times to be reduced by approx. 65% while bolt load accuracy and consistency have improved, resulting in better joint life and reduced maintenance requirements. The MST, comprising four tool segments, is capable of simultaneously tensioning up to 88 bolts connecting a 125 ft. long blade to a bearing slew ring.

MST - Multi-Stud Tensioners

This tool can be custom designed, and built, for virtually any nuclear facility. We specialize in addressing difficult projects that demand accurate loads within tight space envelopes, while also seeking ease of operation and performance.

- Designed in segments enabling the operator to easily and quickly connect each segment to the joint and link together to provide simultaneous loading.
- Very accurate and fast closure system for large tensioning applications on pumps, valves, and steam generators, for example.
- For ease of handling on-site, Enerpac MST systems can be supplied with an integral lifting frame and trolley.

ATP-Series Ultra High-Pressure Air Pump

▼ ATP1500

- General purpose, high-pressure air-driven pump unit for products requiring up to 21,750 psi hydraulic pressure
- Compact, lightweight, rugged steel frame for protection and easy handling
- Prelubricated pump element, does not require an air line lubricator
- Easily adjustable output pressure control
- Integrated and protected easy-to-read glycerine-filled gauge
- Safety relief-valve limits output pressure
- ATEX Certified

The ATP-series pump is tested and certified according to the Equipment Directive 94 / 9 / EC "ATEX Directive". The explosion protection is for equipment group II, equipment category 2 (hazardous area zone 1), in gas and/or dust atmospheres. The ATP-series pump is marked with: Ex II 2 GD ck T4.

**ATP
Series**

IBExU 070/10

Reservoir Capacity:

1.0 gallon

Flow at Rated Pressure:

4 in³/min.

Maximum Operating Pressure:

21,750 psi (1500 bar)

Ultra High-Pressure

These pumps operate at ultra high-pressure, use only the specified fittings and hoses designed for these pressures.

Page: 325

Applications

The ATP-pump is ideally suited for use with HM and GT-Series hydraulic bolt tensioning tools and hydraulic nuts.

Bolting Integrity Software

Visit www.enerpac.com to access our free on-line bolting software application and obtain information on tool selection, bolt load calculations and tool pressure settings. A combined application data sheet and joint completion report is also available.

Page: 416

- High-efficiency Universal Motor draws lower amps for superior performance in remote locations with low power quality
- Two-stage pump design provides high flow at low pressure for fast system fills and controlled flow at high pressure for safe and accurate operation
- Compact and lightweight design fits through tight openings and provides easy handling
- Panel mounted 6" pressure gauge, with polycarbonate cover, is set into the protective metal shroud for improved visibility and safety
- Easily accessible manual override valve to release pressure if power is lost
- Safety relief valve limits output pressure

◀ The ZUTP1500 pump is rugged, lightweight, compact for tight openings, and delivers hassle-free operation of bolt tensioning in remote locations with up to two times the speed of competitive pumps.

Electric Tensioning Pump

ZUTP-Tensioning Pumps

The ZUTP-Series of pumps achieve high pressure without the need for an intensifier. This allows for low maintenance, resulting in less cost for the end-user.

ZUTP-S with Solenoid Valve

The **ZUTP1500-S Series** with pendant-operated solenoid valve is ideal for multiple bolt tensioning applications as it allows for single-person operation. The operator can pressurize and depressurize the tensioner directly from the pendant.

The highly adjustable reach of the wing and drop leg on the ATM4 and ATM9 allows precise alignment.

Gauge and Adaptor

The ATM9 includes P142 hand pump and HC7206C 6 ft. long hose. Enerpac recommend the use of the pressure gauge **GP10S** and gauge adaptor **GA4** for easy mounting of the gauge onto your system or use GA45GC Gauge Adaptor Assembly.

- Enerpac ATM-Series tools rectify twist and rotational misalignment quickly, safely, and without the need for an external power source
- Appropriate for use on most ANSI, API, BS and DIN flanges
- No slings, hooks or lifting gear required
- Can be installed and used in any position (horizontally or vertically)
- Portable, lightweight design enables easy transport and use, even in remote locations
- Stays stable in position under full load
- Reduces set-up time: no need for chains, pulleys or rigs
- Safety strap helps provide secure operation
- Each ATM-model contains a tool and kit box

▼ The compact ATM2 is actuated by simply hand turning the crank.

▼ The ATM9 is shown here with optional pressure gauge and gauge adaptor.

Applications

Enerpac ATM-Series Tools help correct flange misalignment, and allow bolts to be placed into joints. This alignment takes place during pipework construction, or maintenance.

These tools provide pipe installers and maintenance personnel with some of the simplest, safest and most productive solutions available for flange alignment in the market today.

- ① Extendable wing provides usage on wide variety of flanges.
- ② Portable, light weight design enables easy transport and use.
- ③ Hand-adjustable base for easy positioning by a single operator.
- ④ Safety strap helps provide secure operation from a horizontal or vertical position.

ATM2

4	40	ATM4	0.95	24	1.18 - 5.23	30 - 133	19
10	90	ATM9**	1.40	35,5	3.66 - 9.00	93 - 228	32

* At 10,000-psi maximum operating pressure.

** ATM9 includes an Enerpac hand pump and hydraulic hose (gauge and adaptor sold separately). ATM9 weight includes tool only.

ATM Series

Minimum Bolt Size:

0.63 - 1.40 inches

Flange Wall Thickness:

0.55 - 9.00 inches

Maximum Lifting Force:

1 - 10 tons

Cylinder-Pump Sets

Hydraulic cylinders, jacks and lifting wedges can also be used to assist in pipe line positioning and aligning.

Page: 63

Pipe Flange Face Tool

The portable, hand powered tool FF120 makes even the hardest to reach pipe flanges resurfaceable in a safe and convenient way.

Page: 340

▼ The ATM-Series – the faster, simpler and safer way to align flanges.

▼ FSC14, FSM8 and FSH14 with Safety Blocks SB1

- Integrated wedge concept: friction-free, smooth, parallel wedge movement eliminates flange damage and spreading arm failure
- Unique interlocking wedge design: no first step bending and risk of slipping out of joint
- Requires very small access gap of only 0.24 inch (6 mm)
- Stepped spreader arm design: each step can spread under full load
- Few moving parts means durability and low maintenance
- Safety block SB1 included with FSC14, FSH14 and FSM8
- Ratchet spanner SW22 included with FSM8 mechanical spreader
- Single-acting cylinder included with FSH14 hydraulic spreader

Practical, Portable and Lightweight

FSC14 with Integrated Hand Pump

Powered by a built-in hydraulic hand pump, the FSC14 is a ready-to-use tool – no making or breaking hydraulic connections. This compact tool delivers 14 US tons of force and requires a clearance gap as small as 0.24 inch.

Stepped Blocks FSB1

Use this pair of stepped blocks to increase wedge opening up to 3.16 in. (80 mm). Fits **FSC**, **FSH** and **FSM** models.

AM-Series Control Manifolds

For simultaneously and even spreading of flange joints, 180° apart with FSH14.

152

Flange Maintenance Tools

Secure-Grip flange spreading tools for application on flanges with a small gap.

Page: 352

◀ Two FSH14 spreaders used simultaneously with Enerpac handpump, hoses and AM21 control manifold.

Flange Spreading Wedges

Flange Spreading Wedges

The flange spreading tools have been developed to aid and simplify the maintenance of flange joints. No longer will those tasked with separating flanges have to rely on using ropes and pulleys, podgers, tirsors, come-alongs or hammers – there is a safe, quick and effective alternative, the Enerpac range of

spreaders. These spreaders use mechanical and hydraulic principles for separating flanges and can spread small, medium or large flange joints. Tool selection is made on the basis of the access gap between the flange faces, the flange size and the required scope of work.

FSC, FSH, FSM Series

Tip Clearance / Maximum Spread¹⁾:
0.24 / 3.16 inches

Maximum Spread Force:
8 - 14 tons

Maximum Operating Pressure:
10,000 psi (FSH-14)

Safety Lanyard FSC1

Recommended safety accessory to compliment the safe hands-free bolting. Includes steel cable with carabiners.

Tool Pump Sets

The hydraulic flange spreader is available as a **set** (pump, tool, gauge, gauge adaptor, couplers and hose) for your ordering convenience.

Spreader Model No.	Hand Pump Model No.	Set Model Number

High-Pressure Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 325

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 162

▼ Enerpac hydraulic nut splitters – the safest and easiest way to remove corroded and frozen nuts

Single-Acting Hydraulic Nut Splitters

Frozen or Corroded Nuts

Often nuts are difficult to remove, while loosening using tightening tools is possible, it generally requires larger equipment and is time consuming.

The use of cutting torches or hammers and chisels can cause damage to the joint components, requires significantly longer setup and operational time, and can present a potential safety risk.

Hydraulic Nut Splitters

Nut splitting with the Enerpac Hydraulic Nut Splitters is the safest method. It takes less time and avoids costly damage to joint components. The head design fitted with heavy-duty chisels permits the splitting of nuts on a wide variety of applications. With the two blade models nuts are split from two sides in one action.

Ordering Notes: Maximum allowable hardness to split is HRC-44. Not to be used on square nuts or stainless steel.

* Available as Tool-Pump set, see note on page 334.

▼ Shown from left to right: NSH1927, NSC1927

Designed to Meet the Challenges of Bolted Pipeline Flange Joints

NSC-Series Nut Splitters with Integral Hand Pump

Powered by a built-in hydraulic hand pump, the NSC-Series are a ready-to-use tool – no need for hose, separate hand pump or couplings.

Carrying Case

Nut splitters (up to NSH6575) come in a carry case for portability and easy storage.

Safety Lanyard FSC1

Standard Safety Lanyard with each nut splitter. Includes steel cable with carabiners.

- NSC-Series with built-in small hand pump – useful for subsea applications and working at heights
- Quick and easy cutting tip replacement
- Drop-tested revolving anchor point and safety lanyard
- Revolving composite handle for vibration and shock isolation
- Nut Splitters include set of hexagon keys and following spare parts:
 - cutting tip
 - tip retention screw
 - spare alignment screw
- CR400 female half coupler is standard (NSH)

▼ The sharp cutting tip and opposing convex reaction point encourages more efficient splitting by spreading the nut open rather than squashing the nut onto the stud. This makes it easier to rotate the nut for the second cut.

Single-Acting Integral & Hydraulic Nut Splitters

Frozen or Corroded Nuts

Often nuts are difficult to remove, while loosening using tightening tools is possible, it generally requires larger equipment and is time consuming.

The use of cutting torches or hammers and chisels can cause damage to the joint components, requires significantly longer setup and operational time, and can present a potential safety risk.

Hydraulic Nut Splitters

Nut splitting with the Enerpac Hydraulic Nut Splitters is the safest method. It takes less time and avoids costly damage to joint components. The head design fitted with heavy-duty chisels permits the splitting of nuts on a wide variety of applications. With the two blade models nuts are split from two sides in one action.

**Versatile, reliable
and trouble-free
operation**

- Designed to fit standard BS/ANSI flanges
- Blade positioning scale to eliminate bolt damage
- Adjustable cutting depth
- Ergonomically designed and positioned handle
- Interchangeable power heads with cutting blade
- Single-acting spring return power head (NSPH)
- Double-acting power head (NSPH-D):
– for subsea operation
- Nut splitters include spare chisel, spare set screw and wrench used to secure the chisel
- CR400 female half coupler standard on NSPH
- CR400 + CH604 couplers standard on NSPH-D

ATEX certified

- All NSH-tools are CE - ATEX certified

Blade Positioning Scale

The power head can be adjusted to preset the blade cutting distance in order to prevent damage to the bolt thread as the nut is cut.

The blade positioning scale can be used with the following bolt and nut forms:

- Unified bolt threads (UN) with heavy series hexagon nuts
- Metric bolt threads (M) with standard series hexagon nuts

Steel Hand Pumps

The P80 and P84 two-speed hand pumps are ideal to operate nut splitters. The P84 can be used to power the double-acting tools.

Page: 88

High-Pressure Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 325

Single- and Double-Acting Hydraulic Nut Splitters

Hydraulic Nut Splitters

These Hydraulic Nut Splitters are the ideal tools for removing seized and corroded nuts, eradicating the need for unsafe grinding or flame cutting.

They are designed with a single acting spring return cylinder and boast a 360 degree rotation, lockable handle improving operator safety.

The heavy-duty blades can also be easily removed to enable replacement blades to be fitted.

Operator Safety

To improve operator safety an ergonomic, adjustable handle is available which can be easily fitted to the Nut Splitter.

This lightweight, durable accessory can prevent injuries such as trapped fingers by eliminating the need to hold the tool itself.

ATEX Certified: Ex II 2 G c T6

These Nut Splitters are tested and certified to conform to the 94/9/EC "ATEX Directive".

The explosion protection is for Equipment Group II, Equipment Category 2 (Hazardous Zone Area 1) in Gas and/or Dust atmospheres.

NSH Series

Bolt Range:

1 $\frac{3}{4}$ - 3 $\frac{1}{2}$ inches

▼ FF120

- Refacing made easy — hand-operated machine tool can be set up anywhere without the need for air, electric or hydraulic power support
- Lightweight and portable — easily transported to remote locations for increased productivity
- Adjustable cutting range for flange diameters between 1-12 inches [25,4-304,8 mm]
- Interchangeable collets for ID mounting range from 1-6 inches allowing the user to work on many different flanges with minimal time between set-ups
- Interchangeable lead screws suitable for refacing damaged raised-face (RF) or flat-face (FF) joint flanges
- Tool body with expanding collets centers itself providing real concentric operation

Safe, Efficient and Accurate Refacing of Flat Pipe Flange Surfaces

Complete In-Wheeled Carrying Case

The **FF120** comes as portable set 33 lbs. (15 kg). Can be transported,

easy set-up and operated by a single technician.

Set includes:

- **FFL**-kit with locators, O-Rings and extensions
- **FSS**-kit with feed screw and nut ½"-20 UN for surface roughness Ra 64 - 96 µin.
- **FSF**-kit with feed screw and nut ½"-11 UNF for surface roughness Ra 125 - 250 µin.

Joint Separation Tools FSC, FSH and FSH-Series

parallel wedge spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 332

Flange Alignment Tools

The **ATM-Series** provide safe and high-precision flange alignment tools that fit most commonly used ANSI, API, BS and DIN flanges.

Page: 330

Controlled Tightening and Loosening

Use Enerpac Bolting Tools to seal the joint to the precise torque or tension required: torque multipliers, torque wrenches and hydraulic bolt tensioners.

Page: 239

▼ The Enerpac FF120 used to face a pipe flange.

Quick Face, Mechanical Flange Face Tool

Mechanical Flange Face Tool

Portable, hand powered tool makes even the hardest to reach pipe flanges resurfaceable in a safe and convenient way.

Makes Refacing Easy

A simple and cost effective solution – the FF120 turns a two man operation with heavy equipment, compressors and portable generators into a one man job.

The FF120 has interchangeable lead screws that make it suitable for resurfacing damaged flat-faced, raised-face or lens-ring joint flanges to the high safety standards required. After selecting the correct lead screw for the operation, the tool body is inserted in the pipe end and centres itself with adjustable locators to provide real concentric operation.

The tool arm is then rotated by hand using a worm-gear mechanism to provide a perfect spiral “gramophone” finish.

The tool can be adjusted with a calibrated slide to define cut depth and the correct finish.

Surface Finish and Accuracy

A serrated finish with 30-55 grooves per inch and a resultant roughness of between Ra 125-492 micro inches (3,2-12,5 µm).

The FF120 has same precision and quality of finish as a lathe.

Cost-effective Solution

Small and portable enough to be a permanent addition to your equipment range, Enerpac's FF120 is the perfect solution to all of your small diameter facing problems.

For more portable machining tools, see page 379.

FF Series

Pipe Flange Cutting Diameter Range:

1 - 12 inch (25-305 mm)

Internal Pipe Mounting Diameter Range:

1 - 6 inch (25-152 mm)

Average Roughness:

125 - 492 µin (3,2-12,5) µm

- 1 Hand-operated cold work tool – no need for external power and hot work permits.
- 2 Calibrated cross slide for accurate cutting control.
- 3 Adjustable cutting head for reface of flat flange surfaces of pipes with flange OD facing range \varnothing 1-12 inch [25,4-304,8 mm].
- 4 Interchangeable lead screws enable selection of surface finish between Ra 125-492 µin.
- 5 Utilizes standard 3/8 inch or 10 mm tool steel.
- 6 Range of interchangeable collets allow the tool to accommodate \varnothing 1 - 6 inch [25,4 - 152,4 mm] pipe ID.
- 7 Tool body with expanding collets centers in the bore ensuring concentric and accurate set-up.

Dimensions shown in inches.

▼ TOOL SELECTION CHART

Pipe Flange Cutting Diameter Range		Internal Pipe Mounting Diameter Range		Cutting Result Roughness (Ra µ)		Model Number	Wt.
(in)	(mm)	(in)	(mm)	(in)	(m)		(lbs)
1.0 - 12.0	25,4 - 304,8	1.0 - 6.0	25,4 - 152,4	125 - 492	3,2 - 12,5	FF120	15

▼ The Enerpac FF120 Quick Face has same precision and quality of finish as powered machines.

The Equalizer range of patented flange spreading tools have been developed to aid and simplify the maintenance of flange joints. No longer will those tasked with separating flanges have to rely on using ropes and pulleys, podgers, tirsors, come-alongs or hammers – there is a safe, quick and effective alternative, the Equalizer range of

SWi Flange Spreading Wedges

An innovative flange spreading wedge for use on small, medium or large flange joints with a minimum access gap of 0.16 inch. The SWi range includes ATEX approved options.

The SWi range has set the new standard for spreading flange joints powerfully, efficiently, effectively and safely. The tools offer the following features and benefits:

- Wider spreading - using the Standard Stepped Block accessories means the SWi range offers up to 30% more flange spreading distance than a traditional SW tool.
- Unrivalled power - the tools now offer up to 27 ton of spreading force when used in pairs, which provides additional confidence when spreading.
- Narrower jaws - the SWi5TE tools are only 1.97 inches wide to help them fit more easily between flange bolts.
- Fully rotational handle – the handle swivels 360° around the wedge head, so that the SWi tools can be used comfortably in all orientations.
- Easier maintenance – end-users will appreciate the ease with which the tools can be maintained. The supplied hex-key and a two-step process is all that's required to disassemble and reassemble the tools.
- No pinch points – the SWi range of tools has been engineered to overcome finger pinch-points.

spreaders. These spreaders use mechanical and hydraulic principles for separating flanges and can spread small, medium or large flange joints. Tool selection is made on the basis of the access gap between the flange faces, the flange size and the required scope of work.

MG Flange Spreading Tool

A mechanical tool for small diameter, low pressure flanges with a minimum access gap of 0.08 inch.

For use on smaller, lower pressure flange joints, this portable and flexible tool can be assembled in two alternative configurations that gives it twice the application range from one tool. The tool is locked onto the flange joint by the spreading bar preventing the risk of it falling from the flange joint.

SG Flange Spreading Tools

A unique flange spreader that is ideal for situations where there is no access gap or where there is a spacer, a wafer or butterfly valve positioned between the flanges.

Unique Secure-Grip tools spread by locking into the flange bolt holes and pulling the mating flanges away from each other, the Secure Grip flange spreaders are locked on to the flanges when under load making them arguably the world's safest flange spreading tools.

VC Valve Change-Out Tools

Using the same technology as the SG flange spreaders, the VC range has been developed for valve removal applications.

The VC Range of Valve Change-Out tools has been developed to assist in the removal of valves, spades/spacers or gaskets from large flange joints. The span of the tool is longer than a standard Secure-Grip Flange Spreader and is adjustable to enable the tool to operate in a range of applications.

Flange Maintenance Tools – Overview

SWi Series

FLANGE
SPREADING WEDGES

Spreading Force:

8.7 - 27 tons

Spreading Distance:

0.16 - 4.1 inches

Maximum Operating Pressure:

10,000 psi *

* Only relevant for hydraulic tools

CAUTION

A minimum of two Flange Spreading Tools must be used when opening flange joints.

This will enable the operator to maintain an equal spreading distance across the flange faces.

- Practical, portable and lightweight
- Revolving handle to aid horizontal or vertical spreading
- Removable handle for improved access
- No finger pinch point
- Increased step-depth on upper steps
- Safety lanyard length, 39 inches
- Forged key components for strength and reliability
- Rapid disassembly and assembly
- Narrow jaw teeth – improved tool wear

These tools have been designed for use in potentially explosive atmospheres which is:

- Group II (Non-mining equipment)
- Equipment **category 2** where explosive atmosphere is likely to occur in normal operation
- Can be applied in **zones 1** and **2** of gaseous explosive atmospheres and in **zones 21** and **22** of dust explosive atmosphere
- **Gas G** or **Dust D** with type of protection **Ex h** for non-electrical equipment
- Suitable for use with **Group IIB** of a gases and vapours (Ethylene group) and **Group IIIC** of dust (conductive dust)

- For hydraulic tools **T5** means that minimum ignition temperature of gas or vapor **>212°F**; **T212°F** means that minimum ignition temperature of a dust cloud **≥302°F** and minimum ignition temperature of a 0.2 inch (5mm) dust layer **≥347°F**
- For mechanical tools **T6** means that minimum ignition temperature of gas or vapor **>185°F**; **T185°F** means that minimum ignition temperature of a dust cloud **≥261.5°F** and minimum ignition temperature of a 0.2 inch dust layer **≥ 320°F**

These tools have been designed and manufactured in accordance with the following transposed harmonized European standards:

- **EN ISO 80079-36:2016** Explosive atmospheres - Part 36: Non-electrical equipment for explosive atmospheres - Basic method and requirements;
- **EN ISO 80079-37:2016** Explosive atmospheres - Part 37: Non-electrical equipment for explosive atmospheres - Non-electrical type of protection constructional safety "c", control of ignition sources "b", liquid immersion "k"

▼ SG11TM

Flange Spreading Tools

- For use on all flange types with bolt-hole sizes ranging from 0.69 inches to 2.44 inches
- Unique expanding collet technology
- Little or no access gap required
- Secure bolt-hole locking mechanism

OPERATING BENEFITS

- Time-saving, simple operation
- Measurable, controlled flange spreading force
- Virtually universal, the Secure-Grip Flange Spreader range covers ANSI, DIN, SPO, ASME, API and BS flanges

Range of Application

For a detailed range of application please request the Secure-Grip Mechanical or Hydraulic Operator Instruction Sheet.

CAUTION

A minimum of two Flange Spreading Tools must be used when opening flange joints.

This will enable the operator to maintain an equal spreading distance across the flange faces.

Valve Change-Out Tools

CAUTION

A minimum of two Flange Spreading Tools must be used when opening flange joints.

This will enable the operator to maintain an equal spreading distance across the flange faces.

The Actuator and Extension

Subassembly can be assembled into 4 different configurations to suit a variety of applications. For a detailed range of application please request the VC10 Operator Instruction Sheet.

- Assists in the removal of wafer/butterfly valves, spades/ spacers or gaskets from large flange joints
- Tool span is longer than a standard Secure-Grip Flange Spreader
- Adjustable to enable the tool to operate in a range of situations

PATENTED SECURE-GRIP SYSTEM:

- Unique expanding collet technology
- Secure bolt-hole locking mechanism
- Unique technology makes the Secure-Grip arguably the safest flange spreader for maintenance tasks involving the removal/ inserting of Valves and Blinds
- Virtually universal, the Secure-Grip Flange Spreader range will cover ANSI, DIN, Norsok L005, ASME, API and BS Flanges
- Time-saving, simple operation

Collet Sizing

It is important that the correct size of collet is used. An undersized collet could allow the collet holder to pull through its bore. An oversized collet has the potential to become jammed in the bolt-hole.

Range of Application

For a detailed range of application please request the Hydraulic Secure-Grip Valve Change-Out Tool Operator Instruction Sheet.

▼ MG7TM

MG Series

FLANGE
SPREADING TOOL

Spreading Force:

7.6 tons

Spreading Distance:

0.08 - 1.06 inches

Range of Application

For a detailed range of application please request the MG7TM Operator Instruction Sheet.

CAUTION

A minimum of two Flange Spreading Tools must be used when opening flange joints.

This will enable the operator to maintain an equal spreading distance across the flange faces.

- Reversible leg design giving greater range of applications
- Unique double-angled wedge produces a greater spreading force without reducing spreading distance
- Robust lightweight tool
- Spreading force of 7.6 ton

OPERATING BENEFITS

- Locks on to flange joint
- Safe, quick and easy operation
- Saves time and cost

MG7TMSTD Standard Kit

1 x MG7TM Tool
2 x Spreading Bar
1 x Moulded Plastic Carry Case

Tool retracted and advanced using large (Ø 0.8 in) spreading bar

Flange Pulling Tool

▼ FC10TE

FC Series

FLANGE
CLOSING TOOL

Closing Force:

11.2 tons

Closing Distance:

22.4 - 0 inches

Maximum Operating Pressure:

10,000 psi

CAUTION

A minimum of two flange closing tools must be used when flange pulling. This will enable the operator to maintain an even gap between flange faces and prevent flange / gasket damage.

- Applicable to all flanges with a bolt-hole diameter of 1 inch or greater, including ANSI, DIN, Norsok L005, ASME and BS flanges
- Slide and lock collet system
- Low profile tool
- Can be used on all vertical and horizontal flanges including ANSI, API, BS, DIN & Norsok L005
- Robust yet lightweight
- Subsea compatible
- Reciprocating hydraulic action

OPERATING BENEFITS

- Reduction in operator fatigue
- Reduction in pinch point
- Quick and easy to use

HYDRAULIC SEALED
HAND PUMPS

Maximum Pressure Rating:

1st Stage: 197 psi
2nd Stage: 10,000 psi

Pump Type:

2-Speed

Pump Ratings

The Hydraulic Single Port, Twin Port and Double-Acting Hand-Pump (and hoses) are tailored for use with hydraulic equipment.

Each pump's output is regulated to 10,000 psi and is delivered from threaded 3/8" NPT output ports. The pumps and hoses can be used with any 10,000 psi rated hydraulic equipment within their oil capacity specification. The HP range of hydraulic hand-pumps have been designed with a seal oil reservoir, which allows the pumps to be used in any orientation without the risk of oil spills or air contamination.

Enerpac's Heavy-Lifting Technology provides customers with tailored solutions, combining hydraulics, steel fabrication and electronic controls for safe, precise movement of heavy loads. Global Leader providing best in class solutions for safe and precise positioning of heavy loads.

With more than 60 years supporting industrial markets, Enerpac has gained the unique and in-depth expertise that is respected by industrial professionals around the world. Across every continent, Enerpac's network of application engineers, authorized distributors and technical service centers can reach any location, and deliver innovative solutions, technical assistance and quality products.

Enerpac's complete line of standard and customized products and a unique systems approach offers the benefits of safety and efficiency to applications where high forces are required.

Whether constructing a signature bridge across a deep valley, lifting a national landmark for seismic retrofit or simultaneously testing hundreds of foundation pilings to support a new building, Enerpac will supply the hydraulic solutions to get the job done safely and efficiently.

▼ Shown: **HSK1250 Skidding System**

Ideal Jack and Slide Solution

Skidding Systems

The skidding system is comprised of a series of skid beams moved by hydraulic push-pull cylinders, travelling over a pre-constructed track.

A series of special PTFE coated pads are placed on the skid tracks to reduce friction. The PTFE surface is matched with a sliding plate under the Enerpac skid beams, designed to achieve minimum friction coefficients.

The skid beams are connected by hoses to a hydraulic electric or diesel driven powerpack.

In addition to our standard skidding systems, Enerpac can create customized skidding systems to meet your specific requirements.

HSK-Series Skidding Systems

- PTFE skid pads with dimpled surface for low friction and long lifetime
- Easy to replace skid pads, no tools necessary
- Bi-directional operation using push-pull cylinders avoid the need to reposition cylinders for switching direction
- Large load support surface on the skid beams for distributing load
- Bottom of skid shoes equipped with stainless steel sliding plates

LH-Series, Low-Height Skidding System

- Low starting height saves time and increases versatility
- Intuitive pump controls (SFP-Series Split-Flow Pump)
- Easily reversible to change skidding direction
- Portable design for quick setup

Controls

Enerpac offers several options for controlling our skidding systems.

Wireless Controls allows the operator the freedom to view the skidding operation from multiple locations while providing complete control of all system functions.

Manual controls offer a cost-effective solution by utilizing manual hydraulic valves mounted directly on the skidding system power unit.

▼ LH400 series skidding system used to remove an obsolete press from a facility to make room for new equipment.

▼ HSKJ-1250 Skid Shoe Jack.

Skidding Systems

Enerpac Skidding Systems are available in several versions:

- **B-Series (Skid Beam)** utilizes a tall skid beam with built-in push-pull cylinders. Skidding direction can be easily switch by flipping a lever on the attached gripper box.
- **J-Series (Skid Jack)** provides the same functionality as the B-Series with the added benefit of having a built-in cylinder for lifting or leveling the load.
- **LH-Series (Low Height)** includes low-height skid beams that can fit in tight spaces while still offering high capacity.

HSK LH Series

Capacity:

140 - 280 tons

Stroke Push/Pull:

23.62 inches

Lifting Stroke*:

6.89 inches

* Skid shoe jack version only.

LH-Series Skidding System Requirements

- 1 Skid Track (required)
- 2 Skid Beam (required)
- 3 Push-Pull Cylinder Unit (required)
- 4 Hydraulic Hoses (required)
- 5 Split-Flow Electric Pump (required)
- 6 Track Support (optional, not shown)
- 7 Storage/Transport Frame (optional, not shown)
- 8 Pump Cart (optional, not shown)

HSK-Series Skidding System Requirements

- 1 Skid Track
- 2 Skid Beam
- 3 Hydraulic Power Pack
- 4 Hydraulic Push-Pull Unit

Skid Tracks

Include specially constructed and easily replaceable PTFE coated pads. Skid track is sold separately.

Hydraulic Power Packs

Enerpac offers a comprehensive range of hydraulic power packs that are optimized for use with Skidding Systems.

Low Height Skidding and Turntable

See page 78-82 of this catalog for full details on this versatile product.

* Note: Multiple push-pull units are combined to offer greater capacity. Typical setup is two or more units.

** Low Height

▼ Shown: HSL50006 Strand Jack

- Precision control of synchronous lifting and lowering
- Can be controlled by a single operator from a central location for increased safety
- Automated locking - unlocking operation
- Two strand sizes: 0.62" (15.7 mm) and 0.71" (18 mm)
- Telescopic strand guide pipes prevent bird caging
- Internal components are coated with an anti-corrosion coating, making it suitable for marine environments
- Lifting anchor included with all strand jacks
- Lloyds witness tested to 125% of maximum working load

Heavy Lifting Strand Jacks

High Capacity - Precision Control

Strand Jacks

Enerpac strand jacks are the strand jacks of choice for customers seeking precise synchronous control with heavy lifting capacity in an economical, compact, and reliable foot print.

Enerpac strand jacks are powered by electrical or diesel driven hydraulic power packs and controlled by Enerpac's proprietary SCC-Smart Cylinder Control System to ensure full control of lifting and lowering operations.

Enerpac continually improves reliability, durability, and safety of their strand jacks, making them an industry standard for heavy lifting.

▼ Shown: HSL85007 Strand Jack System used on Enerpac custom Self-Erecting Tower.

▼ Enerpac's SCC-Smart Cylinder Control System simplifies synchronous operation with intuitive controls and a user-friendly graphical interface.

Heavy Lifting Strand Jacks

Strand Jacks

A strand jack can be considered a linear winch.

In a strand jack, a bundle of steel strands are guided through a main "lifting" jack. Above and below the cylinder are anchor systems with wedges that grip the strand bundle simultaneously. Lifting and lowering a load is achieved by hydraulically controlling the main jack and both mini jacks alternately.

In the case of system pressure loss, the wedges are mechanically closed automatically, holding the suspended load in place.

Today, strand jacks are widely recognized as the most sophisticated heavy lifting solution. They are used all over the world to erect bridges, load out offshore structures, and lift/lower heavy loads where the use of conventional cranes is neither economical nor practical.

HSL Series

Capacity:

17 - 1405 tons

Stroke:

9.8 - 23.6 inches

Maximum Operating Pressure:

5,000 psi

Shown: HSL20006 Strand Jack

- Lloyds witness tested to 120% of maximum working load

Precision Lift and Position of Heavy Loads

The Ultimate in Safety and Control

INTELLI-LIFT

The Intelli-Lift wireless control system is included with all Enerpac hydraulic gantries.

The Intelli-Lift controller offers superior safety and control and includes the following features:

- Encrypted bi-directional communication that eliminates interference from other devices
- Remote operation using multi-channel wireless (2.4 GHz) or wired (RS-485) control
- High and low speed settings
- Automatic synchronization of lifting with an accuracy of 0.95 inch (24 mm)
- Automatic synchronization of travelling with an accuracy of 0.60 inch (15 mm)
- Overload and stroke alarms
- Remote side shift control
- Emergency stop switch

Hydraulic Gantries

Hydraulic Gantries are a safe, efficient way to lift and position heavy loads in applications where traditional cranes will not fit and permanent overhead structures for job cranes are not an option.

Hydraulic Gantries are placed on skid tracks to provide a means for moving and placing heavy loads, many times with only one pick.

Enerpac offers three series of Hydraulic Gantry systems:

- **SL-Series Super Lift**
The cost-effective SL-Series Super Lift offer control and stability for everyday lifting applications below 450 ton up to 30 feet.
- **SBL-Series Super Boom Lift**
The heavy-duty SBL-Series Super Boom Lift boom style gantries offer increased lifting capacity of over 450 ton to heights of almost 40 feet.

All Enerpac gantries are delivered with specific properties and control systems to ensure optimum stability and safety.

SL, SBL, Series

Capacity:

110 - 1178 tons

Lift Height:

6.73 - 39.38 feet

▼ **Additional Accessories –**
Contact Enerpac for assistance at enerpac.com/contact-us

Drawing shows SBL-series, SL-Series without boom.

Skid Tracks

Skid tracks used for leveling and load distribution. Available in two standard lengths, 10 feet and 20 feet.

Header Beams

Sold in pairs and includes lifting points and fork pockets for easy positioning on gantry towers.

Available in 26.24 ft., 32.80 ft. and 39.36 ft. lengths.

Powered Side Shift

Electric propulsion controlled by standard gantry controls. Each set consists of 4 units.

Lifting Anchors

Designed to transfer the load to the top of the header beam. Can accommodate a 250 ton shackle or attach directly to the lifted load.

▼ From left to right: JS125, JS250, JS500, JS750 Jack-Up System (one lifting tower shown)

- Self-contained hydraulics in each Jack-Up unit for uncluttered work area
- Synchronously lift loads with multiple Jack-Up units. The most common system set-up includes four Jack-Up units but can be expanded to include more
- Lifting barrels are stacked together to mechanically hold the load
- Up to 5% side load capacity depending on capacity and lift height
- Computer controls for operating the Jack-Up System with automatic and manual lifting settings

Incremental Lifting System – Synchronously Lift and Mechanically Hold

Typical Applications

- Bridge maintenance
- Lifting and lowering of heavy equipment
- Lifting, lowering and levelling of heavy structures and buildings
- De-propping/load transfer from temporary steel work.

Computer Controls

Enerpac Jack-Up Systems provide precision control suitable for many demanding lifting and lowering applications. The comprehensive self-contained design features simple to use software.

- Automatic synchronization of multiple networked lift points
- Center of Gravity calculation
- Overload and stroke alarms
- Emergency stop switch at Jack-Up units and controls

▼ Enerpac JS500 used in bridge construction and de-commissioning.

▼ Enerpac Jack-Up System hoists 1500-ton span on Fore River Bridge.

▼ Undecking an 1500-ton Electric Rope Shovel in a Copper Mine with a JS500 Jack-Up System for bearing inspection and maintenance.

JS-Series, Jack-Up Systems

Enerpac Jack-Up Systems

The Jack-Up System is a custom developed multi-point lifting system. A typical system setup includes four jack-up units, one positioned under each corner of a load.

Example: A four unit setup with JS250 has a lifting capacity of 1000 ton (250 ton per unit). The lifting frame of a jack up unit contains four hydraulic lifting cylinders, one in each corner, which lift the load using the stacked steel barrels.

A load is lifted in increments as barrels are slid into the system, lifted, and stacked; forming 'lifting towers'. A jack up system is operated and controlled by a computer control unit.

Each unit's lifting and lowering operations occur simultaneously; the computer control unit's synchronous technology maintains the balance of the load.

Capacity per Lifting Tower:

138 - 825 tons

Lifting Height:

Up to 20 - 66 feet

Jack-up System Smart Box

The **Smart Box SBJS-V4** is Enerpac's proprietary control platform. It allows an operator to control up to 8 jack-up towers simultaneously with one **SBLT1** standard laptop.

- Single operator control from a central location provides safe and reliable operation
- Synchronous lift /lower and load control between the lifting positions
- Automatic lifting and lowering cycles
- Displays individual and accumulative stroke/load
- Simple graphical user interface

Adjustable Top Barrel

Includes double-acting lock nut cylinder with swivel saddle. Cylinder can be extended to contact the load. Provides

ability to adjust starting height of each leg, ensuring safe and stable lifting. Must be operated with separate pump.

Trolleys & Skid Tracks

Allows horizontal travel of jack-up systems.

▼ SHS-Series 4-Point SyncHoist System

- High-precision load maneuvering using one crane
- Reduces the risk of damage from oscillations of wire rope due to crane jogging and sudden starts/stops
- Vastly improving worker safety, operating speed and control
- PLC-controlled hydraulics turn lifting into high-accuracy hoisting and load positioning system
- Double-acting push/pull cylinders with load-holding valves for added safety
- Increased efficiency compared to conventional load positioning methods

Options for system management and control:

- Manual control: system warning functions
- Automatic control: fully PLC-monitored system with programmable functions using touch screen and system warning functions
- Wireless control: self-contained hydraulics with hand-held control

▼ Bridge segments are hoisted from the ground, being positioned with a 4-point SyncHoist system with fully monitored cylinders.

▼ SyncHoist Powerpack to operate the 4 lifting points.

Accurate Hoisting and Load Positioning Enhancing a Crane's Capability

Synchronous Hoisting

Enerpac SyncHoist is a unique crane product for below-the-hook positioning of heavy loads that require precision placement. The SyncHoist system may reduce the number of cranes needed and reduce the costs of multiple picks.

Functions

- High precision horizontal and vertical load positioning
- Pre-programmed positioning, tilting and aligning

Applications

- Positioning of rotor, stator and propeller blades of wind turbines
- Positioning of roof sections, concrete elements, steel structures
- Positioning of turbines, transformers, fuel rods
- Precise machinery loading, mill rod changes, bearing changes
- Precise positioning of pipe lines, blow out valves
- Positioning and aligning of ship segments prior to assembly

▼ A SyncHoist system used to align steel blocks of the ship's control tower sections allowing gradual lifting and positioning of the load.

SyncHoist - High Precision Load Positioning

What is SyncHoist?

Enerpac SyncHoist is a hydraulically operated auxiliary attachment for high precision load positioning for cranes. The SyncHoist system can be used for pre-programmed positioning, tilting and aligning of loads.

- Complete system tested in compliance with European lifting directive and safety requirements

SyncHoist improves safety, operating speed and control of load movement

Geometric positioning of heavy loads in a horizontal and vertical plane are frequently done using more than one crane. Synchronizing movements between cranes are difficult and risky. The lifting inaccuracy can result in damage to the load and support structures and puts workers at risks. The SyncHoist system can be used for controlled hydraulic horizontal and vertical material handling.

System management and control

Contact Enerpac for the following options, or other customized stroke, capacity and control configurations.

1. Manual control

- Valves with manual levers
- Warnings for thermal motor protection
- Visual check: oil level, filter indicator

2. Automatic control

- Load and stroke monitoring, and stroke control
- PLC-control and touch screen
- Solenoid valves with pendant
- Pre-programmable motions and data recording
- System warnings for:
 - maximum cylinder load control setting
 - stroke and position control
 - thermal motor protection
 - oil level and filter indicator

Autonomous (wireless) system

- Wireless remote control
- Only one electric power connection per lifting point
- Integrated hydraulics, PLC and controls
- No need for hydraulic hoses and cables
- No need for mid-hoist disconnection of hoses and movement of pump

SHS/SHAS Series

Capacity:

60 - 250 tons

¹⁾ With 4 cylinders and one 460-480 VAC-3 phase-60 Hz power pack (suffix J). For 400 VAC-3 phase-50 Hz power pack change suffix J into W. Example: SHS 45560 MW.

²⁾ Pump and cylinders include 4x 82 feet hydraulic hoses with couplers. ³⁾ Weight per cylinder.

⁴⁾ WU = with US electrical wiring. Change into suffix "WE" for EU-market. Example: SHAS 411060 WE.

▼ ETR50H, Enerpac Trolley System (shown with Trolley Tracks)

- High transport speed
 - 164 ft/hour loaded
 - 328 ft/hour unloaded
- Suited for repetitive movements
- Runs on simple flat steel plate
- Ease of maintenance
 - long maintenance intervals
 - no consumables
- Clean usage – electric driven
- Built-in synchronization – no need for forced external mechanical connection to synchronize movements
- Easy transport - compact design
- Hydraulic lifting cylinder option available
- Kits to accommodate other lifting options also available

▼ The trolley system speeds up offshore wind transition piece load out: the transition pieces are positioned in the clamping frames and moved along the track.

▼ ETR series electric trolley undergoing factory acceptance testing prior to shipment.

Safe & Synchronized Travel

Product Overview

The ETR-Series Trolley System is comprised of electrically-driven trolleys which can carry heavy loads along a fixed track system. The entire system is controlled by a hand-held wireless control system. A typical system is comprised of 4 trolleys, 2 tracks and one controller. Trolley tracks and controller must be ordered separately.

Control Panel and Cables

Operate up to 8 trolleys (same capacity each) using control panel with included wireless controller.

- Automatic synchronization of traveling with an accuracy of 0.39 inch (10 mm)
- Dual-band radio with automatic frequency search
- Wireless remote operation
- High and low speed settings
- Emergency stop switch
- Control cables operate trolley and provide feedback to controller

Control Panel

Model No.	Dimensions (in)			Wt. (lbs)
	L	W	H	
ETR-CPJ8	50.81	23.62	43.25	551

Control Cables

ETR-CBL-25	82-foot control cable

Enerpac Trolley System

ETR-Trolley System

The Enerpac Trolley System provides an alternative method with increased benefits over traditional skidding methods.

Load movements are more stable due to the continuous movement and ability to precisely control travel speed including acceleration and deceleration.

Key features:

Low speed: 82 feet/hour
High speed: 164 feet/hour
Accuracy: 0.38 inches
Sideload: 1.5% rated load
Sound Level: < 80 dBA

ETR Series

Capacity Per Trolley:

50 - 100 tons

Travel Speed:

82 - 164 ft/hour

Motor Power:

0.5 - 1.0 hp

* Not shown. Optional for units with hydraulic cylinders

- ① Electric Trolley - ETR-Series
- ② Track Plate - ETR-TP-015 or ETR-TP-030
- ③ Control Cable - ETR-CBL-15 or ETR-CBL-25
- ④ Control Panel (inc. wireless remote) - ETR-CPJ8
- ⑤ Split-Flow Electric Pump - SFP-Series*

ETR50

ETR100

Additional Mounting Options

Mounting kits are available to accommodate other lifting and rigging solutions.

Kit Model No.	Description
ETR50-SMK	Enerpac SCJ-50 on ETR50
ETR100-SMK	Enerpac SCJ-100 on ETR100
ETR50-BMK	Swivel beam mount on ETR50
ETR100-BMK	Swivel beam mount on ETR100

Trolley Track Plates

Track plates provide level guidance and support for the trolley. Two plates placed side-by-side are used for operation of ETR100-Series Trolleys. Maximum inclination of tracks is 0.2°.

Model No.	Trolley Track Plates (in)
ETR-TP-015	59" track plate
ETR-TP-030	118" track plate

SPMT Series

Capacity (per transporter):

67 tons

Transport Speed (unloaded-loaded):

1.9 - 1.0 mph

Motor Size:

75 hp

Self-Propelled Modular Transporter

The Enerpac Self-Propelled Modular Transporter (SPMT) features a minimized height and slim design, which makes it very easy to operate in confined spaces. Each wheel unit has a steering function as well as a lifting cylinder at its disposal. Wheel propulsion is established by wheel drives.

The SPMT is operated by the Intelli-Drive Remote Controller. This remote controller can be used both hard wired and wireless (based on radio frequency).

The SPMT is a modular system comprised of trailers with 3 axle lines each and diesel hydraulic power units (HPU). Depending on the model number, the trailers and HPUs can be configured to a maximum of 4 trailers in 2 rows (4x2) or 6 trailers in 2 rows (6x2).

This is the maximum setup of units that can work together on just one Intelli-Drive Remote Controller.

- **Modular design for multiple configurations**
- **Minimized height and slim design are ideal for in-plant operation**
- **Intelli-Drive wireless control system is intuitive and easy to use**
- **One power pack can operate 2-3 trailers maximum depending on model**
- **Two trailers and power pack can be shipped inside a 20 ft. container**
- **Hydraulic power unit is tier-4 diesel engine for reduced emissions**

Capacity (per transporter)	Transporter Model Number	Maximum Configuration (transporters in rows)	Steering Range	Steering Mode		Retracted Height	Average Travel Height	Overall Length	Lifting Stroke	Wt. (SPMT)	HPU * Model No.	Wt. (HPU*)

* HPU = 54 kW Power Pack Diesel. HPU is sold separately.

FROM SIMPLE TO COMPLEX – LIFTING SOLUTIONS FOR YOUR APPLICATION

For those who do the heavy lifting today, the stakes are high and the challenges complex. We know our customers put their reputations and physical well-being on the line to get the job done right. We take that very seriously.

Backed by a global legacy of ultra-reliable quality and superior precision, Enerpac Heavy Lifting Technology is pushing the industry forward with a wide range of advanced solutions that first and foremost ensure our customers operate safely and productively every day. It isn't about being compliant, or "as good" as the next guy; we outpace the competition by delivering technically superior solutions that are easy to design, safe to use and built to outlast.

CONSULTATIVE APPROACH TO HEAVY LIFTING

From the very first discussion to gain an understanding of your application to solution design, training and ongoing field support of your operators, you will find a structured process and a team of application experts who will advise you towards a successful solution.

SOLUTION CONSULTATION

- Requirements Specifications
- Selecting the Right Solution for Your Application

SOLUTION CONSULTATION

- Requirements Specifications
- Selecting the Right Solution for your Application

Since the late 1950's, Enerpac has been steadfast in their commitment to work closely with customers to understand their lift needs and work-site environment. Not all lifts are the same. There are several factors that must be taken into consideration before recommending the best solution.

APPLICATION CONSIDERATIONS

LOAD CAPACITY

How much weight needs to be lifted, moved and/or positioned?

LIFT HEIGHT

How high does the load need to be lifted? Are there restrictions above or below the load?

TYPE OF LIFT

Will you lift from above or below?

SPACE

How much space is available to complete the task?

TIME

How the job needs to be completed within a set timeframe due to operational or environmental factors.

TRANSPORTATION

Does the load need to be transported as well as being lifted? How far and how often?

TOTAL COST OF OWNERSHIP

What productivity, labor or training costs need to be factored into the solution to make it the best long-term investment.

Because Enerpac engineers have designed solutions for a variety of applications over the years, they are well-equipped to minimize risks and to recommend a simpler solution that others may overlook. Built on a world-class reputation for developing products that meet the most common lifting applications, once your specifications are in the hands of the Enerpac experts, you are sure to receive a comprehensive recommendation that will save time and money while ensuring safety above all else.

Enerpac has the most complete offering of standard heavy lifting and positioning tools in the market.

These products are designed to highest standards of performance and offer great flexibility to meet the demands of even the most challenging applications. Our manufacturing facility adheres to world-class production planning and inventory management to ensure your product arrives at your facility on time as specified.

DESIGN & MANUFACTURING

- Design & Engineering
- Manufacturing Excellence

Design & Engineering

Enerpac engineers are experienced in the latest software, rapid prototyping, failure analysis methods and engineering standards. This allows us to continuously improve and expand our product offering to meet ever changing needs of the market.

- CE, Machinery Directive 2006/42/E
- ASME: B30.1

Assembly & Quality Assurance

- All Enerpac products are assembled by highly trained individuals, working safely and efficiently from start to finish.
- The Hengelo, NL facility that manufactures the Enerpac heavy-lifting equipment holds several quality certifications.
- ISO 9001: 2015
- ISO 3834-2: 2005
- ISO 14001: 2015
- ISO 45001: 2018

Fabrication & Machining

- A dedicated steel fabrication and certified welding facility manufactures product components and support structures for the most demanding heavy-lifting applications.
- Complete in-house production is delivered using the latest CNC and conventional turning machines plus a full range of milling and boring equipment.

TESTING & TRAINING

- Quality Assurance
- Operation & Safety Training

The Enerpac facility, that makes and builds your heavy-lifting equipment, holds several quality system certifications giving you extra confidence in the safety and reliability of your heavy-lifting equipment. Whether your first lift or move is scheduled upon taking delivery of your new equipment or months later, you will have access to the dedicated Heavy-Lifting team to support your training or troubleshooting needs.

Factory Acceptance Testing (FAT)

Customers are invited to witness FAT, often combined with operator training. Under witness of Lloyd's Register, all equipment is functionally tested to maximum capacity, and in many cases up to 125% of rated load. Additional testing to meet standards compliance, government regulations or specific customer requirements are performed and documented at the same time.

Documentation

Upon delivery of your new heavy-lifting equipment, an operator's manual outlines the configuration of your system, detailed operating instructions with safety guidelines, and maintenance recommendations.

Training

Operational training is offered with the purchase of all Enerpac heavy-lifting equipment.

Once you take possession of your new heavy-lifting equipment, you have on-demand access to our field support team. And support continues with ongoing maintenance or system upgrades throughout the life of your assets.

ON-DEMAND SUPPORT

- On-the-Job Application Engineer Support
- Routine Maintenance & Repair Services

On-the-Job Field Support

Should you ever require extra support while using your Enerpac Heavy-Lifting system on the job, our dedicated application engineers will work closely to guide your operators on appropriate use of our equipment. And to ensure job safety, they will travel to your job site as needed to ensure your project is completed timely and without incident.

Product Warranty

All Enerpac Heavy-Lifting equipment is built to stringent specifications and built to last.

Should you ever encounter a defect in materials or workmanship under normal use, it will be remedied through our standard one-year warranty program.

Maintenance & Repair

Downtime is minimized with fast delivery of repair parts and consumables stocked at several locations worldwide. For those that want the added confidence of specialized technicians, the Enerpac Maintenance & Repair team are ready to perform your maintenance or repair services for you.

Since joining the Enerpac portfolio, the design innovation of Mirage machines has continued to deliver new products that help get the job done faster, safer, and smarter. Explore the full product line from flange facing machines, milling machines, hot tapping, drilling and tapping machines to clamshell pipe cutters, decommissioning and band saws. All backed by Enerpac training, application support and service.

Specialist Support, Experience and Expertise

Design and Innovation

On-Site Machine Tools are the result of over 25 years of expertise and innovation. The pioneering spirit continues under Enerpac ownership through our commitment to new product development. Watch for more new tools being launched in the near future!

Continuous Improvement

Our specialist manufacturing operation is ISO9001 certified. This means we drive a culture of continuous improvement. Our team members are encouraged to find ways to improve today, tomorrow, and long into the future.

Specialist Support, Experience and Expertise

Each machining project presents difficult and unique challenges. Making the right choice for your next and any future projects can be complex. That is why our team is eager to support you through every step on your journey. Whether it is choosing the right specification, commissioning your machine, or maintenance - we're with you all the way.

Internal Mount Flange Facing Machines

FF120

- Mechanical tool manually operated
- Simple to operate
- Lightweight - only 15 lbs (6,8kg)
- Multiple leadscrew options allow for manually driven, continuous fixed feeds for ASME standard surface finishes
- Calibrated slide to define cut depth and correct finish

MM305I and MM610I

- Swivel tool post for groove details, reduces the need for separate accessories
- Supplied with a range of two quick-set base sizes for improved onto site operation
- Collet base allows for efficient machine mounting and centering

MM860I and MM1000I

- 360° swivel tool post for groove details, reduces the need for separate accessories (power feed on MM1000I)
- Supplied with a range of three quick-set base sizes for improved onto site operation
- Adjustable height clamping jaws for efficient machine setting

MM1500I

- Power feed 360° swivel tool post for groove details, reduces the need for separate accessories
- Supplied with a range of three quick-set base sizes for improved onto site operation
- Adjustable height clamping jaws for efficient machine setting

MM2000I

- Power feed 360° swivel tool post for groove details, reduces the need for separate accessories
- Supplied with a range of two quick-set base sizes for improved onto site operation
- Adjustable height clamping jaws for efficient machine setting.

MM3000I and MM4500I

- Power feed 360° swivel tool post for groove details, reduces the need for separate accessories
- Supplied with a range of three quick-set base sizes for improved onto site operation
- Adjustable height clamping jaws for efficient machine setting
- Milling accessories available with the hydraulic drive version.

Flange Facing Machines

Flange Facers are known for precision construction, the results they deliver, and how easy they are to set up on-site. These high-performing machines produce continuous groove facing feeds to ASME standards for the oil & gas, power generation and petrochemical industries.

MM-I Series feature

- Hardened slideways for long-term accuracy
- High torque, low noise drive
- Heat exchanger machining accessories available on most models.

Applications

- Heat exchanger flanges
- Hub profiles
- Lens ring joints and raised face flanges
- Recessed gaskets and spigots
- Ring type joint grooves (RTJ)
- SPO compact flanges
- Swivel ring and TEC

▼ MM860I machine to ensure flange joint integrity.

Flange Facing Machines

External Mount Flange Facing Machines

MM200E

- Preloaded cross roller bearing drive, ensuring robust, accurate, repeatable machining
- Hardened slideways for long-term accuracy
- Swivel tool post for groove details, reduces the need for separate accessories
- Continuous fixed feed for ASME standard surface finish
- Quick-set integrated clamping jaws

MM300E

- Preloaded cross roller bearing drive, ensuring robust, accurate, repeatable machining
- Hardened slideways for long-term accuracy
- Swivel tool post for groove details, reduces the need for separate accessories
- Multiple continuous fixed feeds for ASME standard surface finishes
- Quick-set integrated clamping jaws

MM600E

- Preloaded cross roller bearing drive, ensuring robust, accurate, repeatable machining
- Hardened slideways for long-term accuracy
- Power feed 360° swivel tool post for groove details, reduces the need for separate accessories
- Multiple continuous fixed feeds for ASME standard surface finishes
- Quick-set integrated clamping jaws

MM760E, MM1000E, MM1250E, MM1500E, MM1775E, MM2000E

- Continuous variable auto-feed for ASME standard finishes
- Choice of pneumatic and hydraulic drive motors
- Quick-set radial clamping adjustment
- Quick-set axial adjustment jaws
- Heavy-duty bearing construction for high metal removal rates and accuracy
- Heat exchanger kits for back facing and slot machining in one operation.

FF MM Series

Internal Mount Facing Diameter:

1 - 161" / 25,4 - 4100 mm

External Mount Facing Diameter:

0 - 80" / 0 - 2032 mm

Cutting Resultant Roughness:

Ra 125-492 μin / 3,2-12,5 μ

Surface Finish and Accuracy

All Flange Facing Machines provide a serrated finish with 30-55 grooves per inch and a resultant roughness of between Ra 3,2-12,5μ (125-492 micro inches). Geared multiple continuous groove-facing feeds for a gramophone finish (ASME Standard).

▼ MM600E external mount flange facing machine to ensure flange joint integrity.

Narrow Body & Mid-Size Clamshell Cutters

DLR-NB12, NARROW BODY CLAMSHELL CUTTER

- NB or "Narrow Body" portable clamshells are ideal when space is at a premium
- Standard NB-series cover a range from 2 to 36" outside diameter (51 to 914 mm)
- Narrow body design: ideal when space is at a premium or obstructions are present
- Pneumatic, hydraulic, and electric drive options
- Several different drive options are available to best position the motor for a specific machining application
- Accepts a wide range of accessories to increase performance and expand capabilities
- Full range of bevel and cutting tools available

DLR-MS30, MID-SIZE CLAMSHELL CUTTER

- Mid-size machines weigh less than the HD heavy-duty series, but provide greater rigidity than the NB-narrow body series
- Standard MS-series cover a range from 4 to 50" outside diameter (105 to 1270 mm)
- Increased maneuverability and greater clearance than the HD series
- Several different drive options are available to best position the motor for a specific machining application
- Accepts a wide range of accessories to increase performance and expand capabilities
- Full range of bevel and cutting tools available

Clamshell Cutters

Clamshell cutters in the Enerpac range remain true to the pioneering designs that made DL Ricci the 'go-to' brand for machinists worldwide. Outstanding performance and a comprehensive choice have seen them used widely for applications in new construction, decommissioning, component replacement, fabrication, and maintenance.

Robust and efficient pipe cutting and beveling

Designed for any industry that needs pipe or tube cutting, or any pipe end preparation weld repair. This may be in the oil & gas sector, power generation, ship building/dock yards, or processing plants during maintenance and shutdowns.

Applications

- Pipe cutting
- Weld preparation
- Cutting materials, including super duplex, carbon steel, stainless steel, Hastelloy® and Incoloy®
- For pipe diameters up to 177 inches (4495 mm)
- Ideal for projects beyond the usual clamshell configuration – using a wide range of purpose designed accessories.

Clamshell Pipe Cutting & Beveling Machines

HD Heavy-Duty Clamshell Cutters

DLR-HD54, HEAVY-DUTY CLAMSHELL CUTTER

- Robust body design - ideal for large diameter heavy-wall pipe applications
- 18 heavy-duty models cover a range of 20 - 177" outside diameter (508 - 4495 mm)
- Pneumatic and hydraulic drive options
- Fully adjustable heavy-duty bearing design provides greater serviceability
- Stepped and keyed gear clamps equipped with a through bolt provide a positive fit at each assembly joint
- Accepts a wide range of accessories to increase performance and expand capabilities
- Full range of bevel and sever tools available

DLR Series

Outside Mounting Diameter Range:

2 - 177 inches

Outside Mounting Diameter Range:

51 - 4495 mm

Included as Standard with Each Machine

- Clamshell body
- Locators and extensions covering the full range
- Slides
- Motor and mounting
- Air caddy
- Tool kit
- Manual
- Shipping crate

▼ OM6000 Orbital Milling Machine

OM Series

Cutting Diameter Range:

98 - 315 inches

Cutting Diameter Range:

2500 - 8000 mm

General Orbital Milling Machines

Orbital milling machines are designed to deliver fast material removal and achieve high accuracy across large flange diameters.

Applications

- Machining crane bearing faces
- Repairing drag lines
- Machining large flanges
- Machining ship thruster flanges

Machine large flanges accurately and efficiently

- Precision flatness tolerances across large diameters
- Hydraulic high torque anti-backlash drive
- Precision preloaded linear rotary drive
- Adjustable fast-set hydraulic chuck
- Rigid and adjustable mounting base

▼ Milling a ship thruster flange.

Wind Power Orbital Milling Machines

▼ WP3500 Wind Power Orbital Milling Machine

WP Series

Cutting Diameter Range:

70 - 181 inches

Cutting Diameter Range:

1800 - 4600 mm

Wind Power Orbital Milling Machines

The wind power orbital milling range is designed especially for companies manufacturing wind turbine rotor blades and towers.

Applications

- Wind turbine blade root end milling
- Wind tower flange machining.

Machine large flanges accurately and efficiently

- Fully packaged system; includes trolley, power unit and base
- Accurate and repeatable process time
- Minimum distortion, fast mount hydraulic base
- Adjustable arm for different diameters
- Patented hydraulic mounting system for blade and tower production
- Direct drive spindle
- High torque anti-backlash drive

2-Axis Milling Machines

LMR1000, 2-AXIS MILLING MACHINE

- Ideal for lightweight applications
- Hand feed to main axis; auto feed optional
- Features ER40 Collet with ISO30 spindle option
- Choice of Pneumatic and Hydraulic drive

MR1000, 2-AXIS MILLING MACHINE

- Induction hardened 'V' rails ensure accuracy and durability
- Ball-screw feed
- Hand and auto feed to main axis
- Direct drive ISO 40 spindle
- Choice of Pneumatic and Hydraulic drive
- Variety of mounting options include bolting, switch magnets, pipe chain clamps and gantry

LMR, MR, MRY Series

X-Axis Maximum Stroke:

40 - 120" / 1,0 - 3,0 m

Y-Axis Maximum Stroke (MRY-Series only):

12 inches / 305 mm

3-Axis Milling Machines

MRY1500, 3-AXIS MILLING MACHINE

- Induction hardened 'V' rails ensure accuracy and durability
- Ball-screw feed
- Hand and auto feed to main axis
- Direct drive ISO 40 spindle
- Choice of pneumatic and hydraulic drive
- Variety of mounting options including: bolting, switch magnets, chain clamps and gantry

Linear Milling Machines

Gantry Milling Machine

GMRF1000, GANTRY RAIL KIT

- Modular jointing system for lengths up to 32.8 ft (10 m)
- Linear rail and precision carriages
- Quick set up with jacking system
- Auto and manual feed
- Optional quick-set magnets for mounting

GMRF Series

X-Axis Maximum Stroke:

40 - 394" / 1,0 - 10,0 m

Y-Axis Maximum Stroke:

40 - 118" / 1,0 - 3,0 m

Linear Milling Machines – Take workshop precision to your next on-site milling project

These precise and robust milling machines are available in 2- and 3-axis configurations. Each includes the latest workshop tool technology in a portable format. For a fast and efficient set-up, you can choose our optional switch magnets.

Applications

- Motor and pump mounting pads
- Aerospace machining
- Crane pedestals
- Heat exchanger repair
- Shaft keyways
- Steel mill housings
- Turbine split-line machining

▼ **HTM100**

HTM, MANUAL HOT TAPPING

- Operates to 1480 psi (102 bar)
- Versatile hot taps, bypass lines and completion plugs
- Manual rotation and feed
- Optional pneumatic feed
- 2-inch NPT connection
- Lightweight construction.

▼ **LPHT312**

▼ **MHT312**

LPHT312, LOW PRESSURE HOT TAPPING

- Operates up to 285 psi (20 bar)
- Pneumatic or hydraulic drive
- Depth-stop to ensure correct hot tap distance

MHT, HOT TAPPING MACHINES

- Pressure rating up to 1480 psi (102 bar)
- Helical geared drive situated close to the cutter
- Hydraulic and pneumatic drive options
- Industry standard connection flanges
- Compatible with industry standard tooling
- Fast traverse feed motors available
- Cutter holders included
- Interchangeable seal cartridge

HTM, LPHT MHT Series

Tapping Diameters:

1/2 - 60 inches

Maximum Stroke:

18 - 180 inches

Maximum Operating Pressure:

285 - 1480 psi

Hot Tapping – Built to deliver power where it matters most

Hot tapping is a high-pressure intervention, and our range of hot tapping machines can help towards a safe and effective solution. Industry-leading innovations used include a helical gear drive located as close to the cutting head as possible for maximum efficiency, rotary pressure seals, and four fixed feeds.

Applications

- Construction tie-ins
- Gas distribution
- Petrochemical pipelines
- Subsea pipelines
- Temporary installation
- Transmission pipelines
- Valve installation and repair
- Water main pipelines
- Wellhead maintenance

Hot Tapping Machines & Line Stopping Actuators

▼ CHT3000

CHT, LSA Series

Tapping Diameters:
3 - 60 inches

Maximum Stroke:
43 - 165 inches

Maximum Operating Pressure:
1480 - 5000 psi

▼ LSA1420-H

LSA-Series Line Stopping Actuators

Line Stopping Actuators (LSA) are used in conjunction with the required line stop head and housings to carry out line stops in surface or subsea environments. The range is designed for easy use on pipelines in various materials and differing wall thickness. Their use provides temporary pipeline isolation, temporary or permanent bypass and no costly interruption of service.

CHT, HOT TAPPING MACHINES

- Working pressure capacity up to 5000 psi (350 bar)
- Drive as close to the cut enhances cut efficiency
- Auto feed — infinitely variable for differing cut conditions
- Constant pressure seal monitoring ports
- Internally pressure balanced for higher-pressure applications
- Industry standard connection flanges
- Compatible with standard industry tooling

LSA, LINE STOPPING ACTUATOR

- Operates up to 1480 psi (102 bar)
- Hydraulic drive
- Depth measurement
- Control bar mechanical lock

▼ CHT2000 hot tapping offshore application.

▼ MDWS1638-H

Cutting the toughest materials in the most challenging environments

- Strong aluminum frame
- Overload clutch for bow damage prevention
- Hydraulic auto clamp and auto-feed
- Diver and ROV compatible
- Available with optional flotation modules for deep water use
- User replaceable clamp contact pads, wheels, and wheel liners
- Crimped or continuous loop wires available

▼ Subsea pile cutting.

MDWS Series

Cutting Diameters:

6 - 60 inches

Decommissioning Saws

A range of portable saws for a diverse range of tubular severance projects.

The band saw range delivers a cost-effective solution to cold cutting requirements in either surface or subsea situations. Diamond wire saws are ideal for cutting through dissimilar materials quickly.

Applications

- Offshore platform decommissioning
- Conductors, caissons, piles
- Multiple grouted strings
- Subsea ROV-applications
- Subsea structures
- Pipes, casings and risers

Items included with each machine:

- Diamond wire rope
- Tool kit
- Storage / shipping crate
- CE Certificate
- Packing list and manual.

▲ MDWS Diamond Wire Saw lowered into sea.

▼ BS1636-H

Cutting the toughest materials in the most challenging environments

- Fast, efficient and cost-effective cold cutting
- Cuts grouted multiple casings
- Fast mounting system
- Vertical or parallel operation
- Fast clamping and set up
- Low height design for minimum clearances
- Extensive blade selection for all materials

BS Series

Cutting Diameters:

9 - 36 inches

Portable Band Saws

Hydraulically powered portable band saws designed for tubular severance. Designed primarily for topside use, but also suitable for subsea applications.

Applications

- Offshore platform decommissioning
- Conductors, caissons, piles
- Multiple grouted strings
- Subsea ROV-applications
- Subsea structures
- Pipes, casings and risers

Items included with each machine:

- Band saw blade (2-3TP carbide tipped)
- Tool kit
- Storage / shipping crate
- CE Certificate
- Packing list and manual

▲ Pipe cutting with BS portable band saw.

HT Series

Drilling Capability:

Up to 5 inches

Maximum Stroke:

11 - 17 inches

Drilling and Tapping

Make light work of the toughest drilling and tapping applications

Drilling and tapping projects on-site require powerful and stable machines that deliver precise results first time. Our machines are designed to do exactly this - giving you reassurance that the job will be done efficiently and to the right specification. They offer high torque and easy operation through their heavy-duty spindles with ISO standard tapers.

Optional switch magnet mounts and chain clamps are also available for a quick and easy setup.

For large scale offshore decommissioning projects, casing pin drills provide an effective solution for creating lift holes into casings - especially in the most challenging of working environments.

Applications

- Drilling through armor plate
- Bulkhead hole cutting
- Flange stud drilling
- Flange stud re-threading
- Motor pump stud removal
- Short stroke line boring
- Turbine case stud removal
- Turbine pill drilling
- Casing pin drilling

Portable Drilling Machines

Drilling & Tapping Machines

Portable Tapping Machines

T30

- Rigid three pillar construction
- High-torque reduction drive
- Quick keyhole mounting
- Capable of tapping blind and through holes
- Hydraulic drive
- Pressure relief self-feed system

T725

- Heavy-duty four pillar construction
- Quick keyhole mounting system
- Capable of tapping blind and through holes
- High-torque reduction drive
- Hydraulic drive
- Pressure relief self-feed system

T, DDU Series

Tapping Capability:

Up to 7¼ inches

Case Pin Drilling Diameter:

Up to 12 inches

Maximum Stroke:

12 - 16 inches

GeniSYS IV Portable CNC Mill

Ideal for removal of cracked or broken studs and refurbishment of damaged threads. For hole diameters up to 11 inches and maximum 15.1 inch depths.

Page: 394

Casing Pin Drilling Machine

DDU1636

- Efficient pin drilling cold cut method
- Horseshoe mount options
- Helical drive spindle
- 4-inch cutter assembly supplied as standard
- Alternative cutter kits available up to 12 inches

Included as Standard with each Machine

- Tool kit
- All required mounting legs and connections
- Storage/shipping box
- CE certificate
- Operator's manual
- Packing list

▼ GeniSYS™ IV Portable CNC Mill

**For removal
of cracked or
broken studs, and
refurbishment of
damaged threads**

Included as Standard

The machine is supplied complete with the following items:

- GeniSYS IV milling machine
- Control System
- Laptop
- Motor and cables
- Storage / shipping boxes
- Operator's manual

- CNC software allows the GeniSYS IV to be programmed to perform multiple tasks within its working envelope
- Can create bore and thread hole diameters ranging from 0.875 – 11 inches (22,2 mm – 279,4 mm)
- Hole depths up to 15.12 inches (384 mm)
- High tolerance profile rails produce consistent results
- All three axes utilize precision ground ball screws, providing precise movement of the milling head
- Accurate and repeatable machining
- A cold cutting operation
- Ejects chips during operation
- Single machine capable of drilling, threading and general milling applications

▼ Thread cutting

▼ GeniSYS IV CNC Milling Machine.

GeniSYS™ IV Portable 3-Axis CNC Milling Machine

GeniSYS™ IV Portable CNC Mill

The GeniSYS IV is a highly portable 3-axis CNC milling machine.

The motion control command center provides the ultimate in performance monitoring and technician safety.

Designed for the accurate removal of cracked or broken studs up to 11-inch diameter and the precise refurbishment of damaged threads. This is achieved without the need for manually controlled drilling or metal disintegration techniques.

Can be used for automated general profile milling applications.

Typical examples

- Manway covers
- Reactor studs
- Bolt extraction and threading applications
- Recirculation pumps
- Turbine cases
- Heat exchangers
- Motor bases and many more high impact assets

GeniSYS

Hole Diameter:

7/8 - 11 inches

Hole Depths:

Up to 15.12 inches

▲ A typical thread before refurbishment

▲ New machined thread

▲ Enlarging a hole

▲ Coring out the center of a bolt (minor diameter).

Tooling

Standard tooling packages available to support general milling and thread milling applications.

Ultimate Versatility in Piping Isolation and Pressure Testing

Inline Isolation and Test Tools

MITT-series tools obsolete traditional pipe cleaning and hydrotesting methods used for maintenance and construction operations.

The MITT series tools improve safety by limiting the test pressure volume and reduce downtime by eliminating cleaning requirements.

Key benefits of the tools include:

- Significantly reduce maintenance project timelines
- Safely perform welding on hydrocarbon lines with the peace of mind of a positive pressurized hydrostatic isolation
- Achieve significant reduction in wastewater (<1/4 gallon of water required for a 24-inch test)
- Patent Pending

- **Combination Isolation and Test Tool** assures vapor-free isolation for hot work and high-pressure capability between seals for testing welds with one tool
- **Multi-schedule capability** – up to 6 schedules covered per tool, 40 tools cover 154 pipe diameter / schedule combinations
- **Lightweight, slim and versatile design** – no crane required, able to mount in elbows and tees, able to test mismatched schedules
- **High-pressure capability** – test welds with relative ease up to 4500 psi
- **Self-centering tools** are user-friendly and require minimal training
- **Hydrodynamic capability** for heat treating

MITT Series

Pipe Diameters:

3/4 - 40 inches

Water Capacity per Test:

0.10 - 0.75 gallon

Maximum Test Pressure:

4500 psi

Cost-Effective Spares

Buna 90 shore hardness seals and stainless steel seal backing rings provide additional pressure capacity for a low cost.

Ancillary Kit – MITTAK

All ancillary components required to safely isolate piping and test new welds (includes manual valves, gauge set, hoses, hand tools, fittings).

Pump and Reservoir

To match the full capability of the tools, the **MP350** hand pump and **MP10T** reservoir are recommended.

▼ MITT2A tool being torqued in a test stand for high-pressure testing.

Enerpac “Yellow Pages” *stand for* Hydraulic Information!

If selecting hydraulic equipment is not your daily routine then you will appreciate these pages. The “Yellow Pages” are designed to help you work with hydraulics. They will help you to better understand the basics of hydraulics, of system set-ups and of the most commonly used hydraulic techniques. The better your choice of equipment, the better you will appreciate hydraulics. Take the time to go through these “Yellow Pages” and you will benefit even more from Enerpac High Pressure Hydraulics.

ENERPAC WARRANTY STATEMENT

Visit our website for the complete Global Lifetime Warranty or call your Authorized Service Center.

Learn More About Hydraulics

Visit www.enerpac.com to learn more about hydraulics and system set-ups.

Enerpac is certified for several quality standards. These standards require compliance with standards for management, administration, product development and manufacturing.

Enerpac worked hard to earn the quality rating ISO9001, in its ongoing pursuit of excellence.

DIN-ISO 1402

Enerpac Thermoplastic and Rubber Hoses have been tested and confirm to this Standard.

ASME B30.1-2015

Our cylinders fully comply with the criteria set forth by the American Society of Mechanical Engineers (except RD, BRD, HCL, LPL, CUSP and JHA-Series).

Product Design Criteria

All hydraulic components are designed and tested to be safe for use at maximum 10,000 psi unless otherwise specifically noted.

Where specified, Enerpac electric power units meet the design, assembly and test requirements of The Standards Council of Canada (CAN C22.2 No. 68-92), and UL73 for the United States. Units were tested and certified for both USA and Canada by TÜV, and by CSA, USA-OSHA-NRTLs., (Nationally Recognized Testing Laboratories.)

EMC Directive

Where specified, Enerpac electric power pumps meet the requirements for Electromagnetic Compatibility per EMC Directive 2014/30/EU.

CE Marking & Conformity

Enerpac provides Declarations of Conformity or Incorporation, as applicable, and CE Marks for products according to the EU Directives.

ATEX 95 Certified

The S, W, DSX and HMT-Series torque wrenches, ZA, XA, LAT and ATP-Series air-driven pumps, SWi-Ex-flange spreaders, HP-EX hand pumps and the 144 type hoses are tested and certified according to the Directive 2014/34/EU "ATEX Directive".

The explosion protection is for Equipment Group II, Equipment Category 2 (Hazardous Zone Area 1 in Gas and/or Dust atmospheres).

When used correctly, hydraulic power is one of the safest methods of applying force to your work. To that end we offer

some DO's and DON'Ts, simple common sense points which apply to practically all Enerpac hydraulic products.

- Lift slowly and check often
- Avoid standing in the line of force
- Anticipate possible problems and take steps to avoid them

The illustrations and application photos of Enerpac products throughout this catalog are used to portray how some of our customers have used hydraulics in industry.

In designing similar systems, care must be taken to select the proper components that provide safe operation and fit your needs.

Check to see if all safety measures have been taken to avoid the risk of injury and property damage from your application or system.

Enerpac cannot be held responsible for damage or injury caused by unsafe use, maintenance or application of its products.

Please contact the Enerpac office or a representative for guidance when you are in doubt as to the proper safety precautions to be taken in designing and setting up your particular system.

In addition to these tips, every Enerpac product comes with specific safety information and instructions. Please read them carefully.

Jacks

Provide a level and solid support for the entire jack base area.

The entire jack saddle must be in contact with the load. Movement of the load must be in the same direction as jack plunger.

Never place any part of your body under the load. Ensure the load is on a solid support before venturing under.

Remove the jack handle when it is not being used.

Cylinders

Provide a solid support for the entire cylinder base area. Use cylinder base attachment for more stability.

The entire cylinder saddle must be in contact with the load. Movement of the cylinder must be parallel with the movement of the load.

Do not use cylinder without saddle. This will cause plunger to "mushroom". Saddles distribute load evenly on the plunger.

As with jacks, never place any part of your body under the load. Load must be on cribbing before venturing under.

Always protect cylinder threads for use with attachments.

Keep hydraulic equipment away from open fire and temperatures above 150 °F (65 °C).

General

80% Manufacturer's rating of load and stroke are maximum safe limits. **80%** Good practice encourages using only 80% of these ratings!

Always read instructions and safety warnings that come with your Enerpac hydraulic equipment.

Both couplers must be connected when using double-acting cylinders. Ensure return hose is fitted.

Pumps

Don't use handle extenders. Hand pumps should be easy to operate when used correctly.

Close release valve finger tight. Using force will ruin the valve.

Fill pump only to recommended level. Fill only when connected cylinder is fully retracted.

Always use genuine Enerpac hydraulic oil.

Hoses and couplers

Clean both coupler parts before connecting. Use dust caps when coupler parts are not connected.

Detach cylinder only when fully retracted or use shut-off valves or safety valves to lock-in cylinder pressure.

Keep hoses away from the area beneath loads.

Don't kink hoses. Bending radius should be at least 4 1/2 inch. Don't drive over or drop heavy objects on hoses.

Don't lift hydraulic equipment by the hoses.

Never allow the cylinder to be lifted off of the ground through the couplers.

* Oil Flow

- Determined by motor size
- Directly affects electrical power requirements
- Determines cylinder or tool speed

** Duty Cycle

- Extended applications require more than one hour of uninterrupted pump use
- Intermittent use – from 20 minutes to one hour, depending on reservoir capacity (contact Enerpac for details)

*** Portability

- | | |
|-------------------------------|----------------------------------|
| Portable | Stationary |
| • Ergonomic handles | • Mounting options |
| • Flexible power requirements | • Normally requires stable power |

Product Selection Worksheet

▼ Complete the following information to select the right products:

Cylinder Selection	Question:	Tips/help	Data	Model Number
	Total force required in tons:	Total load		
	Number of cylinders required:	Number of lifting points		
	Force per cylinder in tons:	Should be 80% of total cylinder cap.		
	Stroke required:	Plunger travel		
	Single or double acting (D/A):	D/A used when pull force is required, or retract speed is critical		
	Type of plunger required:	Hollow or solid		
	Collapsed height required:	Height with plunger fully retracted		
	Optional saddle required:	Tilt, Grooved, Flat		
	Cylinder base:	Improves stability		
	Cylinder attachments: (RC-series)	Expanded functions		
Selected cylinder model:			►	
Including coupler model:				

Pump Selection

The three most commonly selected pumps are hand pumps, electric pumps and air-driven pumps. Gas powered pumps, however can be selected in the same way.

Available power source: ☐ Manual ☐ Battery ☐ Electric ☐ Compressed Air ☐ Gasoline

Hand pump
Single- or double-acting operation

Not for high-cycle applications
Use 4-way valve for D/A applications
Check speed chart on page 409 for number of strokes per inch)

Selected hand pump:

Electric or compressed air pump

Need for portability:

Duty cycle:

Required usable oil capacity:

Available voltage:

Lifting speed (Important/not important): Use speed chart on page 409

Type of control:

Type of actuation/function:

Accessories:

Weight and power requirements

Intermittent or extended

Intermittent = 1.2 x cylinder oil capacity
high cycle = 2 x cylinder oil capacity

Single phase or Three phase

Use speed chart on page 409

Manual/remote pendant

Advance/hold/retract

Roll bar, Oil Filter kit, ...

Selected pump:

To suit hose:

Oil connection

System Components

Number of hoses and length required:

Selected hoses:

Manifold or tee:

Extra hose per manifold (2):

Gauge (psi, lbs or tons scale):

Gauge adaptor:

Fittings:

Pressure relief safety valve:

Load-holding valve(s):

Hydraulic oil:

GF-series glycerine for high cycle

1 Cylinder

Applies hydraulic force.

Page 5

2 Cylinder Base Plate

For applications such as lifting where additional cylinder stability is required.

Page 10

3 Pump

Provides hydraulic flow.

Page 84

4 Hose

Transports hydraulic fluid.

Page 148-149

5 Male Coupler

For quick connection of the hose to system components.

Page 150-151

6 Female Coupler

For quick connection of the hose end to the system components (usually included with the cylinder).

Page 150-151

7 Gauge

To monitor pressure of the hydraulic circuit.

Page 156-157

8 Gauge Adaptor

For quick and easy gauge installation.

Page 162

9 Swivel Connector

Allows proper alignment of valves and/or gauges. Used when units being connected cannot be rotated.

Page 163

10 Auto-damper Valve V10

Used to protect gauge from damage due to sudden pulses in the system. Needs no adjustment and allows correct positioning of gauge, prior to tightening.

Page 164-165

11 4-Way Directional Control Valve

Controls the direction of hydraulic fluid in a double-acting system (usually included with the powerpack).

Page 164-165

Single-acting push application, such as in a press.

The hand pump offers controlled cylinder advance, but may require many hand pump strokes in longer stroke applications when the cylinder capacity is 25 ton or above.

Examples of pump, hose and cylinder sets can be found on page 62.

Single-acting cylinder with longer stroke used for lifting applications.

Double-acting cylinder set-up used for lifting applications where a slow controlled descent of the load must be maintained.

Double-acting cylinder set-up used in a push/pull application.

12 3-Way Directional Control Valve

Controls the direction of hydraulic fluid in a single-acting system (usually included with the powerpack).
Page 164-165

13 Safety Holding Valve

Holds the load in lifting applications.
Page 165

14 Manifold

Allows distribution of hydraulic fluid from one power source to several cylinders

Split-Flow Manifold

Allows distribution of hydraulic fluid from one power source to several single-acting cylinders
Page 152 & 154

15 Needle Valve

Regulates the flow of hydraulic fluid to or from the cylinders.
Page 165

Two point lifting set-up using single-acting cylinders.

Four point lifting set-up, using single-acting cylinders, flow control valves and safety valves.

Flow

A hydraulic pump produces flow

Pressure

Pressure occurs when there is resistance to flow

Pascal's Law

Pressure applied at any point upon a confined liquid is transmitted undiminished in all directions (Fig. 1).

This means that when more than one hydraulic cylinder is being used, each cylinder will lift at its own rate, depending on the force required to move the load at that point (Fig. 2).

Cylinders with the lightest load will move first, and cylinders with the heaviest load will move last (Load A), as long as the cylinders have the same capacity.

Figure 1

To have all cylinders operate uniformly so that the load is being lifted at the same rate at each point, either control valves (see Valve section) or Synchronous Lift System components (see Cylinder section) must be added to the system (Load B).

Figure 2

Synchronous Lift or Control Valves to provide uniform lifting of load.

CAUTION!

When lifting or pressing, always use a gauge.

A gauge is your “window” to the system. It lets you see what’s going on. You will find the gauges in the System Components section.

Page: 147

Learn more about hydraulics

Visit www.enerpac.com to learn more about hydraulics and system set-ups.

Force

The amount of force a hydraulic cylinder can generate is equal to the hydraulic pressure times the “effective area” of the cylinder (see cylinder selection charts).

Force	=	Hydraulic Working Pressure	x	Cylinder Effective Area
F	=	P	x	A

Use this formula to determine either force, pressure or effective area if two of the variables are known.

Example 1

An RC106 cylinder with 2.24 in² effective area operating at 8,000 psi will generate what force?

Force = 8,000 psi x 2.24 in² = 17,920 lbs.

Example 2

An RC106 cylinder lifting 14,000 lbs will require what pressure?

Pressure = 14,000 lbs ÷ 2.24 in² = 6,250 psi.

Example 3

An RC256 cylinder with 5.15 in² effective area is required to produce a force of 41,000 lbs. What pressure is required?

Pressure = 41,000 lbs. ÷ 5.15 in² = 7961 psi.

Example 4

Four RC308 cylinders each with 6.49 in² effective area are required to produce a force of 180,000 lbs. What pressure is required?

Pressure = 180,000 lbs ÷ (4 x 6.49 in²) = 6933 psi.

Remember, since four cylinders are used together, the area for one cylinder must be multiplied by the number of cylinders used.

Example 5

A HCL2506 cylinder with 56.27 in² effective area is going to be used with a power source that is capable of 7,500 psi. What is the theoretical force available from that cylinder?

Force = 7,500 psi x 56.27 in² = 422,025 lbs.

Cylinder Oil Capacity

The volume of oil required for a cylinder (cylinder oil capacity) is equal to the effective area of the cylinder times the stroke*.

Cylinder Oil Capacity	=	Cylinder Effective Area	x	Cylinder Stroke
-----------------------	---	-------------------------	---	-----------------

* **Note:** these are theoretical examples and do not take into account the compressibility of oil under high pressure.

Example 1

An RC158 cylinder with 3.14 in² effective area and an 8 in. stroke will require what volume of oil?

Oil Capacity = 3.14 in² x 8 in = 25.12 in³

Example 2

An RC5013 cylinder has an effective area of 11.05 in² and a stroke of 13.25 in. How much oil will be required?

Oil Capacity = 11.05 in² x 13.25 in = 146.41 in³

Example 3

An RC10010 cylinder has an effective area of 20.63 in² and a stroke of 10.25 in. How much oil will it require?

Oil Capacity = 20.63 in² x 10.25 in = 211.46 in³

Example 4

Four RC308 cylinders are being used, each with an effective area of 6.49 in² and stroke of 8.25 in. How much oil will be required?

Oil Capacity = 6.49 in² x 8.25 in = 53.54 in³ for one cylinder

Multiply by four to obtain the required capacity: 214.17 in³

CAUTION!

Enerpac oil will compress 2.28% at 5,000 psi and 4.1% at 10,000 psi.

Page: 152

Key to cylinder dimensions

Dimensions shown in the Selection Charts of the cylinder section are identified on the relevant drawings by the capital letter references listed here: A for collapsed height through Z for depth of internal base thread.

- A = Collapsed height
- B = Extended height
- C = Cylinder body length
- D = Cylinder outside diameter
- D1 = Cylinder width
- E = Cylinder inside diameter (bore)
- F = Plunger rod diameter
- G = Oil inlet thread
- H = Cylinder bottom to advance port
- I = Cylinder top to retract port
- J = Saddle outside diameter
- K = Saddle protrusion from plunger
- L = Plunger center to side of base
- M = Mounting holes to plunger center
- N = Length of smaller cylinder part
- O = Plunger hole or thread of saddle
- P = Plunger thread length
- Q = Plunger outside thread (pull cylinders only)
- U = Bolt circle diameter of mounting holes
- V = Thread of cylinder mounting holes
- W = Collar thread
- X = Collar thread length
- Y = Center hole diameter (hollow cylinders only)
- Z = Depth of base hole thread

Key to measurements

All capacities and measurements in the catalog are expressed in uniform values.

The conversion chart provides helpful information for their translation into equivalent systems.

You can also visit our website at www.enerpac.com to download a FREE conversion calculator.

Pressure:

- 1 psi = 0.069 bar
- 1 bar = 14.50 psi
- 1 kPa = 0.145 psi

Volume:

- 1 in³ = 16.387 cm³
- 1 cm³ = 0.061 in³
- 1 liter = 61.02 in³
- 1 liter = 0.264 gal
- 1 US gal = 3,785 cm³
- = 3.785 l
- = 231 in³

Weight:

- 1 pound (lb) = 0.4536 kg
- 1 kg = 2.205 lbs
- 1 metric ton = 2,205 lbs
- 1 ton (short) = 2,000 lbs
- 1 ton (short) = 907.18 kg

Temperature:

To convert °F to °C:

$$T_{°C} = (T_{°F} - 32) \div 1.8$$

To convert °C to °F:

$$T^F = (T_{°C} \times 1.8) + 32$$

Torque:

- 1 Ft.lbs = 1.356 Nm
- = 0.138 kgf.m
- 1 Nm = 0.738 Ft.lbs
- = 0.102 kgf.m

Other measurements:

- 1 in = 25.4 mm
- 1 mm = 0.039 in
- 1 in² = 6.452 cm²
- 1 cm² = 0.155 in²
- 1 hp = 0.735 kW
- 1 kW = 1.359 hp
- 1 Nm = 0.73756 Ft.lbs
- 1 Ft.lbs = 1.355818 Nm

Imperial to metric

Inches	Decimal	mm
1/16	0.06	1.59
1/8	0.13	3.18

Cylinder Speed

This chart will help you calculate the time required for an Enerpac cylinder to lift a load when powered by a 10,000 psi Enerpac hydraulic pump.

The Cylinder Speed Chart can also be used to determine the pump type and model best suited for an application when you know the plunger speed required.

To determine: Cylinder plunger speed

An RC-308 cylinder (30 ton) is powered by a ZE-5 pump. While lifting the load, the cylinder plunger will require 3.2 seconds to travel 1 inch. While extending towards the load, the cylinder plunger travels at 0.47 sec/in.

To determine: Best matching pump

Your 30 ton cylinder needs to move a load at a speed of 6.50 sec/in. Simply go down from the top of the chart, to the value of 6.50 sec/in. Then follow the chart to the right to find that the ZE4 pump or ZU4 is most suitable for your application.

30 ton		50 ton		75 ton		100 ton		Pump Type

No Load indicates the plunger speed as the plunger extends toward the load (1st stage).

Load indicates the plunger speed as the load is lifted at a system pressure of 10,000 psi (2nd stage).

Formula $V = A \div Q$

V (sec/in) = A (in²) \div Q (in³/min)

V = Cylinder plunger speed in seconds per inch

A = Cylinder effective area in square inches

Q = Pump oil flow in cubic inches

Example: At what speed (V) will the RC308 (30 ton) cylinder move when powered by a ZE3 electric driven pump?

RC308 Cylinder effective area A = 6.50 in²

ZE3 pump oil flow Q , (no load) is 450 in³/min

$V = 6.50 \text{ in}^2 \div 450 \text{ in}^3/\text{min} \times 60 = 0.87 \text{ sec/in}$

$$\text{Cylinder Plunger Speed (sec/in)} = \frac{\text{Cylinder Effective Area}}{\text{Pump Flow Rate}} \times \frac{60 \text{ sec}}{1}$$

Ways

The (oil) ports on a valve.

A 3-way valve has 3 ports: pressure (**P**), tank (**T**), and cylinder (**A**).

A 4-way valve has 4 ports: pressure (**P**), tank (**T**), advance (**A**) and retract (**B**).

Single-acting cylinders require at least a 3-way valve, and can, under certain instances, be operated with a 4-way valve.

Double-acting cylinders require a 4-way valve, providing control of the flow to each cylinder port.

Positions

The number of control points a valve can provide. A 2-position valve has the ability to control only the advance or retraction of the cylinder. To be able to control the cylinder with a hold position, the valve requires a 3rd position.

Center Configuration

The center position of a valve is the position at which there is no movement required of the hydraulic component, whether a tool or cylinder.

The most common is the **Tandem Center**. This configuration provides for little to no movement of the cylinder and the unloading of the pump. This provides for minimum heat build-up.

The next most common is the **Closed Center** configuration, which is used mostly for independent control of multi-cylinder applications. This configuration again provides for little to no movement of the cylinder, but also dead-heads the pump, isolating it from the circuit. Use of this type of valve may require some means of unloading the pump to prevent heat build-up.

There are many more types of valves, such as Open Center and Float Center. These valves are used mostly in complex hydraulic circuits and require other special considerations.

Open Center

Float Center

Directional Control Valves

3-Way Valves

are used with single-acting cylinders

4-Way Valves

are used with double-acting cylinders

Valves may be either pump mounted or remote mounted.

Pump Mounted

Remote Mounted

Valves may be either manually or solenoid operated.

Manually Operated

Solenoid Operated

Advance Hold Retract

Single-acting cylinder

Controlled by a 3-way, 3-position valve.

Advance

The oil flows from the pump pressure port P to the cylinder port A: the cylinder plunger will extend.

Hold

The oil flows from the pump pressure port P to the tank T. The cylinder port A is closed: the cylinder plunger will maintain its position.

Retract

The oil flows from the pump port P and cylinder port A to the tank T: the cylinder plunger will retract.

Double-acting cylinder

Controlled by a 4-way, 3-position valve.

Advance

The oil flows from the pump pressure port P to the cylinder port A, and from cylinder port B to tank T: the cylinder plunger will extend.

Hold

The oil flows from the pump pressure port P to the tank T. The cylinder ports A and B are closed: the cylinder plunger will maintain position.

Retract

The oil flows from the pump pressure port P to cylinder port B, and from cylinder port A to tank T: the cylinder plunger will retract.

* Heavy hexagon nuts.

Determine the maximum torque according to the bolt (nut) size and grade. Always consult the manufacturer's instructions or engineering recommendations when making bolted connections.

IMPORTANT

The hexagon sizes shown in the tables should be used as a guide only. Individual sizes should be checked before specifying any equipment.

BSH-Series Sockets

Use only Heavy Duty Impact Sockets for power driven torquing equipment, according to ISO2725 and ISO1174; DIN3129 and DIN3121 or ASME-B107.2/1995.

Page: 244

Tightening Methods

Principally there are two modes of tightening: "Uncontrolled" and "Controlled".

Uncontrolled tightening

Uses equipment and/or procedures that cannot be measured. Preload is applied to a bolt and nut assembly using a hammer and spanner or other types of impact tools.

Controlled tightening

Employs calibrated and measurable equipment, follows prescribed procedures and is carried out by trained personnel.

Advantages of Controlled Tightening

Known, controllable and accurate bolt loads

Employs tooling with controllable outputs and adopts calculation to determine the required tool settings.

Uniformity of bolt loading

Especially important on gasketed joints as an even and consistent compression is required for the gasket to be effective.

Safe operation following prescribed procedures

Eliminates the dangerous activities of manual uncontrolled tightening and requires that the operators be skilled and follow procedures.

Reduces operational time resulting in increased productivity

Reduces tightening time and operator fatigue by replacing manual effort with the use of controlled tooling.

Reliable and repeatable results

Using calibrated, tested equipment, following procedures and employing skilled operators achieves known results consistently.

The right results first time

Many of the uncertainties surrounding in-service joint failures are removed by ensuring the correct assembly and tightening of the joint are carried out the first time.

Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint integrity.

Integral databases hold data for:

- ASME B16.5, ASME B16.47, API 6A and API 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

www.enerpac.com

What is Torque?

It is a measure of how much force acting on an object which causes that object to rotate.

What is Torque Tightening?

The application of preload to a fastener by the turning of the fastener's nut.

Torque Tightening and Preload

The amount of preload created when torquing is largely dependant on the effects of friction.

Principally there are three different "torque components":

- torque to stretch the bolt
- torque to overcome the friction in bolt and nut threads
- torque to overcome friction at the nut spot face (bearing contact surface).

Torque Tightening

Turning movement

Stretch of Fastener (Pre-load)

Preload (residual load) = Applied Torque *minus* Frictional Losses

Lubrication Reduces Friction

Lubrication reduces the friction during tightening, decreases bolt failure during installation and increases bolt service life. Variation in friction coefficients affect the amount of preload achieved at a specified torque. Higher friction results in less conversion of torque to preload. The value for the friction coefficient provided by the lubricant manufacturer must be known to accurately establish the required torque value.

Lubricant or anti-seizure compounds should be applied to both the nut bearing surface and the male threads.

Frictional Losses

Example of how a lubricant can reduce the effect of friction and convert more torque to bolt preload.

Friction points should always be lubricated when using the torque tightening method.

Select the Right Wrench

Choose your Enerpac torque wrench using the untightening rule of thumb:

- When loosening a nut or bolt more torque is usually required than when tightening.
- For general conditions it can take up to 2½ times the input torque to breakout.
- Do not apply more than 75% of the maximum torque output of the tool when loosening nuts or bolts.

Conditions of bolted joints

- Humidity corrosion (rust) requires up to twice the torque required for tightening.
- Sea water and chemical corrosion requires up to 2½ times the torque required for tightening.
- Heat corrosion requires up to 3 times the torque required for tightening.

Torque Procedure

When torquing it is common to tighten only one bolt at a time, this can result in Point Loading and Load Scatter. To avoid this, torque is applied in stages following a prescribed pattern:

Torque Sequence

- Step 1** Spanner tight ensuring that 2 - 3 threads extend above nut.
- Step 2** Tighten each bolt to one-third of the final required torque following the pattern as shown above.
- Step 3** Increase the torque to two-thirds following the pattern shown above.

- Step 4** Increase the torque to full torque following the pattern shown above.
- Step 5** Perform one final pass on each bolt working clockwise from bolt 1, at the full final torque.

Breakout Torque

When loosening bolts a torque value higher than the tightening torque is normally required.

This is mainly due to corrosion and deformations in the bolt and nut threads.

Breakout torque cannot be accurately calculated, however, depending on conditions it can take up to 2½ times the input torque to breakout.

The use of penetrating oils or anti-seize products is always recommended when performing breakout operations.

Tensioning requires longer bolts

INCORRECT

CORRECT

What is Bolt Tensioning?

Tensioning is the direct axial stretching of the bolt to achieve **preload**. Inaccuracies created through friction are eliminated. Massive mechanical effort to create torque is replaced with simple hydraulic pressure. A uniform load can be applied by tensioning multiple studs simultaneously.

Tensioning requires longer bolts, and a seating area on the assembly around the nut. Tensioning can be done using detachable Bolt Tensioners or Hydraulic Nuts.

Preload (residual load) = Applied Load *minus* Load Losses

What is Load Loss?

Load loss is a loss of bolt elongation depending on factors such as thread deflections, radial expansion of the nut, and embedding of the nut into the contact area of the joint. Load loss is accounted for in calculation and is added to the preload value to determine the initial **Applied Load**.

The preload depends on Applied Load and Load Loss (load loss factor).

GLOSSARY OF TERMS

Applied Load: The load applied to a bolt during tensioning which includes an allowance for Load Loss.

Bolt Tensioning: A method of controlled tightening which applies preload to a bolt by stretching it axially.

Breakout Torque: The amount of torque required to loosen a tightened bolt. (Usually more torque is required to loosen a bolt than was used to tighten it.)

Elastic Range: The range on a bolt's stress / strain curve where stress is directionally proportional to strain.

Load Loss: The losses in a bolt which occur on transfer of load from a tensioning device to the bolt assembly (these may arise from phenomena such as thread deflection and embedding of

the nut to the contact area of the joint, and is calculated as a factor of the length to diameter ratio of the bolt).

Load Scatter: The spread of differing loads in a sequence of bolts after they have been loaded. It is mostly due to the elastic interaction of the bolts and the joint member; as subsequently tightened bolts further compress the joint, previously tightened bolts are subject to some relaxation.

Plastic Range: The range on a stress/strain curve where the tensile load applied to a bolt results in permanent deformation.

Preload: The load in a bolt immediately after it has been tightened.

Proof Load: Proof load is often used interchangeably with Yield Strength but is usually measured at 0.2% plastic strain.

Tensile Point: The point at which the tensile loading on a bolt causes the bolt to rupture.

Torque Tightening: The application of Preload to a bolt by turning of the bolt's nut.

Ultimate Strength: The maximum tension which can be created by tensile load on a bolt.

Yield Strength: The point at which a bolt begins to plastically deform under tensile loading.

NOTE: Bolt is used as a generic term for a threaded fastener.

**Manufacturer's rating of pressure and load are maximum safe limits.
Good practice encourages using only 80% of these ratings!**

Tensioning Operation

Tensioning permits the simultaneous tightening of multiple bolts; the tools are connected in sequence via a high-pressure hose assembly to a single pump unit. This ensures each tool develops the exact same load and provides a uniform clamping force across the joint. This is especially important for pressure containing vessels requiring even gasket compression to affect a seal.

General Procedure

- Step 1:** The bolt tensioner is fitted over the stud
- Step 2:** Hydraulic pressure is applied to the tensioner which then stretches the stud.
- Step 3:** The Stud's nut is wound down against the joint face
- Step 4:** Pressure is released and the tool removed.

The bolt behaves like a spring, when the pressure is released the bolt is under tension and attempts to contract, creating the required clamping force across the joint.

Step 1

Step 2

Step 3

Step 4

Less than 100% Tensioning

Not all applications allow for the simultaneous fit of a tensioning device on each bolt, in these cases at least two tensioning pressures are applied. This is to account for a load loss in those bolts already tensioned as the next sets are tightened. The load losses are accounted for in calculation and a higher load is applied to allow the first sets to relax back to the target preload.

Set-up using a 100% tensioning procedure

All bolts are tensioned simultaneously.

Set-up using a 50% tensioning procedure

Half the bolts are tensioned simultaneously, the tools are relocated on the remaining bolts and they are subsequently tensioned.

Read Instruction Manuals

Please refer to the product Instruction Sheets for safe use guidelines and detail on the correct set up and operation of the equipment.

Enerpac Bolting Integrity Software Solutions play a key role in implementing and managing an Integrity Program for bolted connections. The software is used extensively within Enerpac and increasingly by a wide range of clients worldwide often interfacing with maintenance, construction and commissioning management systems.

- First developed over 20 years ago, we have continued to update and enhance the software based on user feedback, technology advances and our roles on industry standard committees, to produce the most comprehensive suite of joint integrity software available.
- Recommended bolt loads for standard joints are derived from independently verified calculation methods and traceable back to standards

Integral databases hold data for:

- ASME B16.5, ASME B16.47, API 6A and API 17D flanged joints
- Common gasket materials and configurations
- Comprehensive flange and bolt materials
- Comprehensive range of lubricants
- Enerpac controlled bolting equipment includes torque, multipliers, hydraulic wrenches and bolt tensioners.
- Custom joint information can also be entered.

▲ Standard flange calculation menu (INFORMATE)

The Enerpac Bolting Software Suite includes:

- **Bolt-Up** - Online bolt load calculator. Free access and use on www.enerpac.com.
- **INFORMATE** - Advanced calculation and procedure software. Contact Enerpac for user licenses and dedicated support.
- **iDMS Integrity Data Management System** - A complete Integrity Assurance project management package for managing bolted joints from cradle to grave. Contact Enerpac for user licenses and dedicated support.

Bolt-Up

Bolt-Up is a simple to use online calculator, built upon the Informate calculation engine, providing reliable, repeatable bolt loads for:

- Carbon steel weldneck ANSI 16.5 standard flanges, using a limited range of bolt materials; selected gasket options and a fixed lubrication value.
- Inputting basic joint configuration information allows Bolt-Up to determine: bolt load; bolt stress and the required torque. These outputs are displayed alongside basic flange and bolt information e.g. joint thickness and bolt size/quantity.

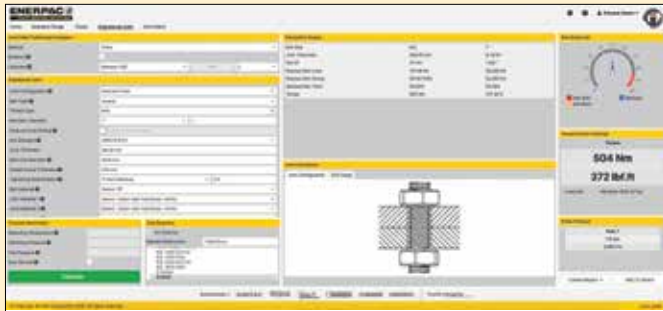

Bolting Integrity Software

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

This software includes the following hydraulic tool selections:

- S, W, RSL, DSX and HMT Torque Wrenches,
- HM-Series HydraMax®, GT-Series Bolt Tensioners, and EAJ-Series AquaJack Subsea Tensioners

▲ Enginereed Joint menu (INFORMATE)

INFORMATE Bolt Load Calculation Software

INFORMATE can be used on a huge range of flanged joints and clamped connections in virtually any situation from process piping to custom-designed flange connections.

- Calculate bolt loads and stresses, determine tooling pressures for Enerpac torque and tensioning equipment; analyse existing connections and test custom designed connections.
- Extensive material database covering all common standards:
 - Common and industry specific lubricants
 - 200+ bolting materials
 - 500+ flange materials
 - 60+ gasket materials
- Engineered Joint Calculation Features - allows for different types of bolted application for non-circular or structural applications.
- Installed direct to the desktop or accessed via the internet, Informate is available in a single version that is configurable to client requirements and includes multiple international standards and the latest and forthcoming regulatory data, when taken with a maintenance package.

▲ Clamp menu (INFORMATE)

Integrity Data Management System (iDMS)

iDMS is a flexible data management and activity planning system specifically for use on assets featuring bolted connections.

Designed to store the entire lifecycle data relating to every critical bolted joint on an installation, it aids planning, ensures joint integrity, as well as reducing construction and maintenance schedules and costs.

- Provides managers and technicians with essential information about joint components used in assembly, in addition it specifies the tools and the torque or tension values to deliver a leak-free joint.
- Allows planner and maintenance engineers to rapidly build packages of work complete with all documentation and then track them to completion
- Whenever a joint is worked on, all of the previous history and experience of that joint is available, allowing any particular requirements of the joint to be taken into account proactively prior to joint assembly and tightening.

iDMS Custom Tailored Solutions available to meet client needs, for example:

- Embedded Informate bolted joint calculator
- Export and import of data to asset management systems
- Exporting data to populate customer documentation
- Color coding of the joint provides an instant review of the status

Contact Enerpac for User License

The Enerpac Academy is our in-house training program, offering Enerpac product operators and maintenance staff the opportunity to be trained in the safe use and maintenance of high-pressure hydraulic tools.

Operating these tools requires sound knowledge of how they work and how they should be maintained. Correct use of these tools increases safety and reduces risk – both for the operator and the environment in which the tools are used. Having the right training enables the operator to use the tools safely and properly.

Enerpac Academy

- Safety focus for operators, tools and environment
- Dedicated in-house Enerpac training centers
- Both standard training courses and specialized training services
- Highly experienced training staff
- Develops alternative training options such as
 - eLearning modules
 - vLearning sessions
 - Instructional videos

In-house Training Centers

Do you work with high-pressure hydraulic tools on a regular basis or even every day? The training courses are designed to be highly interactive with a strong hands-on element. Each training course is led by a qualified trainer, an Enerpac specialist capable of providing high quality training. A written or practical exam is part of certain training courses.

Training Center Locations

- Columbus, Wisconsin (USA)
- Ede (The Netherlands)
- Bangalore (India)
- Singapore
- Sydney (Australia)

Enerpac Academy offers a meticulously compiled training program covering tool knowledge, repairs and maintenance, and safe operation of Enerpac hydraulic tools. If you would like to schedule a training course, please contact Enerpac for a training calendar, application form, and brochure at www.enerpac.com.

The Power of Knowledge

In-Person Training

- Highly experienced training staff
- Class sizes range from 8 to 20, depending on class and location
- Commercial Sales, Service and Repair Class capabilities
- Most classes consist of theoretical and hands-on training

eLearning Modules

- Enerpac Training available on “your” schedule
- Courses available to support New Product Launches, Product Awareness Training and Enerpac Academy Courses
- Available to external viewers through Enerpac’s “LDMS” system

vLearning Sessions

- Interactive training available on-line
- Sessions contain Technical Presentations, Hands-on product demos and end with a Q&A session
- Classes cover many topics, such as Product Operational information and Service & Repair Training
- Look for scheduling and registration details on www.Enerpac.com

Instructional Videos

- Informational videos created with Enerpac Academy Training processes in-mind
- Topics range from product “how-to” videos to application and operational videos
- Videos are available on the Enerpac “You-Tube” channel and other venues, where appropriate
